### **Painting Wargaming Figures** Javier Gomez

Valero,2015-03-30 Javier Gomez, a highly talented figure painter of long experience and excellent reputation, shares the secrets of his success in this accessible 'how-to' guide to painting miniatures. He takes the reader step-by-step through the whole process, from choice of materials (unlike other available guides it is not linked to any specific figure manufacturer) and preparation of the miniatures to basing and even advice on photographing the finished item. Techniques such as dry-brushing, ink-washing, shading and highlighting are all explained clearly with the help of step-by-step photographs and colour charts. Specific case studies tackle a variety of useful subjects across all periods, such as mixing realistic flesh tones for different races; painting horses; guns and limbers; Medieval heraldry; Napoleonic uniforms; WW2 and modern camouflage patterns. Javier also clearly explains how these techniques and processes can be applied to all the major wargaming scales, from 40mm down to 6mm. Whatever historical period (or Sci-fi/Fantasy) and whatever scale the reader is interested in, this book is an invaluable source of practical advice and inspiration.

#### How to Save Your Planet One Object at a Time Tara

Shine,2020-04-16 'an unpreachy guide [...] free of jargon and full of often surprising information.' The Times Change starts at home. In the office. Change starts with you. Your family. Your friends. Change starts with everyday things. One object at a time. Sometimes it can feel overwhelming thinking about all that needs to be done to save our planet. This book is the antidote to that feeling. Easy to read and easy to do – here's all the information and inspiration you need to make a difference, simply by making smart choices about everyday objects, tasks and habits. Environmental scientist Dr Tara Shine guides you from room to room and occasion to occasion with environmentally friendly

solutions, backed by science. From swapping bottled soap to bars, to replacing cling film with a simple plate, you will reduce your environmental footprint in an instant, while saving money. This book busts persistent myths and will once and for all show that living sustainably can be both fun and convenient. Besides, it will not only have a positive impact on the environment, but your wellbeing too! 'Dr. Tara Shine is an enlightened big-picture thinker, and with this book she shows that she is equally and delightfully adept at bringing details into focus. This book is all about realising the power you have as an individual by informing yourself, asking questions and making smart choices. By getting becoming active and joining the conversation, you become empowered and you do something about the problem we face rather than feeling powerless in its presence.' Christiana Figueres, Former Executive Secretary of the United Nations Framework Convention on Climate Change

Dynamics of Long-Life Assets Stefan N. Grösser, Arcadio Reyes-Lecuona, Göran Granholm, 2017-05-10 This book is published under a CC BY-NC 4.0 license. The editors present essential methods and tools to support a holistic approach to the challenge of system upgrades and innovation in the context of high-value products and services. The approach presented here is based on three main pillars: an adaptation mechanism based on a broad understanding of system dependencies; efficient use of system knowledge through involvement of actors throughout the process; and technological solutions to enable efficient actor communication and information handling. The book provides readers with a better understanding of the factors that influence decisions, and put forward solutions to facilitate the rapid adaptation to changes in the business environment and customer needs through intelligent upgrade interventions. Further, it examines a number of sample cases from various contexts including car manufacturing, utilities, shipping and the furniture industry. The book offers a valuable resource for both academics and practitioners interested in the

upgrading of capital-intensive products and services. "The work performed in the project "Use-It-Wisely (UiW)" significantly contributes towards a collaborative way of working. Moreover, it offers comprehensive system modelling to identify business opportunities and develop technical solutions within industrial value networks. The developed UiW-framework fills a void and offers a great opportunity. The naval construction sector of small passenger vessels, for instance, is one industry that can benefit." Nikitas Nikitakos, Professor at University of the Aegean, Department of Shipping, Trade, and Transport, Greece. "Long-life assets are crucial for both the future competitiveness and sustainability of society. Make wrong choices now and you are locked into a wrong system for a long time. Make the right choices now and society can prosper. This book gives important information about how manufacturers can make right choices." Arnold Tukker, Scientific director, Institute of Environmental Sciences (CML), Leiden University, and senior scientist, TNO.

*A Thousand Resurrections* Maria Garriott,2006 What would make a young, privileged college student well postured to achieve her place in the American dream decide to pursue another dream-one that would force her to take food stamps and move into an at-risk urban community? What would sustain her for over two decades while she raised five children in a context of failed educational systems, lead poisoning, and chronic theft? What would eventually compel her to move and yet still embrace the issues of city? This is one woman's story of a return to a city that many have fled. It is about the challenges, heartbreaks, lessons, and joys of a woman participating in the transformation of the city while being transformed herself.
