Knowledge Governance Reasserting the Public Interest, Anna Célia Castro, Rainer Kattel, 2014-10-01 This book argues that the current international intellectual property rights regime, led by the World Trade Organization (WTO), has evolved over the past three decades toward overemphasizing private interests and seriously hampering public interests in access to knowledge and innovation diffusion. This approach concentrates on tangible and codified knowledge creation and diffusion in research and development (R&D) that can be protected via patents and other intellectual property rules and regulations. In terms of global policy initiatives, however, it is becoming increasingly clear that the WTO in particular is mostly a conflict-resolution facility rather than a global governance body able to generate cooperation and steer international coordinated policy action. At the same time, rent extraction and profits streaming from legal hyperprotection have become pervasively important for firm strategies to compete in a globalized marketplace. "Knowledge Governance: Reasserting the Public Interest" offers a novel approach – knowledge governance – in order to move beyond the current regime.

Brill's Companion to Hellenistic Epigram Peter Bing, Jon Bruss, 2007-04-30 An internationally renowned set of experts on epigram offers an introduction, fresh approaches, and new direction

to the study of Hellenistic-era epigram by exploring the models, forms, poetology, sub-genera, intertexts, and ancient and modern reception of Hellenistic epigram.

Hellenistic Epigrams Francis Cairns, 2016-10-20 Investigates the literary, linguistic, historical, epigraphic, and other contexts of Hellenistic epigrams in themed chapters through analyses of individual epigrams.

Small States and the European Union Lino Briguglio, 2016-06-10 The Economies of European Union Small Member and Candidate States deals with the small states and candidate states of the EU, with a focus on their economic structure and performance, and the impact of EU membership (past, actual and potential) on the economy. The small states to be covered are those with a population of 3 million or less, namely: Cyprus, Estonia, Iceland, Latvia, Lithuania, Luxembourg, Malta, Macedonia, Montenegro and Slovenia. This title adds to the literature on the EU, on regional integration generally and on small states. It delves into the special constraints of small economic size, and examines why and how the small states of Europe manage to compete, albeit not without difficulty, with the larger states in the block, where free trade prevails. The book answers the following research questions: What are the special economic development constraints faced by the small states of the EU? What policy options have been used by, or are available to, these small states to address these constraints? How can the economic resilience and competitiveness of these states be enhanced? Has EU membership been

mostly advantageous for these small states? What are the economic prospects for these states as EU member states? The book is aimed primarily for students of EU affairs and of regional integration in general. It will also be useful for students of subjects relating to small states. It may also appeal to policy makers of small states, and to officials of international and regional organisations that have a constituency that includes small states.

attempts to remedy the situation. The areas
covered include surveys of animal population
biology studies - population genetics, population
ecology and ecophysiology, population ethology,
population cytogenetics, and population

Rituals in Ink Alessandro Barchiesi,Jörg
Rüpke,Susan A. Stephens,2004 In order to
reconstruct ancient rituals we must rely on
ancient texts. That is the premise of these eight

papers which are taken from a conference held at Stanford University in 2002 which brought together scholars of Roman religion and scholars of Roman literature to debate the 'textuality of ritual'. The papers are followed by six brief essays which discuss the themes of the and consider the problems of retrieving ritual from texts written by such complex authors as Virgil, Ovid and Livy. The essays themselves focus on: the theme of sacrificial ritual in Roman poetry; religious communication in Rome; professional poets and the 2nd-century BC temple of Hercules of the muses; Livy; the Aeneid ; Ovid's use of hymns in the Metamorphoses ; Ovid's depiction of a triumph in Tristia ; the secret name of Rome. The numerous extracts are presented in Latin verse and English prose translation.

The New Posidippus Kathryn Gutzwiller, 2005-09-22
The Milan Papyrus (P. Mil. Volg. VIII. 309), containing a collection of epigrams apparently all by Posidippus of Pella, provides one of the most exciting new additions to the corpus of Greek literature in decades. It not only contains over 100 previously unknown epigrams by one of the most prominent poets of the third century BC, but as an artefact it constitutes our earliest example of a Greek poetry book. In addition to a poetic translation of the entire corpus of Posidippus' poetry, this volume contains essays about Posidippus by experts in the fields of papyrology, Hellenistic and Augustan literature, Ptolemaic history, and Graeco-Roman visual culture.

Generic Composition in Greek and Roman Poetry
Francis Cairns, 2007 Original in conception and

powerful in scope, *Generic Composition in Greek and Roman Poetry* remains one of the most important books on early Greek, Hellenistic and Roman poetry in a generation. First published in the philological climate of the early 1970s, Francis Cairns' book was among the first works that sought to further our comprehension of difficult or obscure ancient poems by applying new literary-critical conventions and terminology, notably the concept of genre. Ancient literary studies have grown more sophisticated over the last years, and *Generic Composition in Greek and Roman Poetry* now finds itself very much in the midst of current debates. The new edition includes a new Postscript by the author, and important corrections to the text, notes, and indices. The original publisher remarked, This is the first serious attempt to formulate a system of literary criticism for ancient poetry, derived wholly from ancient evidence. It is based on methods of generic analysis, assignment and interpretation applicable to all Greek and Roman poetry. It outlines what the author deduces are the creative principles informing ancient poets' approach to their subject matter, and establishes criteria that enable an objective discussion of the poems' originality and merit. *Generic Composition in Greek and Roman Poetry* examines uses of *topoi* and categories of genres, and offers detailed and insightful interpretations of many individual poems in both languages. It also highlights five specific generic sophistications, among them inversion and inclusion. The work is accompanied by extensive notes and indices, together with translations of

the original texts that make it accessible and valuable to classicists and non-classicists alike. One of the great contributions of Francis Cairns' work has been firmly to move the study of ancient poetry away from the realm of fictive literary biography, while grounding critical analysis in the techniques that were employed by ancient authors to create meaning.

Greek Lyric Poetry from Alcman to Simonides C. M. Reissued in uniform series design, the reissues will enable libraries, scholars, and students to gain fresh access to some of the finest scholarship of the last century.

Archaic and Classical Greek Epigram Manuel Baumbach, Andrej Petrovic, Ivana Petrovic, 2010-12-02 This book explores dialogue between Archaic and Classical Greek epigrams and their readers, and argues for their often-unacknowledged literary and aesthetic achievement.

Latin Love Elegy Robert Maltby, 1980 This book offers a representative selection of the three main exponents of Latin love elegy: Propertius, Tibullus, and Ovid. A few elegiac poems by Catullus are included for purposes of comparison. The book includes a general introduction to the elegy, select bibliography, Latin text of twenty poems, and commentary to introduce each poem, notes, both grammatical and to aid literary analysis.
