D. Burtenshaw, M. Bateman, G. J. Ashworth

Europe '99 Fodor's,1998 The best of 36 countries with the historic towns, great cities and scenic coasts and countryside.

Europe's Great Cities '99 Fodor's,1999 Selective coverage of the 17 most popular European capitals, including London, Paris, Prague, Budapest, Brussels, Madrid, Florence, and Copenhagen.

Governance of Europe's City Regions Tassilo Herrschel,Peter Newman,2003-08-27
Governance of Europe's City Regions is a structured overview of current debates on cities and regions. It clarifies contemporary debates about regionalism and contributes new insights into the theory of 'new regionalism'.

EUROPEAN CITIES AT WORK FREDERIC C. HOWE, PH.D.,1913

Growth and Change in Post-socialist Cities of Central Europe Waldemar Cudny,Josef Kunc,2021-12-29 This book presents multidimensional socio-economic transformations taking place in the post-socialist cities located in selected countries of the Central European region. The analysis includes case studies from the Eastern part of Germany (Chemnitz, Leipzig), Poland (Łódź, Kielce, Katowice conurbation, and peripheral urban centres from Eastern Poland), Slovakia (Bratislava, Nitra), the Czech Republic (Olomouc, Brno), and from Hungary (Pécs). The analysed urban areas have undergone far-reaching political and socio-economic changes in the last 30 years. These changes began with the collapse of communism and the centrally planned economy system in the region of Central Europe. The beginning of this period, often referred to as post-socialist transformation, dates back to 1989. The consequence of the aforementioned political processes was the multifaceted socio-economic and demographic changes that significantly affected urban areas in Central Europe. This book presents an attempt to summarize the main long-term processes of changes taking place in

these urban areas and to identify contemporary and future trends in their socio-economic development. The book will be valuable to undergraduate and postgraduate students in human geography, urban studies, economy, and city marketing, especially with an interest in Central Europe.

European cities of culture and cultural months John Myerscough, 1994

European Cities in the Modern Era, 1850-1914 Friedrich Lenger, 2012-08-17 In 'European Cities in the Modern Era, 1850/80-1914', Friedrich Lenger offers an account of Europe's major cities in a period crucial for the development of much of their present shape and infrastructure.

Network Governance and Energy Transitions in European Cities Timea Nocht, 2020-10-12 This book investigates and evaluates the opportunities and limitations of network governance in building local capacity for energy infrastructure governance. Presenting a comparative analysis of three city cases from across Europe- Birmingham, Frankfurt and Budapest- this book demonstrates how local factors shape the prospect of network governance to support low-carbon energy transitions. It maps out existing governance networks, highlighting the actors involved and their interactions with one another, and also discusses the role and embeddedness of networks in the urban governance of low-carbon energy. Drawing on case study evidence, Nocht develops a comparative analysis which discusses the intricate connections between network characteristics, context and impact. It highlights that organisational fragmentation; the complexity of the low-carbon energy problem and historical developments all influence network characteristics in terms of degree of integration and vertical (hierarchical) power relationships among network actors. Overall, the book concludes that understanding such links between context and networks is crucial when designing and implementing new governance models aimed at facilitating and governing low-carbon urban development. Low-Carbon Energy Transitions in European Cities will be of great interest to scholars of energy policy,

urban governance and sustainability transitions.

Tourism in European Cities John Ebejer, 2021-09-14 This book explores urban tourism with a particular focus on European cities.

A Europe of Towns and Cities European Commission, 1997

City Limits Judith Owens, Glenn Jeffrey Clark, Greg Thomas Smith, 2010 Recent studies of the structure and everyday activities of cities have highlighted the pluralism inherent in dense populations and looked at crucial themes such as culture, class, gender, governance and social practices. *City Limits* advances this work by offering richly detailed studies of aspects of city life in such important early modern European centres as London, Paris, Augsburg, Amsterdam, Copenhagen and Edinburgh. In essays that capture the multiple aspects of urban life, contributors examine European cities through the lenses of history, literature, art, architecture and music. Covering topics such as governance, performance, high culture and subculture, tourism and journalism, this volume provides new and invigorating ways to think about cities both past and present. An innovative and interdisciplinary work, *City Limits* crosses conventional critical boundaries to depict a vibrant and moving cityscape of historical urban experience.

The European Cities and Technology Reader David C. Goodman, 1999 The *European Cities and Technology Reader* is divided into three main sections presenting key readings on: Cities of the Industrial Revolution (to 1870), European Cities since 1870 and the Urban Technology Transfer.

European Cities Patrick Le Galès, 2002-08-08 European cities are on the rise, and are taking advantage of the opportunities of the European integration and globalization processes. But they also face economic changes, social inequalities, poverty and a new set of constraints. Taking examples through the European Union, *European Cities* explores the impact of the transformation of the nation

states on cities and the change of local societies and local governments. It argues that new modes of urban governance are emerging, and that cities are becoming collective actors within European governance. *European Cities* shows why and how the bulk of European cities still appear to be original forms of compromise, aggregation, representation of diverse interests, and culture. Different modes of governance are gradually being structured in most middle size European cities despite processes of social exclusion segregation accompanied by the increased mobility of some citizens. Are Europeans going to invent a new form of institutionalized and territorialized capitalism, of which medium-sized European cities will be one of the pillars and one of the actors ? Failing that, the effects of changing scales could be expressed as profound transformations of the European urban model. *European Societies Series* Series Editor: Colin Crouch Very few of the existing sociological texts which compare different European societies on specific topics are accessible to a broad range of scholars and students. The *European Societies* series will help fill this gap in the literature, and attempt to answer questions such as: Is there really such a thing as a 'European model' of society? Do the economic and political integration processes of the European Union also imply convergence in more general aspects of social life, like family or religious behaviour? What do the societies of Western Europe have in common with those further to the east? This series will cover the main social institutions, although not every author will cover the full range of European countries. As well as surveying existing knowledge in a way that will be useful to students, each book will also seek to contribute to our growing knowledge of what remains in many respects a sociologically unknown continent.

European Urbanization, 1500-1800 Jan De Vries, 2006-12-21 First Published in 2006. Routledge is an imprint of Taylor & Francis, an informa company.

Culture and Sustainability in European Cities Svetlana Hristova, Milena Dragičević Šešić, Nancy

Duxbury,2015-04-21 European cities are contributing to the development of a more sustainable urban system that is capable of coping with economic crises, ecological challenges and social disparities in different nation-states and regions throughout Europe. This book reveals in a pluralistic way how European cities are generating new approaches to their sustainable development, and the special contribution of culture to these processes. It addresses both a deficit of attention to small and medium-sized cities in the framework of European sustainable development, and an underestimation of the role of culture, artistic expression and creativity for integrated development of the city as a prerequisite to urban sustainability. On the basis of a broad collection of case studies throughout Europe, representing a variety of regionally specific cultural models of sustainable development, the book investigates how participative culture, community arts, and more generally, creativity of civic imagination are conducive to the goal of a sustainable future of small and medium-sized cities. This is an essential volume for researchers and postgraduate students in urban studies, cultural studies, cultural geography and urban sociology as well as for policymakers and practitioners wanting to understand the specificity of European cities as hubs of innovation, creativity and artistic industriousness.

European Cities Patrick Le Galáes,2002 European cities are on the rise. The author of this text shows the impact of the transformation of the nation states on cities and the change of local societies and local governments. He argues that new modes of urban governance are emerging.

A Modern History of European Cities Rosemary Wakeman,2020-01-23 Rosemary Wakeman's original survey text comprehensively explores modern European urban history from 1815 to the present day. It provides a journey to cities and towns across the continent, in search of the patterns of development that have shaped the urban landscape as indelibly European. The focus is on the built

environment, the social and cultural transformations that mark the patterns of continuity and change, and the transition to modern urban society. Including over 60 images that serve to illuminate the analysis, the book examines whether there is a European city, and if so, what are its characteristics? Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies, as well as urban geography, and provides full coverage of urban society not only in western Europe, but also in eastern and southern Europe, using various cities and city types to inform the discussion. The book provides detailed coverage of the often-neglected urbanization post-1945 which allows us to more clearly understand the modernizing arc Europe has followed over the last two centuries.

Transformation of Cities in Central and Eastern Europe F. E. Ian Hamilton, Kaliopa Dimitrovska Andrews, Nataša Pichler-Milanović, 2005 Annotation This volume is one in a series initiated by the United Nations University Institute of Advanced Studies on the inter-relationship between globalisation and urban transformation. It identifies and describes the inter- and intra-urban transformations of Central and Eastern European cities and considers their pre-1945 historic legacies, the socialist period, and their contemporary transition towards market oriented and democratic systems. The dramatic changes since 1989 including the collapse of Communist ideology, the break-up of the Soviet Union, Czechoslovakia and Yugoslavia, the end of the Cold War and the impact of globalisation and European integration, have reconfigured this region and affected their re-integration into European and global networks. This book first examines the similarities and differences between significant Central and Eastern European cities, comparing the differing patterns of historical context and socialist legacies before 1990, and the impacts of internal and external forces on re-shaping these cities and their paths of transformation since 1990. It also examines the role of contemporary

planning within the overall development of Central and Eastern European cities. The conclusion demonstrates the similarities and differences between Central and Eastern European cities and their re-integration into global networks.

The European City D. Burtenshaw, M. Bateman, G. J. Ashworth, 2021-06-29 Originally published in 1991, this book focusses on the philosophies, histories and processes which have made the West European city system rich in internal variety yet distinct from that of the rest of western industrialised urban society. It synthesizes international experiences in particular aspects of urban policy making, with reference to Germany, France and Benelux. The book covers urban planning in its broadest sense – from economic, socio-spatial, recreational, housing and transport perspectives.

Second Rank Cities in Europe Roberto Camagni, Roberta Capello, 2017-10-02 Second-rank cities are back on the academic scene, capturing the interest of scholars with their unexpected recent performance with respect to first-rank cities. Looking at the data on average urban GDP growth in 139 European cities since 1996, the relatively strong position of large cities (over 1.5 million inhabitants) on national growth coincides with the periods of fastest expansion, while at times of slowdown second-rank cities prevail. Especially in the recent period of economic downturn, second-rank cities have recorded annual GDP growth rates much less negative than those of capital cities; and in some European countries, like Austria and Germany, all cities have outperformed their capitals. In explaining this phenomenon, linking urban dynamics to agglomeration theories seems the most interesting approach. However, merely to link agglomeration economies to urban size in order to interpret urban performance is neither convincing nor sufficient, and it calls for additional investigation into how agglomeration economies work. This volume claims that interpretation of the current dynamics in European urban systems – especially in the western part of Europe – would

benefit from exploitation of the traditional concept of agglomeration economies. However, necessary for this purpose are more in-depth considerations on the nature, scope, intensity, and causes of agglomeration economies which do not relate their existence solely to urban size. And this is where the main challenge for scholars lies, in the interpretation of the missing link between agglomeration economies and urban dynamics. This book was originally published as a special issue of European Planning Studies.
