Business Today ,1996

Disability and Social Change Brian Watermeyer,2006 This powerful volume represents the broadest engagement with disability issues in South Africa yet. Themes include theoretical approaches to, and representations of, disability; governmental and civil society responses to disability issues; aspects of education as these pertain to the oppression/liberation of disabled people; social security for disabled people; the complex politics permeating service provision relationships; and a consideration of disability in relation to human spaces - physical, economic and philosophical. Firmly located within the social model of disability, this collection resonates powerfully with contemporary thinking and research in the disability field and sets a new benchmark for cutting-edge debates in a transforming South Africa.

Pediatric ENT John M. Graham,Glenis K. Scadding,Peter D. Bull,2007-09-07 This concise textbook covers all the practical and theoretical aspects necessary for those taking exams or wishing to update their knowledge of pediatric ENT medicine. The book is divided into sections covering rhinology, otology and head and neck problems. Uniformly structured chapters, written by internationally recognized experts in their fields, cover all relevant topics comprehensively and succinctly. The book includes more than 300 figures, almost half in color. This useful and reader-friendly textbook will be inspirational to young specialists with an interest in pediatric ENT, useful to those who are due to take their final exams, and informative for established specialists.

Advanced Procedures for Pain Management Sudhir Diwan,Timothy R Deer,2018-03-19 Edited by Sudhir Diwan, a former Director of Pain Medicine fellowship program at Ivy League Weill Cornell Medical College, and Timothy R. Deer, an internationally renowned expert in neuromodulation and minimally invasive spinal procedures, this atlas covers advanced procedures that normal residency and fellowship programs may not cover. It consolidates information pain fellows usually amass by traveling throughout the country to various specialized weekend courses. Advanced

Procedures for Interventional Pain Management: A Step-by-Step Atlas is for physicians that know the fundamentals of pain medicine and want to push their knowledge further. Through easy-to-digest bullet points, extensive diagrams, hundreds of figures, and expanded legends beneath each illustration, this compendium covers techniques such as fluoroscopic guidance and radiation safety, endoscopic transforaminal discectomy, endoscopic direct-percutaneous discectomy, transforaminal myelogram, percutaneous facet fusion, percutaneous sacroplasty, vertebral augmentations, percutaneous tumor ablation, percutaneous spinal fusion, minimally invasive spinal decompression (MILD), Interspinous Spacer Placement and advanced neuroaugmentation techniques like high frequency stimulation and DRG stimulation. This book also has a dedicated section on Regenerative Medicine with chapters on platelet rich plasma, stem cell therapy, and intradiscal regenerative therapy. Each chapter has a strict chapter format that includes the indications and contraindications for each procedure, a list of equipment and drugs, a step-by-step illustration-focused how-to, a list of possible post-procedural complications, and bullet-pointed clinical pearls and pitfalls. Within each chapter the authors will also cover the variations of each procedure due to different equipment. This book is ideal for pain medicine fellows, spine surgeons, and interventional pain physicians who want access to the best minds and specialized procedures in a single package.

The Last Half-Century Morris Janowitz,1978 The Last Half-Century represents the culmination of a lifetime of scholarship by Morris Janowitz. In this comprehensive and systematic analysis of the major trends in American society during the past fifty years, he probes the weakening of popular party affiliations and the increased inability of elected representatives to rule. Centering his work on the crucial concept of social control, Janowitz orders and assesses a vast amount of empirical research to clarify the failure of basic social institutions to resolve our chronic conflicts. For Janowitz, social control denotes a society's capacity to regulate itself within a moral framework that transcends simple self-interest. He poses urgent questions: Why has social control been so drastically weakened in our advanced industrial society? And what strategies can we use to strengthen it again? The explanation rests in part on the changes in social structure which make it more and more complicated for citizens to calculate their political self-interest. At the same time, complex economic and defense problems also strain an already overburdened legislative system, making effective, responsive political rule increasingly difficult. Janowitz concludes by assessing the response of the social sciences to the pressing problem of social control and asserts that new forms of citizen participation in the government must be found.
