I Died a Million Times Robert Miklitsch,2021-01-11 In the 1950s, the gangster movie and film noir crisscrossed to create gangster noir. Robert Miklitsch takes readers into this fascinating subgenre of films focused on crime syndicates, crooked cops, and capers. With the Senate's organized crime hearings and the brighter-than-bright myth of the American Dream as a backdrop, Miklitsch examines the style and history, and the production and cultural politics, of classic pictures from *The Big Heat* and *The Asphalt Jungle* to lesser-known gems like *711 Ocean Drive* and post-Fifties movies like *Ocean's Eleven*. Miklitsch pays particular attention to trademark leitmotifs including the individual versus the collective, the family as a locus of dissension and rapport, the real-world roots of the heist picture, and the syndicate as an octopus with its tentacles deep into law enforcement, corporate America, and government. If the memes of gangster noir remain prototypically dark, the look of the films becomes lighter and flatter, reflecting the influence of television and the realization that, under the cover of respectability, crime had moved from the underworld into the mainstream of contemporary everyday life.

Foundations of Dispute Resolution Carrie Menkel-Meadow, 2017-05-15 This volume brings together leading research articles in to the theory, research findings and applications of modern dispute resolution. The articles relate to a wide variety of settings and cover the primary processes of negotiation, mediation and arbitration, as well as exploring combinations and hybridization of those processes. Also included are articles on the search for 'value-added' or 'pie-expanding' creative solutions; the choosing of strategies, based on game theory, economics and social and cognitive psychology; how foundational theories have been altered or modified, depending on contexts, and numbers of parties and issues; and what issues are raised by the 'privatization of justice'. Civil Procedure Barbara Allen Babcock, Toni M. Massaro, Norman W. Spaulding, 2021-04-28 Civil Procedure: Cases and Problems, Seventh Edition by Barbara Allen Babcock, Toni M. Massaro, Norman W. Spaulding, and new co-author Myriam Gilles (the #5 most cited civil procedure scholar in the country) is the ideal casebook for the modern Civil Procedure course. With lightly-edited cases, both canonical and contemporary, and engaging hypothetical problems, the Seventh Edition of Civil Procedure: Cases and Problems promotes student understanding of modern procedure, the adversary system and alternatives, the relationship between substance and procedure, and systemic problems in access to justice. This casebook pioneered the “due process approach” to the study of procedure and is designed to create an inclusive learning environment, emphasizing the formative role of public interest litigation in modern procedural law and the voices of women and people of color in shaping the field in both practice and scholarship. It is the only major casebook on the market written by co-authors who together have received more than a dozen awards for excellence in teaching. New to the Seventh Edition: Shorter notes and materials after principal cases Updated cases and materials on personal and subject matter jurisdiction, plausibility pleading, affirmative defenses, the new proportionality requirement in discovery, and more Revised and expanded treatment of arbitration and ADR Revised and expanded treatment of MDL Revised and streamlined treatment of class action doctrine Revised and streamlined treatment of preclusion Professors and students will benefit from: Lightly-edited cases paired with thoughtful notes and questions. Concise examination of scholarship and empirical data bearing on various procedural rules Close attention to the underlying social and economic contexts in which the rules function with emphasis on the consequences for vulnerable populations Meaningful discussion of oft-marginalized topics, including: Alternative Dispute Resolution, Discovery (including e-discovery), Aggregate Litigation, Remedies, Adversary Ethics, and Trial Practice. Hypothetical problems presented in each chapter and revisited in later chapters to support in-class exercises and awareness of how phases of litigation influence each other. A casebook designed to create an inclusive classroom experience

Theoretical and Empirical Studies of Rights Laura Beth Nielsen, 2017-05-15 This important volume examines rights from an inter-disciplinary law and society perspective, beginning with the premise that the most basic functions of rights requires the empirical study of rights consciousness and claiming behavior. As such the volume includes articles and essays by political scientists, historians, lawyers, and sociologists which place the study

of ordinary citizens' understandings of rights, and what actions they take based on that knowledge, at the forefront of an empirical research agenda. This has important implications for law's capacity to achieve social change and can lead to better understanding of how rights can and should operate in a social and legal system. The volume is organized around the social movements and political processes which give rise to rights, the processes by which people come to understand they enjoy a right, the decision to invoke the right either formally or informally, and the organizational and institutional constraints and opportunities for exercising rights.
