The Mentality of Apes Wolfgang Köhler, 1925 This book contains the results of my studies in the intelligence of Apes at the Anthropoid Station in Tenerife from the years 1913-1917. The original, which appeared in 1917, has been out of print for some time. I have taken this opportunity of making a few changes in the critical and explanatory sections, and have added as an Appendix some general considerations on the Psychology of Chimpanzees. With various recent books and essays on the subject I shall have an opportunity of dealing in a further contribution to the subject not yet completed--Preface.

In the Shadow of Man Jane Goodall, 2000 The classic study of primates.

Through a Window Jane Goodall, 2010-04-07 The renowned British primatologist continues the “engrossing account” of her time among the chimpanzees of Gombe, Tanzania (Publishers Weekly). In her classic, *In the Shadow of Man*, Jane Goodall wrote of her first ten years at Gombe. In *Through a Window* she continues the story, painting a more complete and vivid portrait of our closest relatives. On the shores of Lake Tanganyika, Gombe is a community where the principal residents are chimpanzees. Through Goodall’s eyes we watch young Figan’s relentless rise to power and old Mike’s crushing defeat. We learn how one mother rears her children to succeed and another dooms hers to failure. We witness horrifying murders, touching moments of affection, joyous births, and wrenching deaths. As Goodall compellingly tells the story of this intimately intertwined community, we are shown human emotions stripped to their essence. In the mirror of chimpanzee life, we see ourselves reflected. “A humbling and exalting book . . . Ranks with the great scientific achievements of the twentieth century.” –The Washington Post “[An] absolutely smashing account . . . Thrilling, affectionate, intelligent—a classic.” –Kirkus Reviews, starred review

Tales of a Fourth Grade Nothing Judy Blume, 2011-12-01 Living with his little brother, Fudge, makes Peter Hatcher feel like a fourth grade nothing. Whether Fudge is throwing a temper tantrum in a shoe store, smearing smashed potatoes on walls at Hamburger Heaven, or scribbling all over Peter's homework, he's never far from trouble. He's a two-year-old terror who gets away with everything—and Peter's had enough. When Fudge walks off with Dribble, Peter's pet turtle, it's the last straw. Peter has put up with Fudge too long. How can he get his parents to pay attention to him for a change?

The Third Chimpanzee Jared M. Diamond, 2006-01-03 The Development of an Extraordinary Species We human beings share 98 percent of our genes with chimpanzees. Yet humans are the dominant species on the planet -- having founded civilizations and religions, developed intricate and diverse forms of communication, learned science, built cities, and created breathtaking works of art -- while chimps remain animals concerned primarily with the basic necessities of survival. What is it about that two percent difference in DNA that has created such a divergence between evolutionary cousins? In this fascinating, provocative, passionate, funny, endlessly entertaining work, renowned Pulitzer Prize-winning author and scientist Jared Diamond explores how the extraordinary human animal, in a remarkably short time, developed the capacity to rule the world . . . and the means to irrevocably destroy it.

The One and Only Ivan Katherine Applegate, 2012-01-17 The #1 New York Times bestselling and Newbery Award-winning novel *The One and Only Ivan* is now a major motion picture streaming on Disney+ This unforgettable novel from renowned author Katherine Applegate celebrates the transformative power of unexpected friendship. Inspired by the true story of a captive gorilla known as Ivan, this illustrated book is told from the point of view of Ivan himself. Having spent twenty-seven years behind the glass walls of his enclosure in a shopping mall, Ivan has grown accustomed to humans watching him. He hardly ever thinks about his life in the jungle. Instead, Ivan occupies himself with television, his friends Stella and Bob, and painting. But when he meets Ruby, a baby elephant taken from the wild, he is forced to see their home, and his art, through new eyes. In the tradition of timeless stories like *Charlotte's Web* and *Stuart Little*, Katherine Applegate blends humor and poignancy to create an unforgettable story of friendship, art, and hope. *The One and Only Ivan* features first-person narrative; author's use of literary devices (personification, imagery); and story elements (plot, character development, perspective). Edible Insects and Human Evolution Julie J. Lesnik, 2019-02-13 Researchers who study ancient human diets tend to focus on meat eating because the practice of butchery is very apparent in the archaeological record. In this volume, Julie Lesnik highlights a different food source, tracing evidence that humans and their hominin ancestors also consumed insects throughout the entire course of human evolution. Lesnik combines primatology, sociocultural anthropology, reproductive physiology, and paleoanthropology to examine the role of insects in the diets of hunter-gatherers and our nonhuman primate cousins. She posits that women would likely

spend more time foraging for and eating insects than men, arguing that this pattern is important to note because women are too often ignored in reconstructions of ancient human behavior. Because of the abundance of insects and the low risk of acquiring them, insects were a reliable food source that mothers used to feed their families over the past five million years. Although they are consumed worldwide to this day, insects are not usually considered food in Western societies. Tying together ancient history with our modern lives, Lesnik points out that insects are highly nutritious and a very sustainable protein alternative. She believes that if we accept that edible insects are a part of the human legacy, we may have new conversations about what is good to eat—both in past diets and for the future of food.

Born to Run Christopher McDougall, 2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

The Lost City of the Monkey God Douglas Preston, 2017-01-03 NAMED A NEW YORK TIMES NOTABLE BOOK OF 2017#1 New York Times and #1 Wall Street Journal bestseller! A five-hundred-year-old legend. An ancient curse. A stunning medical mystery. And a pioneering journey into the unknown heart of the world's densest jungle. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the Spanish invaders, and they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God—but then committed suicide without revealing its location. Three quarters of a century later, bestselling author Doug Preston joined a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling metropolis, tantalizing evidence of not just an undiscovered city but an enigmatic, lost civilization. Venturing into this raw, treacherous, but breathtakingly beautiful wilderness to confirm the discovery, Preston and the team battled torrential rains, quickmud, disease-carrying insects, jaguars, and deadly snakes. But it wasn't until they returned that tragedy struck: Preston and others found they had contracted in the ruins a horrifying, sometimes lethal-and incurable-disease. Suspenseful and shocking, filled with colorful history, hair-raising adventure, and dramatic twists of fortune, *THE LOST CITY OF THE MONKEY GOD* is the absolutely true, eyewitness account of one of the great discoveries of the twenty-first century.

Catherine and Laurence Anholt's Big Book of Families Catherine Anholt, Laurence Anholt, 2000-05 Packed with tales of families of every kind, this book is about big families and small families; busy families and noisy families; happy families and fighting families; and families at home and families on holiday. Whatever a family is like, it is featured in this book

Portnoy's Complaint Philip Roth, 1994-09-20 The groundbreaking novel from the Pulitzer Prize-winning author of *American Pastoral* that originally propelled its author to literary stardom: told in a continuous monologue from patient to psychoanalyst, this masterpiece draws us into the turbulent mind of one lust-ridden young Jewish bachelor named Alexander Portnoy. Deliciously funny...absurd and exuberant, wild and uproarious...a brilliantly vivid reading experience. —The New York Times Book Review Touching as well as hilariously lewd.... Roth is vibrantly talented. —New York Review of Books Portnoy's Complaint n. [after Alexander Portnoy (1933-)] A disorder in which strongly-felt ethical and altruistic impulses are perpetually warring with extreme sexual longings, often of a perverse nature. Spielvogel says: 'Acts of exhibitionism, voyeurism, fetishism, auto-eroticism and oral coitus are plentiful; as a consequence of the patient's morality, however, neither fantasy nor act issues in genuine sexual gratification, but rather in overriding feelings of shame and the dread of retribution, particularly in the form of castration.' (Spielvogel, O. *The Puzzled Penis*, *Internationale Zeitschrift für Psychoanalyse*, Vol. XXIV, p. 909.) It is believed by Spielvogel that many of the symptoms can be traced to the bonds obtaining in the mother-child relationship.

To Kill a Mockingbird Harper Lee, 2014-07-08 Voted America's Best-Loved Novel in PBS's *The Great American Read* Harper Lee's Pulitzer Prize-winning masterwork of honor and injustice in the deep South—and the heroism of one man in the face of blind and violent hatred One of the most cherished stories of all time, *To Kill a Mockingbird* has been translated into more than forty languages, sold more than forty million copies worldwide, served as the basis for an enormously popular motion picture, and was voted one of the best novels of the twentieth century by librarians across the country. A gripping, heart-wrenching, and wholly remarkable tale of coming-of-age in a South poisoned by virulent prejudice, it views a world of great beauty and savage inequities through the eyes of a young girl, as her father—a crusading local lawyer—risks everything to defend a black man unjustly accused of a terrible crime.

Ghond, the Hunter Dhan Gopal Mukerji, 1928 *Ghond the Hunter* focuses on the first fifteen years of the life of a boy, Ghond - his training as a hunter, the festivals, customs in which he participates and his keen observation of wildlife. Written in an engaging, often lyrical style, the story brings out the close relationship of humans and animals.
