Positional Games Dan Hefetz, Michael Krivelevich, Miloš Stojaković, Tibor Szabó, 2014-06-13 This text is based on a lecture course given by the authors in the framework of Oberwolfach Seminars at the Mathematisches Forschungsinstitut Oberwolfach in May, 2013. It is intended to serve as a thorough introduction to the rapidly developing field of positional games. This area constitutes an important branch of combinatorics, whose aim it is to systematically develop an extensive mathematical basis for a variety of two player perfect information games. These range from such popular games as Tic-Tac-Toe and Hex to purely abstract games played on graphs and hypergraphs. The subject of positional games is strongly related to several other branches of combinatorics such as Ramsey theory, extremal graph and set theory, and the probabilistic method. These notes cover a variety of topics in positional games, including both classical results and recent important developments. They are presented in an accessible way and are accompanied by exercises of varying difficulty, helping the reader to better understand the theory. The text will benefit both researchers and graduate students in combinatorics and adjacent fields.

Advances in Computer Games H. Jaap van den Herik, Hiroyuki Iida, Ernst A. Heinz, 2013-06-05 I feel privileged that the J(jh) Advances in Computer Games Conference (ACG 10) takes place in Graz, Styria, Austria. It is the first time that Austria acts as host country for this major event. The series of conferences started in Edinburgh, Scotland in 1975 and was then held four times in England, three times in The Netherlands, and once in Germany. The ACG-10 conference in Graz is special in that it is organised together with the 11th World Computer Chess Championship (WCCC), the 5th Computer

Olympiad (CO), and the European Union Youth Chess Championship. The 11th WCCC and ACG 10 take place in the Dom im Berg (Dome in the Mountain), a high-tech space with multimedia equipment, located in the Schlossberg, in the centre of the city. The help of many sponsors (large and small) is gratefully acknowledged. They will make the organisation of this conference a success. In particular, I would like to thank the European Union for designating Graz as the Cultural Capital of Europe 2003. There are 24 accepted contributions by participants from all over the world: Europe, Japan, USA, and Canada. The specific research results of the ACG 10 are expected to find their way to general applications. The results are described in the pages that follow. The international stature together with the technical importance of this conference reaffirms the mandate of the International Computer Games Association (ICGA) to represent the computer-games community.
