COSMIC SECRETS WOLFRAM SCHOMMERS,2012 We see objects in front of us, and experience a real material effect when we approach and touch them. Thus, we conclude that all objects are embedded in space and exist objectively. However, such experiences in everyday life cannot be transferred to the atomic level: within standard quantum theory, the material world is still embedded in space, but it no longer has an objective existence. How can objects be embedded in space without existing objectively? This book addresses this and similar issues in an illustrative and non-conventional way. Using up-to-date information, the following basic questions are contemplated: What is a particle, a quantum object? What can we say about the nature of time? How is reality, in particular the cosmos, formed? What is the influence of evolution on the discovery of new developments in this field? Like the philosophers Whitehead and Bergson, the primacy of process is advocated: we experience objects OCo both quantum objects and those we experience in everyday life OCo at certain positions in space, but everything is a matter of process and the existence of static objects in space is thus eliminated.

PRIMATE LATERALITY JEANNETTE P. WARD,WILLIAM D. HOPKINS,2012-12-06 This book arrays recent research on the neural and behavioral lateralization of the brain relying heavily on animal modes. The authors employ the comparative method to enhance our understanding of behavior, specifically through hand use and handedness by drawing comparisons with studies involving primates. Topics discussed include Patterns of lateralized behavior in prosimians; Behavioral lateralization in language-trained chimpanzees; Patterns of handedness: comparative study of nursery school children and captive gorillas; and Rotational behavior in children and adults. It is the first book of its kind devoted entirely to the question of behavioral asymmetries in all primates and thus presents a milestone as it recognizes the accumulating evidence of asymmetry and lateralized behavior in the non-human nervous system.
