**EW Minium**

**The Great Desert Race** Betty Baker, 1980 Driving a steam-powered car, two young women compete in the two-day Great Mountain to Desert Race at the turn of the century.

**Mating** Norman Rush, 1992-09-01 NATIONAL BOOK AWARD WINNER • Is love between equals possible? This modern classic is a delightful intellectual love story that explores the deepest canyons of romantic love even as it asks large questions about society, geopolitics, and the mystery of what men and women really want. “Luminous...Few books evoke the state of love at its apogee.” —The New York Times Book Review “The best rendering of erotic politics...since D.H. Lawrence...The voice of Rush’s narrator is immediate, instructive and endearing.” —The New York Review of Books The narrator of this splendidly expansive novel of high intellect and grand passion is an American anthropologist at loose ends in the South African republic of Botswana. She has a noble and exacting mind, a compelling waist, and a busted thesis project. She also has a yen for Nelson Denoon, a charismatic intellectual who is rumored to have founded a secretive and unorthodox utopian society in a remote corner of the Kalahari—one in which he is virtually the only man. What ensues is an exhilarating quest and

an exuberant comedy of manners: “A dryly comic love story about grown-up people who take the life of the mind seriously.”

Rising Elizabeth Rush,2018-06-12 A Pulitzer Prize Finalist, this powerful elegy for our disappearing coast “captures nature with precise words that almost amount to poetry” (The New York Times). Hailed as “the book on climate change and sea levels that was missing” (Chicago Tribune), Rising is both a highly original work of lyric reportage and a haunting meditation on how to let go of the places we love. With every record-breaking hurricane, it grows clearer that climate change is neither imagined nor distant—and that rising seas are transforming the coastline of the United States in irrevocable ways. In Rising, Elizabeth Rush guides readers through these dramatic changes, from the Gulf Coast to Miami, and from New York City to the Bay Area. For many of the

plants, animals, and humans in these places, the options are stark: retreat or perish. Rush sheds light on the unfolding crises through firsthand testimonials—a Staten Islander who lost her father during Sandy, the remaining holdouts of a Native American community on a drowning Isle de Jean Charles, a neighborhood in Pensacola settled by escaped slaves hundreds of years ago—woven together with profiles of wildlife biologists, activists, and other members of these vulnerable communities. **Bomb (Graphic Novel)** Steve Sheinkin,2023-01-24 A riveting graphic novel adaptation of the award-winning nonfiction book, *Bomb*—the fascinating and frightening true story of the creation behind the most destructive force that birthed the arms race and the Cold War. In December of 1938, a chemist in a German laboratory made a shocking discovery: When placed next to radioactive material, a Uranium atom split in two. That simple discovery launched a scientific race that spanned three continents. In Great Britain and the United States, Soviet spies worked their way into the scientific community; in Norway, a commando force

slipped behind enemy lines to attack German heavy-water manufacturing; and deep in the desert, one brilliant group of scientists was hidden away at a remote site at Los Alamos. This is the story of the plotting, the risk-taking, the deceit, and genius that created the world's most formidable weapon. This is the story of the atomic bomb. New York Times bestselling author Steve Sheinkin's award-winning nonfiction book is now available reimagined in the graphic novel format. Full color illustrations from Nick Bertozzi are detailed and enriched with the nonfiction expertise Nick brings to the story as a beloved artist, comic book writer, and commercial illustrator who has written a couple of his own historical graphic novels, including Shackleton and Lewis & Clark. Accessible, gripping, and educational, this new edition of Bomb is perfect for young readers and adults alike. Praise for Bomb (2012): “This superb and exciting work of nonfiction would be a fine tonic for any jaded adolescent who thinks history is ‘boring.’ It’s also an excellent primer for adult readers who may have forgotten, or never learned, the remarkable story of how nuclear weaponry was first imagined, invented and deployed—and of how an international arms race began well before there was such a thing as an atomic bomb.” —The Wall Street Journal “This

is edge-of-the seat material that will resonate with YAs who clamor for true spy stories, and it will undoubtedly engross a cross-market audience of adults who dozed through the World War II unit in high school.” —The Bulletin (starred review) Also by Steve Sheinkin:
