Why We Love and Exploit Animals Kristof Dhont,Gordon Hodson,2019-11-08 This unique book brings together research and theorizing on human-animal relations, animal advocacy, and the factors underlying exploitative attitudes and behaviors towards animals. Why do we both love and exploit animals? Assembling some of the world's leading academics and with insights and experiences gleaned from those on the front lines of animal advocacy, this pioneering collection breaks new ground, synthesizing scientific perspectives and empirical findings. The authors show the complexities and paradoxes in human-animal relations and reveal the factors shaping compassionate versus exploitative attitudes and behaviors towards animals. Exploring topical issues such as meat consumption, intensive farming, speciesism, and effective animal advocacy, this book demonstrates how we both value and devalue animals, how we can address animal suffering, and how our thinking about animals is connected to our thinking about human intergroup relations and the dehumanization of human groups. This is essential reading for students, scholars, and professionals in the social and behavioral sciences interested in human-animal relations, and will also strongly appeal to members of animal rights organizations, animal rights advocates, policy makers, and charity workers.

Insiders' Guide to North Carolina's Central Coast and New Bern Martha L. Hall,Tabbie Nance,2008-05 New Look for Insiders' Guide Series We've rolled-out a new design this year for the highly popular Insiders' Guide series. This acclaimed travel series that has sold more than a million copies boasts a new look, focusing on high-end photography of each book's subject. We've removed all text but the title from the cover, allowing for the cover photo to be the main focus. Each title's spine will feature bright bands of color representing the breadth of travel our readers enjoy, and making for a striking appearance when books in the series are shelved together. Look for this eye-catching redesign at a bookstore near you!

The Economics of Protected Marine Species: Concepts in Research and Management Kristy Wallmo,Kathryn Bisack,Daniel K. Lew,Dale E. Squires,2016-10-21 Protected marine species have populations that are depleted, decreasing, or are at-risk of extinction or local extirpation. As of 2015 The International Union for the Conservation of Nature, a global environmental organization, lists approximately 737 marine species worldwide that are considered at risk of extinction. Many are provided legal protection through national laws requiring research and management measures aimed at recovering and maintaining the species at a sustainable population level. Integral to the policy decision process involving the management and recovery of marine species is the consideration of trade-offs between the economic and ecological costs and benefits of protection. This suggests that economics, at its core the study of trade-offs, has a significant role. In the U.S. a somewhat traditional use of economics in protected species research and management has involved cost minimization or cost-effectiveness analyses to help select or prioritize conservation actions. Economic research has also provided estimates of public non-market benefits of recovering species, which can be used in larger management frameworks such as ecosystem based management and coastal and marine spatial planning. Inherent in much of this research, however, are complex biological and ecological relationships in which varying degrees of scientific uncertainty are present. Addressing this type of uncertainty can affect the economic outcomes related to protected species. For example, recent work suggests that increasing scientific precision in biological sampling and models can greatly affect the magnitude of economic benefits to commercial fisheries, while other research suggests that public non-market benefits of species recovery are sensitive to uncertainty about baseline population estimates. Previous research has illustrated the importance of understanding the biological, ecological, and economic aspects of protected species management and recovery. In this research topic we synthesize current protected marine species economic research and expand the discussion on present and future challenges related to protected species economics. The series of manuscripts brings together an array of prominent researchers and advances our understanding of the ecological and economic aspects of managing and recovering protected marine species.

Years ago, Mila went missing from a boat crash, and she has been raised by dolphins from the age of four. Researchers teach Mila language and music. But she also learns about rules and expectations, about locked doors and broken promises, disappointment and betrayal. The more Mila finds out about what it means to be human, the more she longs for her home in the ocean . . . “As moving as a sonnet, as eloquently structured as a bell curve, this book poignantly explores the most profound of themes—what it means to be human . . . All together, a frequently dazzling novel.” —Publishers Weekly (starred review) “Her mind and spirit shaped by the dolphins who raised her, a feral child views herself and her human captors from a decidedly unusual angle in this poignant story . . . A probing look at what makes us human, with an unforgettable protagonist.” —Kirkus Reviews “Mila’s rich inner voice makes her a lovely, lyrical character.” —VOYA Magazine
