CLANDESTINE PHOTOGRAPHY Raymond P. Siljander,Lance W. Juusola,2012-04-01 This book explains how to take surreptitious photographs and record video of people and property in a safe and effective manner while producing excellent results. It is the most comprehensive text on clandestine photography available. It takes the reader through conventional as well as the most sophisticated clandestine photography methods in practice today, and it covers the use of all types of equipment ranging from off-the-shelf to the most high-tech equipment available. The ultra-long-range night vision photography methods discussed in this book were devised by the authors and only exist here. Readers will discover esoteric techniques for photographically recording recognizable human and vehicle plate images from distances of over a mile in both daylight and night conditions. Myriad methods for secretly photographing people and property under diverse and difficult conditions are presented. Readers will discover innovative applications of combinations of old and new photographic-related technologies—some combined in unexpected ways that produce surprising results. It is written and extremely well illustrated in an easy to understand style for all photographers regardless of skill level. The book is appropriate for anyone in law enforcement, military operations, and private investigation. It will also benefit government surveillance specialists and those responsible for detecting and thwarting manual clandestine photography.

Train-the-trainer Video on the Deliberate Night Attack Jean L. Dyer,1998 This report summarizes a two-part video on preparing leaders to train their subordinate leaders and units for the platoon deliberate night attack as part of a rifle company. It integrates training principles dispersed throughout training and doctrine literature and Infantry leader courses. It shares lessons learned on training for night operations from the Joint Readiness Training Center and from experienced military leaders. Night and day photography illustrate the training sequence needed to master the individual and buddy team skills, battle drills, and situational training exercises that support the night attack. Training with night equipment, the multiple-integrated laser engagement system (MILES), and a realistic opposing force are stressed, as is leader planning and techniques to maximize training time. The video culminates with night attack training with MILES during the day and then at night, followed

by live-fire during the day and then at night. The video was shot at Ft. Bragg, NC with soldiers and leaders from the 82th Airborne Division. The photography was taken by the Marine Corps Combat Camera Unit.
