Features of Race Track Design Ed Bargy, 2014-10-03

This book was written by Ed Bargy with well over five decades experience in the motor racing field. Ed's first exposure to the race track was NASCAR dirt oval racing in upstate NY at the age of 9. Ed started motorcycle road racing in the sixties while stationed in the UK with the USAF. Ed has gone on to hold every position in the motorcycle road racing sport from a national level racer to senior national race official, race promoter and racing school founder/owner. Ed has seen firsthand what works and what does not work on the race track. Most road courses of today were primarily designed for automobile racing. The needs of the motorcycle road racer are seldom taken into account. A track can be designed to be totally safe for autos and still be extremely deadly for bike riders. Where, if a track is designed to be safe for bikes, it will also be totally safe for cars.

Spearhead of Logistics Benjamin King,Richard C.

Biggs,2016-02-25 Spearhead of Logistics is a narrative branch history of the U.S. Army's Transportation Corps, first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community. The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists. The newly established Transportation Corps, however, lasted for only a few years. Its significant utility for coordinating military transportation became again transparent during World War II, and it was resurrected in mid-1942 to meet the unparalleled logistical demands of fighting in distant theaters. Finally becoming a permanent branch in 1950, the Transportation Corps continued to demonstrate its capability of rapidly supporting U.S. Army operations in global theaters over the next fifty years. With useful lessons of high-quality support that validate the necessity of adequate transportation in a viable national defense posture, it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations. This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations, thus ensuring a continuing legacy of Transportation excellence within Army operations. Additionally, military science students and military historians may be interested in this volume.

Sports Illustrated ,1955

Kings of the Mountains Matt Rendell,2002 For the first time Matthew Rendell tells the little-known story of a Latin American country in which cycling is the national sport, whose sportsmen, denied the enormous benefits of prosperity, cutting-edge technology and unlimited sponsorship, have nevertheless achieved prodigious cycling feats both at home and abroad, and helped to forge for Colombia a heroic national identity. He tells of how, during the fifties, Colombia's own top cycle race, the Vuelta de Colombia, was still being held on dusty, unpaved roads - with consequentially ghastly accidents; of how the first top European cyclists who came to race in Colombia found themselves utterly vanquished by its endless mountain climbs; of how the biography of Colombia's first cycling superstar was written by Gabriel Garcia Marquez. Then, following the story through to the seventies and eighties, he shows how Colombia's cyclists began to make their mark abroad, even in the ultimate competition, the Tour de France - and, while they may have lacked the team discipline and the pace training to win the race itself, how to them the premier accolade was to become King of the Mountains, by beating everyone else in the Tour's most drainin

Born to Run Christopher McDougall,2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners

(and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.
