Deceptively Delicious Jessica Seinfeld,2009-10-06 It has become common knowledge that childhood obesity rates are increasing every year. But the rates continue to rise. And between busy work schedules and the inconvenient truth that kids simply refuse to eat vegetables and other healthy foods, how can average parents ensure their kids are getting the proper nutrition and avoiding bad eating habits? As a mother of three, Jessica Seinfeld can speak for all parents who struggle to feed their kids right and deal nightly with dinnertime fiascos. As she wages a personal war against sugars, packaged foods, and other nutritional saboteurs, she offers appetizing alternatives for parents who find themselves succumbing to the fastest and easiest (and least healthy) choices available to them. Her modus operandi? Her book is filled with traditional recipes that kids love, except they're stealthily packed with veggies hidden in them so kids don't even know! With the help of a nutritionist and a professional chef, Seinfeld has developed a month's worth of meals for kids of all ages that includes, for example, pureed cauliflower in mac and cheese, and kale in spaghetti and meatballs. She also provides revealing and humorous personal anecdotes, tear-out shopping guides to help parents zoom through the supermarket, and tips on how to deal with the kid that must have the latest sugar bomb cereal. But this book also contains much more than recipes and tips. By solving problems on a practical level for parents, Seinfeld addresses the big picture issues that surround childhood obesity and its long-term (and ruinous) effects on the body. With the help of a prominent nutritionist, her book provides parents with an arsenal of information related to kids' nutrition so parents understand why it's important to throw in a little avocado puree into their quesadillas. She discusses the critical importance of portion size, and the specific elements kids simply must have (as opposed to adults) in order to flourish now and in the future: protein, calcium, vitamins, and Omega 3 and 6 fats. Jessica Seinfeld's book is practical, easy-to-read, and a godsend for any parent that wants their kids to be healthy for a long time to come.

Breaking Vegan Jordan Younger,2015-11-01 Finding balance in life is a goal many of us strive to

achieve. Whether it's through a healthy diet, exercise regimen, state of mind, relationship, or other activity (or all of the above), we spend our days trying to be, and become, our best selves. But what happens when all that focus starts to dominate our lives? When our desire for perfect health trumps everything else, perhaps without us even realizing it? What happens when our solution starts becoming the problem? These are questions that author and popular blogger Jordan Younger faced when she decided that her extreme, plant-based lifestyle just wasn't working in favor of her health anymore--and questions that you may be facing too. In *Breaking Vegan*, Jordan reveals how obsessive healthy dieting eventually led her to a diagnosis of orthorexia, or a focus on healthy food that involves other emotional factors and ultimately becomes dysfunctional, even dangerous. In candid detail, Jordan shares what it was like to leave veganism, the downfall of her desire to achieve nutritional perfection, and how she ultimately found her way to recovery. In addition to this, Jordan outlines an anti-diet, whole-foods-based eating plan featuring more than 25 recipes to help inspire others to find similar balance in their own lives. *Breaking Vegan* is about tolerance and forgiveness. And ultimately, forging one's own path toward happiness.

Man’s Higher Consciousness Prof. Hilton Hotema, 2016-01-18 In this book, first published in 1962, Professor Hilton Hotema provides his insights into how we could all live longer by learning the body’s simple requirements of breathing fresh air, avoiding animal flesh, banning any cooked food, and by gradually lessening the amount of food consumed. Hotema firmly believes that breathing fresh air and

consuming organic fruits and natural organic liquids alone could extend our lives and also lays bare his secret that what kills at an early age is not the illusion of time, but rather overeating, breathing in toxic, unclean air, and elements such as electronic radiation, dirty electricity and medications. A must-read for any health-conscious individual.
