The Learning Game Ana Lorena Fábrega,2023-09-05 How did we conclude that the best way to prepare kids for the future is to cluster them into classrooms by age and grade, forcing them to learn the same things, at the same time and pace, seven hours a day, five days a week, for twelve years? We trust the school system to prepare our kids for the future. We get excited when they get good grades, or disappointed if they don't. But we rarely stop to question whether school is teaching our children the right things in the right way. Kids could get good at playing the game of school, but are they really learning? Teacher-turned-edupreneur Ana Lorena Fábrega, known by her students as Ms. Fab, invites us to rethink education. In *The Learning Game*, she reveals how traditional schooling has gone wrong, and proposes a series of actionable strategies to help kids learn. What if we guide kids to think for themselves? Should we encourage kids to take risks and tackle projects of their own? How do we help kids learn to love learning? Answering these questions and many more, *The Learning Game* will arm you with practical tools to design a new approach to learning—one that leaves behind the game of school and prepares your kids for the game of life.

Handbook of Research on Cross-Disciplinary Uses of Gamification in Organizations Bernardes, Oscar, Amorim, Vanessa, Moreira, António Carrizo, 2022-01-28 Gaming is increasingly prevalent in our society and everyday lives as a form of leisure or competition. The typical aim of gaming is to gain a pleasant experience from the game. Because of the saturation of gaming in global society, the gamification concept and its operationalization in non-gaming contexts has become a growing practice. This technological novelty is the basis for an innovative change in many types of environments such as education, commerce, marketing, work, health, governance, and sustainability, among others. The service sector especially has shown widespread adoption of the method as it seeks to increase and motivate audiences and promote brands. However, little research is available on the adoption of gamification in organizations, leading to a need for literature that investigates best practices for utilization and implementation. The Handbook of Research on Cross-Disciplinary Uses of Gamification in Organizations is a comprehensive and timely reference book that explores the field of gamification for economic and social development. This book provides dynamic research from this emerging field. Covering topics such as distance learning, health behaviors, and workplace training, this book is a valuable reference for researchers, marketing managers, students, managers, executives, software developers, IT specialists, technology developers, faculty of P-12 and higher education, teachers, professors, government officials, and academicians.

Stop Teaching Our Kids To Kill, Revised and Updated Edition Lt. Col. Dave Grossman, Gloria DeGaetano, 2014-08-05 Completely revised and updated, a much-needed call to action for every parent, teacher, and citizen to help our children and stop the wave of killing and violence gripping America's youth Newtown, Aurora, Virginia Tech, Columbine. There is no bigger or more important issue in America than youth violence. Kids, some as young as ten years old, take up arms with the intention to murder. Why is this happening? Lt. Col. Dave Grossman and Gloria DeGaetano believe the root cause is the steady diet of violent entertainment kids see on TV, in movies, and in the video games they play—witnessing hundreds of violent images a day. Offering incontrovertible evidence based on recent scientific studies and research, they posit that this media is not just conditioning children to be violent and see killing as acceptable but teaching them the mechanics of killing as well. *Stop Teaching Our Kids to Kill* supplies the statistics, interprets the copious research that exists on the subject, and suggests the many ways to make a difference in your home, at school, in your community, in the courts, and in the larger world. In using this book, parents, educators, social-service workers, youth advocates, and anyone interested in the welfare of our children will have a solid foundation for effective action and prevention of future Columbines, Jonesboros, and Newtowns.

Officer Buckle and Gloria Peggy Rathmann, 1995-09-28 Besides the beguiling story, the affable illustrations of the smiling Gloria, the accidental

mayhem in the background, and the myriad safety tips -- such as 'always pull the toothpick out of your sandwich' and 'never lick a stop sign in the winter' -- add to the enjoyment. A glorious picture book. -- The Horn Book
Rathmann is a quick rising star in the world of children's books. In this book, she again shows her flair for creating real characters, dramatic situations and for knowing what will make young audiences giggle and think. -- Children's Book Review Magazine
Rathman brings a lighter-than-air comic touch to this outstanding, solid-as-a-brick picture book. -- Publisher's Weekly
A five-star performance. -- School Library Journal

I Want to Be a Police Officer Dan Liebman, 2000-03-04 Provides a simple introduction to the work that police do, their equipment and gear, and other aspects of an officer's life.

When I Grow Up I Want to be a Police Officer Julie G Fox, 2020-07-29 'When I Grow Up I Want to be a Police Officer' is an activity book which is an entertaining (lots of colouring, dot-to-dot, puzzles and word searches) as useful, as it introduces the preschoolers and primary school pupils to the profession of a police officer. I came up with an idea for this book when I was cared for by wonderfully supportive police officers and detectives from the local police department in the summer of 2020. My children by then were adults, but I imagined if they were much younger, they would've struggled to keep themselves busy while their parents were interviewed by officers and detectives for a couple of hours. And the idea of police officers and detectives always carrying a few of such activity books as well as a few packs of crayons in their car came about. And of course, this activity book is not just for emergencies. Introducing the little ones to the noble profession of a police officer at a young age just might help fill the ranks of our police with a few more caring and brave young men and women. So grab your copy and enjoy a couple of entertaining and useful hours with your youngster learning

everything about the police officers, their equipment and their essential job.

Acting Out! Rae Pica,2020-01-07 Movement is not misbehavior! Current policies in the early childhood field ask teachers to treat children as though they exist from the neck up—even though research clearly demonstrates that the mind-body connection is vital to development. Rae Pica, founder and director of Rae Pica Keynotes & Consulting and author of the Moving and Learning series, advocates for active learning, not only because it's

developmentally appropriate but because doing so promotes a calmer, friendlier, and less challenging learning environment. Section I provides theory, research, and language to advocate for active learning. Section II offers suggestions on how to update learning environments, and Rae offers some of her own past missteps in hopes that readers will be able to learn from her mistakes. Section III contains 200 ready-to-use movement activities that can be easily implemented into the day. Most require no materials, and every activity includes a “Curriculum Connection,” so readers can understand and clearly explain why the children aren’t “just playing.”
