American Animated Cartoons of the Vietnam Era Christopher P. Lehman, 2014-01-10 In the first four years of U.S. involvement in the Vietnam War (1961-64), Hollywood did not dramatize the current military conflict but rather romanticized earlier ones. Cartoons reflected only previous trends in U.S. culture, and animators comically but patriotically remembered the Revolutionary War, the Civil War, and both World Wars. In the early years of military escalation in Vietnam, Hollywood was simply not ready to illustrate America's contemporary radicalism and race relations in live-action or animated films. But this trend changed when US participation dramatically increased between 1965 and 1968. In the year of the Tet Offensive and the killings of the Rev. Martin Luther King, Jr., and Senator Robert Kennedy, the violence of the Vietnam War era caught up with animators. This book discusses the evolution of U.S. animation from militaristic and violent to liberal and pacifist and the role of the Vietnam War in this development. The book chronologically documents theatrical and television cartoon studios' changing responses to U.S. participation in the Vietnam War between 1961 and 1973, using as evidence the array of artistic commentary about the federal government, the armed forces, the draft, peace negotiations, the counterculture movement, racial issues, and pacifism produced during this period. The study further reveals the extent to which cartoon violence served as a barometer of national sentiment on Vietnam. When many Americans supported the war in the 1960s, scenes of bombings and gunfire were prevalent in animated films. As Americans began to favor withdrawal, militaristic images disappeared from the cartoon. Soon animated cartoons would serve as enlightening artifacts of Vietnam War-era ideology. In addition to the assessment of primary film materials, this book draws upon interviews with people involved in the production Vietnam-era films. Film critics responding in their newspaper columns to the era's innovative cartoon sociopolitical commentary also serve as invaluable references. Three informative appendices contribute to the work.

**Muscles in the Movies** John D. Fair, David L. Chapman, 2020-11-16 John Fair and David Chapman tell the story of how filmmakers use and manipulate the appearance and performances of muscular men and women to enhance the appeal of their productions. The authors show how this practice, deeply rooted in western epistemological traditions, evolved from the art of photography through magic lantern and stage shows into the motion picture industry, arguing that the sight of muscles in action induced a higher degree of viewer entertainment. From Eugen Sandow to Dwayne "The Rock" Johnson, muscular actors appear capable of performing the miraculous, and with the aid of stuntmen and filming contrivances, they do. By such means, muscles are used to perfect the art of illusion, inherent in movie-making from its earliest days.

Popeye the Sailor: The 1960s TV Cartoons Fred M. Grandinetti, 2022-02-28 Following the surprising popularity of the theatrical Popeye cartoons on television in the mid-1950s, King Features Syndicate quickly went into production on new made-for-TV cartoons to capitalize on that success. Under the supervision of Producer Al Brodax, 220 new cartoons were created by six different animation studios, including one overseen by former Disney animator Jack Kinney, and Paramount Cartoon Studios (whose staff had worked on the theatrical Popeye cartoons). They appeared on television beginning in 1960. Many of these cartoons featured excellent (though limited) animation, imaginative storytelling, and even occasional self-referential humor. Several stories were adapted from E.C. Segar's Thimble Theatre newspaper comics, and characters that had first appeared there (such as The Sea Hag, and Alice the Goon) would make their animation debut. The best-known voice artists from the theatrical Popeye cartoons – Jack Mercer, Mae Questel, and Jackson Beck (now playing Brutus, instead of Bluto) – each reprised their roles. However, several of these cartoons were poorly animated, with errors and inconsistent character designs, and too reliant on reused animation. This has given the series a reputation – perhaps unfairly – of poor quality. While casting a critical eye, this book will encourage appreciation of the better films of the series. These new made-for-TV Popeye cartoons were a terrific success and continued to appear on television for more than 30 years. They remain a beloved memory of childhood TV viewing.

**Art vs. TV** Francesco Spampinato, 2021-12-02 While highlighting the prevailing role of television in Western societies, Art vs. TV maps and condenses a comprehensive history of the relationships of art and television. With a particular focus on the link between reality and representation, Francesco Spampinato analyzes video art works, installations, performances, interventions and television programs made by contemporary artists as forms of resistance to and appropriation and parody of mainstream television. The artists discussed belong to different generations: those that emerged in the 1960s in association with art movements such as Pop Art, Fluxus and Happening; and those appearing on the scene in the 1980s, whose work aimed at deconstructing media representation in line with postmodernist theories; to those arriving in the 2000s, an era in which, through reality shows and the Internet, anybody could potentially become a media personality; and finally those active in the 2010s, whose work reflects on how old media like television has definitively vaporized through the electronic highways of cyberspace. These works and phenomena elicit a tension between art and television, exposing an incongruence; an impossibility not only to converge but at the very least to open up a dialogical exchange.
