Generation Deluxe Iris Nowell,2004-06-28 They fork out 100 million for starter castles, 500,000 for a customized Mercedes, and 1.2 million for a watch. While Generation Deluxe explores the spending patterns of the wealthy, a dark underside emerges: excessive consumerism is creating serious damage to the environment and human life. Simultaneously, the super-rich - and celebrities - are raising awareness and spending multi-millions cleaning up the damage and, as never before, funding solutions to global problems of poverty, hunger, and disease prevention.

Tourist Guide Book of Sundarbans Joydeb Das,2015-05-02 The tourists of Sundarbans including the researchers are always interested to know more about the unknown fact with regard to the people of these amazing forests and tiger-land of Sundarbans, their daily struggle for survival, their cultural heritage and also about the forests and wild life in particular. But, hardly they find all the information available to their satisfaction and need. Obviously, at the end of their journey over Sundarbans the tourists or the researchers get disappointed. On the other hand, it's true that the numerous and vast islands of Sundarbans located at the remotest corners of Sundarban delta hold certain historical, ecological and anthropological background which are still untold or even unexplored. Hence, It is also equally essential to bring about all these hidden treasure of information attached to this unique 'world heritage site' to the knowledge of all concerned, tourists and foreigners as well. A continual & detailed search over a period of last 18 years conducted through the Indian and Bangladesh parts of Sundarbans on the various aspects/issues could reveal probably a part of such untold and unexplored treasure of information. As a result, the proposed Hand Book or the Tourist Guide will surely provide a fair idea to the tourists, foreigners and researchers about the most fascinating subject matters of different aspects of Sundarbans concerning history, people, life, wild life and mangrove-brackish water-marine ecology of Sundarbans through informative as well as vivid pictorial presentation.

Beauty and the Beast Peter Raven,Ileene Anderson,Genevieve Arnold,Ryan Burnett,Kitty Connolly,José Gonzáles,Mary Ellen Hannibal,Kenna Kuhn,Robin Wall Kimmerer,Margaret Leinen,Gordon Leppig,Amber Pairis,Will Rogers,Erin Schrode,Douglas W. Tallamy,Wendy Tokuda,Susan J. Tweit,2020 Beauty and the Beast: California Wildflowers and Climate Change is a 12 x 12'' beautifully illustrated and designed 264 page coffee table book created by conservation photographers Rob Badger and Nita Winter.Illustrations: 190 stunning images of California's diverse wildflowers and their habitats, from high mountain passes in the Sierra Nevada mountains to below sea level in Death Valley National Park.Essays: Sixteen talented and diverse authors and scientists, most of whom are women, wrote 18 storytelling style essays (1,200 to 1,800 words) about nature, conservation, climate change or taking action. The two younger authors write about hope and action, and what people can do to help create positive change. The book has three sections: The Gift of Beauty, The Human Connection and Ensuring the Future.Because people are constantly hearing about all the negative things going on in the world, Nita and Rob believed there was a need for a different, softer approach to grab people's attention and center it on the climate-change story, and conservation and population issues. They engage their audiences by first inviting them to experience the splendor of the natural world

through a universal symbol of beauty, the wildflower, and then educate and inspire them to take some of the simple actions they provide to create positive change and a healthier planet. Their goal is to spread conservation and climate change ideas far beyond native plant and nature lovers, and to plant the seeds to foster action. Beauty and the Beast is a 27 year photographic journey into the public lands of California. Lands we all own, lands under constant threat of development or resource extraction, impacts of global warming, sea level rise and wildfires. This book is as much a treasure as the flowers and creatures which are featured within its pages. Nita and Rob extend a hand to you to come in and take a long, slow look around and see what they have seen, experienced and have learned. Book includes two comprehensive indexes and a glossary.
