*Marketing Research: Asia-Pacific Edition* Steve D'Alessandro, Ben Lowe, Hume Winzar, William Zikmund, Barry J. Babin, 2017-01-01 Marketing Research 4th Asia-Pacific edition continues to equip students with the knowledge and skills required to successfully undertake marketing research. Combining a solid theoretical foundation with a practical, step-by-step approach, the marketing research process is explored through a learning model that is constantly reinforced throughout the text. Using a raft of contemporary local and international examples, data sets and case studies to explain traditional marketing research methods, Marketing Research also examines new theories and techniques. To reflect emerging industry practices, each stage of research reporting is detailed, as well as a range of presentation methodologies. This edition of Marketing Research continues to integrate Qualtrics, a robust and easy-to-use online survey tool that provides students with a platform for designing, distributing and evaluating survey results, to strengthen its 'learning by doing' approach. For analysing data, the text covers both SPSS and EXCEL outputs. This text is indispensable for students studying marketing research in any business or marketing course.

*Forage Crops of the World, Volume II: Minor Forage Crops* Md. Hedayetullah, Parveen Zaman, 2018-09-05 This book, the second of two volumes, discusses the importance of fodder production of the minor fodder crops for animals. It focuses on 25 minor forage crops, including non-leguminous perennial forages, leguminous forages, and non-graminaceous forages. It discusses crop production methodology and agronomic management in a systemic way, providing an abundance of information on each type of forage crop discussed, including preferred soil type, land capability, cropping patterns, climate, and socioeconomic conditions. It goes on to address pests, disease management, agroforestry in fodder and forage crops, preservation, and production and climate change. This volume provides valuable information needed for effective forage crop production and management. The book, with chapters from highly qualified scientists, will be a rich

resource for researchers, academicians, students, and those in the industry. Forage Crops of the World, Volume I: Major Forage Crops focuses on major forage crops. Key features: • Discusses 25 different types of minor forage crops, including many types of grasses and other plants • Provides information on agronomic production practices • Covers pest and disease management practices for forage crops

**The Gold Coast Transformed** Tor Hundloe, Bridgette McDougall, Craig

Page, 2015-03-23 The Gold Coast is one of Australia's premier tourism destinations, a city cut out of coastal vegetation, including paperbark swamps, mangroves and rainforests of worldwide significance. The Gold Coast Transformed is a collection of integrated chapters identifying and assessing the environmental impacts of the building of Australia's sixth largest city. From the time of the first timber-getters through to the present, the book traces the cumulative impacts of humans on the now World Heritage-listed rainforest and surrounding ecosystems. The city's natural and engineered environments are both fascinating and vulnerable. The construction of massive high-rise apartment blocks, on what were frontal beach dunes, is one of the fundamental mistakes not to be repeated. The book illustrates how and why major environmentally destructive development took place and discusses the impacts of such development on the Gold Coast's beaches, wildlife, and terrestrial and marine environments, such as the destruction of riparian mangrove forest. The Gold Coast Transformed also shows the possibility of sustaining natural populations and reducing the city's ecological footprint. It will be of interest to ecologists, environmental scientists and managers, town planners, economists, policymakers and the general public.
