The Family Under the Bridge Natalie Savage Carlson, 1989-02-15 This is the delightfully warm and enjoyable story of an old Parisian named Armand, who relished his solitary life. Children, he said, were like starlings, and one was better off without them. But the children who lived under the bridge recognized a true friend when they met one, even if the friend seemed a trifle unwilling at the start. And it did not take Armand very long to realize that he had gotten himself ready-made family; one that he loved with all his heart, and one for whom he would have to find a better home than the bridge. Armand and the children's adventures around Paris -- complete with gypsies and a Santa Claus -- make a story which children will treasure.

Be the Bridge Latasha Morrison, 2019-10-15 NEW YORK TIMES BESTSELLER • ECPA BESTSELLER • "When it comes to the intersection of race, privilege, justice, and the church, Tasha is without question my best teacher. Be the Bridge is THE tool I wish to put in every set of hands."—Jen Hatmaker WINNER OF THE CHRISTIAN BOOK AWARD® • Winner of the Christianity Today Book Award • A leading advocate for racial reconciliation calls Christians to move toward deeper understanding in the midst of a divisive culture. In an era where we seem to be increasingly divided along racial lines, many are hesitant to step into the gap, fearful of saying or doing the wrong thing. At times the silence, particularly within the church, seems deafening. But change begins with an honest conversation among a group of Christians willing to give a voice to unspoken hurts, hidden fears, and mounting tensions. These ongoing dialogues have formed the foundation of a global movement called Be the Bridge—a nonprofit organization whose goal is to equip the church to have a distinctive and transformative response to racism and racial division. In this perspective-shifting book, founder Latasha Morrison shows how you can participate in this incredible work and replicate it in your own community. With conviction and grace, she examines

the historical complexities of racism. She expertly applies biblical principles, such as lamentation, confession, and forgiveness, to lay the framework for restoration. Along with prayers, discussion questions, and other resources to enhance group engagement, *Be the Bridge* presents a compelling vision of what it means for every follower of Jesus to become a bridge builder—committed to pursuing justice and racial unity in light of the gospel.

Understanding by Design Grant P. Wiggins, Jay McTighe, 2005 What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

The Best We Could Do Thi Bui,2017-03-07 National bestseller 2017 National Book Critics Circle (NBCC) Finalist ABA Indies Introduce Winter / Spring 2017 Selection Barnes & Noble Discover Great New Writers Spring 2017 Selection ALA 2018 Notable Books Selection An intimate and poignant graphic novel portraying one family's journey from war-torn Vietnam, from debut author Thi Bui. This beautifully illustrated and emotional story is an evocative memoir about the search for a better future and a longing for the past. Exploring the anguish of immigration and the lasting effects that displacement has on a child and her family, Bui documents the story of her family's daring escape after the fall of South Vietnam in the 1970s, and the difficulties they faced building new lives for themselves. At the heart of Bui's story is a universal struggle: While adjusting to life as a first-time mother, she ultimately discovers what it means to be a parent—the endless sacrifices, the unnoticed gestures, and the depths of unspoken love. Despite how impossible it seems to take on the simultaneous roles of both parent and child, Bui pushes through. With haunting, poetic writing and breathtaking art, she examines the strength of family, the importance of identity, and the meaning of home. In what Pulitzer Prize-winning novelist Viet Thanh Nguyen calls "a book to break your heart and heal it," The Best We Could Do brings to life Thi Bui's journey of understanding, and provides inspiration to all of those who search for a better future while longing for a simpler past.

Routledge Handbook of University-Community Partnerships in Planning Education Megan E. Heim LaFrombois,Jay Mittal,2023-10-11 This handbook explores two guiding questions – how can university-community partnerships in planning education work, and how can they be transformative? University-community partnerships – often referred to as service-learning or community-engaged teaching and learning – are traditionally based on a collaborative relationship between an academic partner and a community-based partner, in which students from the academic partner work within the community on a project. Transformational approaches to university-community partnerships are approaches that develop and sustain mutually beneficial collaborations where knowledge is co-created and new ways of knowing and doing are discovered. This edited volume examines a variety of university-community partnerships in planning education, from a number of different perspectives, with a focus on transformative models. The authors explore

broader theoretical issues, including topics relating to pedagogy, planning theory, and curriculum; along with more practical topics relating to best practices, logistics, institutional support, outcome measures, and the various forms these partnerships can take – all through an array of case studies. The authors, which include academics, professional practitioners, academic practitioners, and students, bring an incredible depth and breadth of knowledge and experience from across the globe – Australia, Canada, Chile, Europe (including Germany, Spain, Slovakia, and Sweden), India, Jamaica, South Korea, and the United States.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
