Structures or Why things don't fall down J. Gordon, 2012-12-06 I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures. Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called 'elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to *The New Science of Strong Materials* it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P. Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness.

Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge - especially for discussions about biomechanics which extended over a period of nearly thirty years. Lastly, for reasons which must surely be obvious, I owe a humble oblation to Herodotus, once a citizen of Halicamassus.

Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • “A fascinating look at how consumers perceive logos, ads, commercials, brands, and products.”—Time How much do we know about why we buy? What truly influences our decisions in today’s message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell?

• Does subliminal advertising still surround us? • Can “cool” brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Brutified Robert Benefiel, 2020-11-27 Brutified is a collection of poetry written by the author Robert Benefiel. The poems contained within it are from a larger cache of poems written in 2019. The pieces themselves range from narrative to abstract, bibliographical to fictionalized, allowing for a fuller range of expression and voice. What each piece carries is the idea of surviving the brutality of the world, others, and even one's self, in hopes of gaining insight and retaining one's compassion. Whether the piece is addressing the idea of

finding one's own art at a junk store, or stumbling across a love note written before, but after, a lover has left them, or even watching a young midget be chased through the mall, the author never ceases to try and present the emotion and meaning at the core of each piece in a blatant yet subtle way.

A Generation of Sociopaths Bruce Cannon Gibney, 2017-03-07 In his remarkable (Men's Journal) and controversial (Fortune) book -- written in a wry, amusing style (The Guardian) -- Bruce Cannon Gibney shows how America was hijacked by the Boomers, a generation whose reckless self-indulgence degraded the foundations of American prosperity. In A Generation of Sociopaths, Gibney examines the disastrous policies of the most powerful generation in modern history, showing how the Boomers ruthlessly enriched themselves at the expense of future generations. Acting without empathy, prudence, or respect for facts--acting, in other words, as sociopaths--the Boomers turned American dynamism into stagnation, inequality, and bipartisan fiasco. The Boomers have set a time bomb for the 2030s, when damage to Social Security, public finances, and the environment will become catastrophic and possibly irreversible--and when, not coincidentally, Boomers will be dying off. Gibney argues that younger generations have a fleeting window to hold the Boomers accountable and begin restoring America.

The Most Difficult Revolution Alice Hanson Cook, Val R. Lorwin, Arlene K. Daniels, 2019-06-07 Over half the women in the United States are now employed outside the home, and the proportions are comparable in many European countries. Yet nowhere has this revolution in the composition of the labor force been followed by the triumph of a

more difficult revolution—the struggle for full equality in the rights and roles of women. Building upon research begun by the late Val R. Lorwin and Alice H. Cook, Cook and Arlene Kaplan Daniels survey recent efforts of trade unions in Germany, Austria, Sweden, and Great Britain to ensure equal opportunity in the workplace. In identifying the successes and setbacks of the European experience, the authors consider the implications for change in the agendas of American unions. Cook and Daniels show how unions in the countries studied have promoted women's equality through the channels of internal policy, collective bargaining, and political influence. They provide rich cross-cultural comparisons of patterns of government involvement, the extent of women's participation in the unions, education of women for union leadership, access to vocational training, pay equity, the conditions of part-time work, and workplace health and safety concerns. *The Most Difficult Revolution* will be a vital resource for comparatists in the fields of women's studies, labor studies, political science, anthropology, sociology, and economics.

Salt Sugar Smoke Diana Henry, 2016-11-03 This comprehensive book takes a fresh look at preserving, offering all the basic information you need, but also featuring inspirational recipes from the store cupboards of the world. It covers everything from jams to cures, and shows you that you don't have to have lots of kit and produce to make delicious preserves - or wait forever before eating them. There are sections filled with expert advice on choosing ingredients and cooking every type of preserve, from marmalades to jellies to relishes to foods preserved in oil. All the classic recipes are included and Diana often gives tips for how to make a version of a classic that suits your palette. For example, she includes a sweet and sticky strawberry jam, a more-fruity and

less sweet version, and a Swedish 'nearly' strawberry jam (which is more like a conserve and keeps in the fridge for only a couple of weeks). But this is also a treasure trove of recipes taken from the world's store cupboards. And most of them are luxuries that can be made from cheap ingredients - such as Thai spiced rhubarb relish, Alsace pear and Riesling jam and tea-smoked trout. Many recipes will also offer alternative ingredients - for example, make sloe gin with cranberries or plums.
