Dietmar Kopitz, Bev Marks

RDS, the Radio Data System Dietmar Kopitz, Bev Marks, 1999 Authored by two leading experts in Radio Data System (RDS) technology, this book provides easy access to information on RDS technology, specifications, and implementation in one authoritative reference. The authors, who are key figures in the development of RDS and RDS-TMC technology, use a step-by-step approach to overview the background, techniques, capabilities, and limits of these systems.

Riot Control Vehicles Chris McNab, 2015-02-20 Fully illustrated with a mixture of dramatic archive photos and manufacturers' images, this volume covers the little-known history of riot control vehicles. It explores the world of these vehicles from 1945 through to the present day - from adapted military armoured cars such as the Humber Pig (UK) and BRDM (Soviet Union) to the fully computerized systems of the Russian Lavina-Uragan and Canadian INKAS Armored Riot Control Vehicle - showing how their development and deployment has blurred the lines between civilian actions and military operations. It charts how the vehicles have evolved in terms of technology and layout, and also details how the associated weapon systems have been refined over time, from water cannon and tear gas launchers to subsonic sound waves and microwave energy. The operational history of the vehicles is explained in the dramatic context of major incidents across the world, from the streets of Northern Ireland and Eastern Europe to the favelas of Brazil and the battlegrounds of Iraq.

US World War II Parachute Infantry Regiments Gordon L. Rottman, 2014-01-20
The parachute infantry regiments were among the most highly decorated US Army units of World War II, and between them they saw action right across the world. The elite nature of these units led to them being committed to action not only in the way that had been intended; their quality tempted commanders to keep them in the line longer than their light armament justified, and they were tested to the limit. This engaging study traces the story of each of the 17 regiments, from their creation and training in the USA, through their deployments overseas, to their combat jumps and all their battles. The book is illustrated with wartime photographs, many previously unpublished, and eight full-colour plates detailing the specifics of their uniforms, insignia, and equipment practices, which often differed from unit to unit.

Office of Strategic Services 1942-45 Eugene Liptak, 2013-02-20 The Office of Strategic Services, the forerunner of the CIA, was founded in 1942 by William 'Wild Bill' Donovan under the direction of President Roosevelt. Agents were enlisted from both the armed services and civilians to produce operational groups specialising in different foreign areas including Italy, Norway, Yugoslavia and China. In 1944 the number of men and women working in the

service totalled nearly 13,500. This intriguing story of the origins and development of the American espionage forces covers all of the different departments involved, with a particular emphasis on the courageous teams operating in the field. The volume is illustrated with many photographs, including images from the film director John Ford who led the OSS Photographic Unit and parachuted into Burma in 1943.

Fiat CR.42 Aces of World War 2 Håkan Gustavsson, Ludovico Slongo, 2013-02-20 The Fiat CR.42, a logical development of the Fiat CR.32, was the last single-seat fighter biplane to be produced. It entered service with the Italian Regia Aeronautica in May 1939 before being exported to Belgium, Hungary and Sweden. Its combat debut came when the Belgian air force threw its fleet into action during the German invasion of the Low Countries on 10th May 1940. Despite being quickly overwhelmed, the Belgian pilots managed to make a number of aerial claims. The CR.42 became heavily involved in the fighting in North Africa and although it was gradually replaced by more modern fighters, it continued in a point defence and ground support role until the end of the war. Drawing on research from a range of sources, this book examines the extensive employment of the Italian fighter plane during the course of World War II.

The Bay of Pigs Alejandro de Quesada, 2011-03-15 The landings by the Cuban exile Assault Brigade 2506 at the Bay of Pigs on April 17, 1961 led to three days of savage but unequal combat. Before they even sailed for Cuba, a White House decision had condemned them to constant attacks by Castro's air force, which sank two of their ships loaded with vital supplies and equipment. Despite stubborn resistance to Castro's troops and tanks, and heroic sorties by Cuban and American B-26 pilots, the Brigade was strangled for lack of

firepower and ammunition. Their story is illustrated with rare photos from Brigade veterans, and detailed color plates of the uniforms and insignia of both sides.
