EcoDesign for Sustainable Products, Services and Social Systems II Shinichi Fukushige,

The EU Eco-industry's Export Potential ,2000 Eco-industries are activities which produce goods and services to measure, prevent, limit, minimise or correct environmental damage to water, air and soil, as well as problems related to waste, noise and eco-systems. This includes cleaner technologies, products and services which reduce environmental risk and minimise resource use. This study aims to identify the size and character of EU eco-industry exports; assess the current extent of these exports; examine future export opportunities; and develop recommendations for policy instruments to promote future exports, and associated employment and competitiveness.

Ecodesign Alastair Fuad-Luke,2002-04 Alas, environmentally friendly design hasn't always meant high style. Confronting that challenge head on, ecoDesign lists well over 500 consumer products for those who seek design that's not only beautiful and useful, but also has minimal impact on the earth. Some of these pieces—from clothing to kitchenware, electronics, furniture, and much, much more—have already become classics. But this remarkable sourcebook also guides readers to undiscovered gems and handcrafted objects from artisanal studios. Detailed illustrated entries describe the products themselves, while an extensive reference section defines these new and hybrid materials and provides information on manufacturers, design studios, green organizations, and a further reading list. ecoDesign is the total resource guide for a new generation of contemporary design.

Buying into the Environment Christoph Erdmenger,2017-09-08 Green purchasing - or eco-procurement - by local and central governments has long been recommended in documents such as Agenda 21 to be a key - although sometimes supplemental-ingredient in the achievement of more environmentally responsible economies. Certainly, sustainable consumption cannot be considered a realistic goal without the full engagement of public authorities. Many initiatives have been undertaken in OECD countries, most successfully in Japan and Denmark where green public purchasing has been proven to be workable and highly effective, while, in other countries, city municipalities have successfully pioneered the development of sophisticated public environmental purchasing policies. However, for the vast majority of countries and their major cities, the potential for green public purchasing remains woefully untapped. A key question is what would be the environmental impact if the majority of cities in Europe replicated the success stories of those leading the way? Public procurement has, after all, been an important tool in achieving other public policy goals such as defence. Why should it not be used as a tool to defend the environment? The RELIEF project, funded by the EU's City of Tomorrow and Cultural Heritage programme was established to answer exactly this question: to define the true potential of eco-procurement and to develop a strategy for change in Europe. Buying into the Environment is the result of the research segment of the project which has now been completed. A further stage—to design a Europe-wide action plan will follow in 2004. The book, organised under the auspices of the International Council on Local Environmental Initiatives (ICLEI) analyses national approaches already tested, and provides in-depth surveys on the pioneer cities such as Hamburg, Malmö and Zurich. Serious attention is given to city-specific hurdles which have been faced and overcome. The most relevant product groups for eco-procurement such as construction, transport, energy, information technology, furniture and food. are also analysed. Uniquely, the book also provides calculations on the environmental benefits potentially achievable through greener purchasing. Tools were developed and tested by the RELIEF researchers on the environmental assessment of products, public buying power and on evaluations of market conditions in order to provide scenarios for the application of green purchasing at a European level. The conclusions are that there is huge potential for both local and central governments to adapt their behaviour patterns and purchase in a more environmentally responsible way. For example, 18% of the EU's Kyoto Protocol commitment could be achieved if major cities in the European Union purchased green electricity. The results are complemented by new ideas on how best to foster innovation in public contractual arrangements—to encourage the development of products such as super-energy-efficient computers and fuel cells—and how the legal system may require adaptation and reform. The results presented in this book will provide an indispensable resource for municipalities, governments, researchers and business practitioners looking for answers on how public procurement can have a fundamental and manifestly positive effect on the environment.

Eco-Management Accounting Matteo Bartolomeo,M.D. Bennett,J.J. Bouma,Peter Heydkamp,Peter James,F.B. de Walle,T.J. Wolters,2013-03-09 The ECOMAC project (Eco-management Accounting as a Tool of Environmental Management) has provided a framework for linking environmental management with management accounting. It was funded in Theme 4, 'Human Dimensions of Environmental Change' in the EU Environment and Climate Research Programme. The project is of high policy relevance by contributing to the on-going debate on eco management accounting, reporting and indicators. It is also an area needing further research. I would like to thank the research team, companies that participated as associated contractors, and the advisory panel. Jonathan Parker DG XII/D-5, European Commission Theme on Human Dimensions of Environmental Change 7 Preface The ECOMAC project This document is the final report on the project 'Eco-management accounting as a tool of environmental management' (ECOMAC). This research project was conducted under the Environment and Climate Programme (Human Dimension of Environmental Change) of the European Commission (DG XII). The ECOMAC project investigated how companies are using or intend to use environmental costs and benefits figures in support of their decisions, and what they have been doing to remedy the limitations of conventional management accounting in this area. The research was largely explorative in nature, but the project also produced a structured overview of the subject and made suggestions and recommendations as to how companies could improve their own environmental accounting.

The Future of Eco-labelling Frieder Rubik,Paolo Frankl,2005 This book plots a course for policy-makers to address some of the historic problems with eco-labelling, to learn what works and what doesn't and to move forward with integrated schemes that can make a real difference to sustainable production and consumption.

Use of ecodesign tools and expectations for Product Environmental Footprint: Case study of Nordic textile and IT

companies Salo, Hanna,Suikkanen, Johanna,Nissinen, Ari,2019-09-27 Use of ecodesign tools and expectations for Product Environmental FootprintThe report examines the implementation of ecodesign and green innovations inNordic textile and IT companies. The findings of this report are: 1) The respondents are fairly mature in terms of how they integratedenvironmental sustainability into their operations. Companies are mainlydriven by general willingness but deterred by cost increases. 2) Companies remain focused on technical innovations, whereas functionalinnovations are lagging behind. 3) Ecodesign tools and research and development activities are highly relevantfor promoting innovations. 4) The main tools used are Type I Ecolabels, Life Cycle Assessment and CarbonFootprint. 5) Few respondents are familiar with PEF, but many are interested in it. PEF is predominantly seen as a way to evaluate the accuracy of environmentalproduct claims.

Sustainable Product Development Daizhong Su,2020-05-12 This book offers a comprehensive review of sustainability and product design, providing useful information on the relevant regulations and standards for industries to meet increasing market demands for eco-products, while reducing their impact on the environment. The examples and methods presented allow readers to gain insights into sustainable products. The authors also explain how to develop products with sustainability features by applying tools and methods for sustainable design and manufacture. These tools/methods include • Regulations/directives related to sustainable product development • Popular lifecycle analysis software packages • Environmental and social lifecycle impact assessment methods • Lifecycle inventory databases • Eco-point and eco-accounting infrastructure • ICT and traceability technologies for sustainable product development • Sustainable design and manufacture • Integrated approach for sustainable product development A description of each sustainability tool is accompanied by easy-to-understand guidelines as well as sustainable product development methods. Five different case studies are also presented to illustrate how to apply the tools and methods into the development of real sustainable products. In view of the increasing pressure on industries to meet the, sometimes conflicting, demands of the market and environment, this book is a valuable resource for engineers and managers in manufacturing companies wishing to update their knowledge of sustainable product development. It is also suitable for researchers and consultants who are involved or interested in sustainable product development, as well as for students studying sustainable development, production, and engineering management.

Recent Developments in Environmental Economics Michael Hoel,2004 This two-volume collection includes the most important and influential contributions to environmental economics during the last ten years. The articles cover a broad range of topics, and the collection gives an excellent overview over the present state of knowledge in the field. These timely volumes will be invaluable to students and researchers alike.

Environmental Policy Making in Economies with Prior Tax Distortions Lawrence Herbert Goulder,2002 This volume contains 31 contributions from Goulder (economics, Stanford U.) and other scholars on the interactions between environmental policy initiatives and distortionary taxes (such as income and sales taxes). Coverage includes such topics as tradeable emissions permits, the substitution of taxes on pollution for existing distortionary taxes, and the effects of environmental policies on income distribution. With the exception of Agnar Sandmo's 1975 paper on the optimal setting of commodity taxes, the contributions have all been published in various economic journals no earlier than 1994. The Top Books of the Year A3 Eco The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. A3 Eco : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. A3 Eco : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
