*Theology and the Anthropology of Christian Life* Joel Robbins, 2020-07-29

Anthropological theory can radically transform our understanding of human experience and offer theologians an introduction to the interdisciplinary nature between anthropology and Christianity. Both sociocultural anthropology and theology have made fundamental contributions to our understanding of human experience and the place of humanity in the world. But can these two disciplines, despite the radical differences that separate them, work together to transform their thinking on these topics? Robbins argues that they can. To make this point, he draws on key theological discussions of atonement, eschatology, interruption, passivity, and judgement to rethink important anthropological debates about such topics as ethical life, radical change, the ways people live in time, agency, gift giving, and the nature of humanity. The result is both a major reconsideration of important aspects of anthropological theory through theological categories and a series of careful readings of influential theologians such as Moltmann, Pannenberg, Jüngel, and Dalferth informed by rich ethnographic accounts of the lives of Christians from around the world. In conclusion, Robbins draws on contemporary discussions of secularism to interrogate the secular foundations of anthropology and suggests that the differences between anthropology and theology surrounding this topic can provide a foundation for transformative dialogue between them, rather than being an obstacle to it. Written as a work of interdisciplinary anthropological theorizing, this book also offers theologians an introduction to some of the most important ground covered by burgeoning field of the anthropology of Christianity while guiding anthropologists into core areas of theological discussion. Although theoretically ambitious, the book is clearly argued throughout and written to be accessible to all readers in the social sciences, theology, and religious studies interested in the place of religion in social life and human experience.

**World Anthropologies** Gustavo Lins Ribeiro, Arturo Escobar, 2020-07-13 Since its inception, anthropology's authority has been based on the assumption that it is a unified discipline emanating from the West. In an age of heightened globalization, anthropologists have failed to discuss consistently the current status of their practice and its mutations across the globe. *World Anthropologies* is the first book to provoke this conversation from various regions of the world in order to assess the diversity of relations between regional or national anthropologies and a contested, power-laden Western discourse. Can a planetary anthropology cope with both the 'provincial cosmopolitanism' of alternative anthropologies and the 'metropolitan provincialism' of hegemonic schools? How might the resulting 'world anthropologies' challenge the current panorama in which certain allegedly national anthropological traditions have more paradigmatic weight - and hence more power - than others? Critically examining the international dissemination of anthropology within and across national power fields, contributors address these questions and provide the outline for a veritable world anthropologies project.

**Writing Anthropology** Carole McGranahan, 2020-05-01 In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility. Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while

giving encouragement to stay at it—to keep writing as the most important way to not only improve one's writing but to also honor the stories and lessons learned through research. Throughout, they share new thoughts, prompts, and agitations for writing that will stimulate conversations that cut across the humanities. Contributors. *The Execution Premium* Robert S. Kaplan, David P. Norton, 2008-08-04 In a world of stiffening competition, business strategy is more crucial than ever. Yet most organizations struggle in this area--not with formulating strategy but with executing it, or putting their strategy into action. Owing to execution failures, companies realize just a fraction of the financial performance promised in their strategic plans. It doesn't have to be that way, maintain Robert Kaplan and David Norton in *The Execution Premium*. Building on their breakthrough works on strategy-focused organizations, the authors describe a multistage system that enables you to gain measurable benefits from your carefully formulated business strategy. This book shows you how to: Develop an effective strategy--with tools such as SWOT analysis, vision formulation, and strategic change agendas Plan execution of the strategy--through portfolios of strategic initiatives linked to strategy maps and Balanced Scorecards Put your strategy into action--by integrating operational tools such as process dashboards, rolling forecasts, and activity-based costing Test and update your strategy--using carefully designed management meetings to review operational and strategic data Drawing on extensive research and detailed case studies from a broad array of industries, *The Execution Premium* presents a systematic and proven framework for achieving the financial results promised by your strategy.

*The Future of Fallout, and Other Episodes in Radioactive World-Making* Joseph Masco, 2020-12-18 In *The Future of Fallout, and Other Episodes in Radioactive World-Making* Joseph Masco examines the strange American intimacy with and commitment to existential danger. Tracking the simultaneous production of nuclear emergency and climate disruption since 1945, he focuses on the psychosocial accommodations as well as the technological revolutions that have produced these linked planetary-scale disasters. Masco assesses the memory practices, visual culture, concepts of danger, and toxic practices that, in combination, have generated a U.S. national security culture that promises ever more safety and comfort in everyday life but does so only by generating and deferring a vast range of violences into the collective future. Interrogating how this existential lag (i.e., the material and conceptual fallout of the twentieth century in the form of nuclear weapons and petrochemical capitalism) informs life in the twenty-first century, Masco identifies key

moments when other futures were still possible and seeks to activate an alternative, postnational security political imaginary in support of collective life today.

*Massive Change* Bruce Mau, Jennifer Leonard, Institute Without Boundaries, 2004-10 Massive Change is a modern illustrated primer on the new inventions, technologies, and events that are affecting the human race worldwide. The book is a part of a broader research project by Bruce Mau Design intended to provoke debate and discussion about the familiar objects and techniques that are transforming our lives. In essays, interviews, and provocative imagery aimed at a broad audience, Massive Change explores the changing force of design in the contemporary world, and in doing so expands the definition of design to include the built environment, transportation technologies, revolutionary materials, energy and information systems, and living organisms. The book is divided into 11 heavily illustrated sections covering major areas of change in contemporary society - such as urbanism and architecture, the military, health and living, and wealth and politics. introductory essay, extended captions, and interviews with leading thinkers, including engineers, designers, philosophers, scientists, architects, artists, and writers. Concluding the book is a graphic timeline of significant inventions and world events from 10,000 B.C. to the present. Massive Change is the umbrella name for wide-ranging research project initiated by Bruce Mau Design and the Institute Without Boundaries, a new post-graduate design program headquartered at his studio. The project will include not only this book but also a travelling exhibition, public events, an on-line forum, a documentary television project, posters, and a product line. The overall aim of the project is to explore the changing force of design in the contemporary world. The book focuses on the powerful, newly designed technologies and systems (and the failure of outmoded ones) that increasingly influence our daily lives. the debate about genetically modified foods, the race to decode human the human genome, the development and worldwide trafficking of sophisticated military weapons - even the increasingly intrusive security systems at airports: all are examples of massive changes that involve the field of design. The book presents images and text that explore the impact of these subjects, both the seemingly mundane as well as the mind-boggling and microscopic. As the text in Massive Change explains: No longer associated simply with objects and appearances, design is increasingly understood in a much wider sense as the human capacity to plan and produce desired outcomes. The book is divided into 11 sections, each focusing on a specific economy at work in the world today, both the traditional (such as manufacturing), and the often-invisible (globalization and politics). The pages combine images, extended captions, general essays, and interviews in a clean, simple design. The imagery in Massive Change is irresistible, and stands alone as a compelling reason to own this book. beautiful. For example, a photo of a smoky blue blob, as the caption explains, is really Aerogel, a material developed by NASA to collect fast-moving space dust. And a featherless, naked chicken

staring at us from the page is just that: a new, genetically engineered broiler that requires no plucking and yields more meat, a boon to poultry producers yet a frightening harbinger of our future food supply. Massive Change is a well designed, intelligent, visually provocative exploration of the myriad subjects percolating through popular culture: those we read about in magazines and on Web sites but rarely understand in any meaningful way. It poses the question: Now that the human race can do almost anything, what will we do next?

*The Divide* Jason Hickel,2017-05-04 \_\_\_\_\_ As seen on Sky News All Out Politics 'There's no understanding global inequality without understanding its history. In *The Divide*, Jason Hickel brilliantly lays it out, layer upon layer, until you are left reeling with the outrage of it all.' - Kate Raworth, author of *Doughnut Economics* · The richest eight people control more wealth than the poorest half of the world combined. · Today, 60 per cent of the world's population lives on less than \$5 a day. · Though global real GDP has nearly tripled since 1980, 1.1 billion more people are now living in poverty. For decades we have been told a story: that development is working, that poverty is a natural phenomenon and will be eradicated through aid by 2030. But just because it is a comforting tale doesn't make it true. Poor countries are poor because they are integrated into the global economic system on unequal terms, and aid only helps to hide this. Drawing on pioneering research and years of first-hand experience, *The Divide* tracks the evolution of global inequality - from the expeditions of Christopher Columbus to the present day - offering revelatory answers to some of humanity's greatest problems. It is a provocative, urgent and ultimately uplifting account of how the world works, and how it can change for the better.
