Astro-Weather 2009 Eastern Time Edition Guy Spiro,2008-09 Guy Spiro's Original Astro-Weather is a big step up from Sun sign astrology. It represents a new level of astrological information with which to make more informed decisions in daily life. As the Moon and the planets move along their orbits, they form continually shifting patterns, or aspects, that signal the background energy in which we all function, regardless of one's sun sign. Astro-Weather charts this astrological weather for the coming twelve months. When you see the general mood of the mass of people swing one way, then the other, and then sometimes back again, all seemingly without rhyme or reason, this is Astro-Weather. Available in separate versions for all four continental U.S. time zones, Astro-Weather includes precise timing for Moon void of course and planetary retrograde periods, and is an indispensable tool for tens of thousands of readers across the country.

Theory from the South Jean Comaroff,John L. Comaroff,2015-11-17 As nation-states in the Northern Hemisphere experience economic crisis, political corruption and racial tension, it seems as though they might be 'evolving' into the kind of societies normally associated with the 'Global South'. Anthropologists Jean and John Comaroff draw on their long experience of living in Africa to address a range of familiar themes - democracy, national borders, labour and capital and multiculturalism. They consider how we might understand these issues by using theory developed in the Global South. Challenging our ideas about 'developed' and 'developing' nations, Theory from the South provides new insights into key problems of our time.

**Archaeology Anthropology and Interstellar Communication** Douglas A. Douglas A. Vakoch,2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.
