A Good Family A.H. Kim, 2020-07-14 “A story of money, family, who you can trust, and the extremes to which one will go for blood. I couldn’t put it down.” —Lisa Ling, host of CNN’s *This Is Life* Keep your family close and your enemies closer. Beth is the darling of God Halsa, a pharmaceutical giant, and she’s got the outrageous salary and lifestyle to prove it. Until she lands in white-collar women’s prison, thanks to a high-profile whistleblower suit. Sam, Beth’s husband, used to be the town’s most eligible bachelor, and he’s never had to do anything for himself. Until his wife goes to jail, and he’s left to raise two daughters on his own. Lise, the au pair, is the whistleblower. But is she? Everyone knows she’s not clever enough to have done it alone. Hannah, Sam’s sister, is devoted to her family. There’s nothing she wouldn’t do for them. Eva, Beth’s sister, is the smart one. (Read: not the pretty one.) Her life seems perfect on the surface, but sibling rivalry runs deep. Martin, Beth’s brother, is the firstborn, the former golden boy turned inside-the Beltway businessman. But what is he hiding? Someone knows something. Someone betrayed Beth. This is the story of the Min-Lindstroms. This is the story of the all-American family as it implodes under the weight of secrets, lies and the unchecked desire for wealth and power. A.H. Kim is an immigrant, graduate of Harvard College and Berkeley Law, lawyer, and mother of two sons. She lives in San Francisco with her husband. *A Good Family* is her first novel. Don't miss A.H. Kim's next exciting family drama, *Relative Strangers*!

The Assistants Camille Perri, 2016-05-03 “Ocean’s Eleven meets *The Devil Wears Prada*” (The Skimm) in this hilarious, razor-sharp debut novel about a group of overeducated and underpaid women who decide they’ve finally had enough... Rule #1: All important men have assistants. Rule #2: Men rule the world. Still. Rule #3: There is enough money. There is so much money. Tina Fontana is a thirty-year-old executive assistant to Robert Barlow, the CEO of Titan Corp., a multinational media conglomerate. She’s excellent at her job and beloved by her famous boss—but after six years of making reservations and pouring drinks from bottles that cost more than her rent, the glamour of working for a media company in New York has completely faded, but her student loan debt has not. When a technical error with Robert’s expense report presents Tina with the opportunity to pay off the entire balance of her loans with what would essentially be pocket change for her boss, she hesitates. She’s always played by the rules, but this would be a life-changer. As Tina begins to fall down the rabbit hole of her morally questionable plan, other assistants with crushing debt and fewer scruples approach her to say that they want in. Before she knows it, she’s at the forefront of a movement that has implications far beyond what anyone anticipated...

Learn to Program Chris Pine, 2021-06-17 It's easier to learn how to program a computer than it has ever been before. Now everyone can learn to write programs for themselves - no previous experience is necessary. Chris Pine takes a thorough, but lighthearted approach that teaches you the fundamentals of computer programming, with a minimum of fuss or bother. Whether you are interested in a new hobby or a new career, this book is your doorway into the world of programming. Computers are everywhere, and being able to program them is more important than it has ever been. But since most books on programming are written for other programmers, it can be hard to break in. At least it used to be. Chris Pine will teach you how to program. You'll learn to use your computer better, to get it to do what you want it to do. Starting with small, simple one-line programs to calculate your age in seconds, you'll see how to write interactive programs, to use APIs to fetch live data from the internet, to rename your photos from your digital camera, and more. You'll learn the same technology used to drive modern dynamic websites and large, professional applications. Whether you are looking for a fun new hobby or are interested in entering the tech world as a professional, this book gives you a solid foundation in programming. Chris teaches the basics, but also shows you how to think like a programmer. You'll learn through tons of examples, and through programming challenges throughout the book. When you finish, you'll know how and where to learn more - you'll be on your way. What You Need: All you need to learn how to program is a computer (Windows, macOS, or Linux) and an internet connection. Chris Pine will lead you through setting set up with the software you will need to start writing programs of your own.

Allies at Dieppe Will Fowler, 2012-06-20 In August 1942, the Allies launched a raid against the German-held port of Dieppe on the French channel coast. It was largely a disaster, with the Canadian forces bearing the brunt of the catastrophe. However, it wasn't all a failure, and history has tended to overlook the role of 4 Commando, who, along with their US Ranger counter-parts, landed and successfully disabled the German guns threatening the rest of the landings. Their actions proved an excellent demonstration of the military adage “train hard, fight easy” and showed the advantage of proper operational planning and brilliant leadership. This controversial raid also included members of the Free French and it was the first time US land forces engaged the Germans on mainland Europe. Set in the context of the Dieppe raid as a whole, Will Fowler studies the contribution of No. 4 Commando and Operation Cauldron, and evaluates how and why they achieved their objectives in this daring Commando raid of World War II.

Several Short Sentences About Writing Verlyn Klinkenborg, 2013-04-09 An indispensable and distinctive book that will help anyone who wants to write, write better, or have a clearer understanding of what it means for them to be writing, from widely admired writer and teacher Verlyn Klinkenborg. Klinkenborg believes that most of our received wisdom about how writing works is not only wrong but an obstacle to our ability to write. In *Several Short Sentences About Writing*, he sets out to help us unlearn that “wisdom”—about genius, about creativity, about writer’s block, topic sentences, and outline—and understand that writing is just as much about thinking, noticing, and learning what it means to be involved in the act of writing. There is no gospel, no orthodoxy, no dogma in this book. Instead it is a gathering of starting points in a journey toward lively, lucid, satisfying self-expression.

Introductory Grammar of Amharic Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's Traite de langue amharique (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language.The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Beginning to Read and the Spin Doctors of Science Denny Taylor,1998 Suggesting that the contention that phonemic awareness must be taught directly and that children need explicit systematic instruction in phonics is less of a scientific fact than an exercise in political persuasion, this book presents the story of the political campaign that is taking place to change the minds of Americans about how young children learn to read. The book begins with a close look at the empirical research being used to support a massive shift in the national understandings about language, literacy, and learning and concludes by revealing the ways in which research studies on early reading instruction are being used by the federal and state governments to support a new methodology that has turned early reading instruction into a massive business of unprecedented commercial worth. The chapters in the book are: (1) In Which We Are Told Training in Phonemic Awareness Is the Key to Reading Success; (2) In Which Phonemic Awareness Research Is Analyzed from an Experimental Psychological Perspective; (3) In Which Phonemic Awareness Research Is Analyzed from a Sociocultural Perspective; (4) In Which We Find Foorman's Research Does Not Support the NICHD [National Institute of Child Health and Human Development] Proposition That Phonological Processing Is the Primary Area Where Children with Reading Difficulties Differ from Other Children; (5) In Which Teachers Are Turned into Clerks and We Discuss Power, Privilege, Racism and Hegemony; (6) In Which Governor Bush's Business Council Holds a Pre-Summit Meeting in Texas; (7) In Which We Have anIf-They-Say-It's-So-It-Must-Be-So Attitude toward Experimental Research; (8) In Which the Kindergarten Children in North Carolina Are No Longer Expected To Try To Read and Write; (9) In Which I Become the Documentation on Which I Build My Case; (10) In Which We Are Told That in America We Are All Equal. Are We or Aren't We?; (11) In Which We Find the Desks and Chairs Are Broken and the Toilets Don't Work; (12) In Which We Ask: Do You Think America Likes Children?; (13) In Which We Consider If We Are Comfortable Mandating Reading Programs based on Neuroimaging Research and Genetic Studies of Reading Disabilities; (14) In Which California Politically Reinvents How Young Children Learn To Read; (15) In Which California Ends Local Control and the State Board of Education Leads the Jihad; and (16) In Which We Enter the Central Chamber of the Hegemonic Labyrinth. (Contains approximately 250 references; an appendix that offers a response to preliminary statistical analyses used to support the nationally publicized findings of the NICHD Houston reading studies, and an appendix that offers late-breaking news about the NICHD Houston reading studies are attached.)
