The Politics of Water in Arizona Dean E.

Mann,2022-06-28 “Mann’s book is timely, and its central theme, the role of legal, political, and scientific institutions in the utilization of water in Arizona, is appropriate. It is appropriate, moreover, for the greater region of California and the Southwest, where exist similar problems. . . . The Politics of Water in Arizona ranks along with Richard Cooley’s prize winning Politics and Conservation: The Decline of the Alaska Salmon as an outstanding contribution of a political science to the field of conservation and resource utilization.”—California Historical Society Quarterly

The Psychology of Religion Ralph W. Hood, Jr.,Peter C. Hill,Bernard Spilka,2018-07-23 Keeping up with the rapidly growing research base, the leading graduate-level psychology of religion text is now in a fully updated fifth edition. It takes a balanced, empirically driven approach to understanding the role of religion in individual functioning and social behavior. Integrating research on numerous different faith traditions, the book addresses the quest for meaning; links between religion and biology; religious thought, belief, and behavior across the lifespan; experiential dimensions of religion and spirituality; the social psychology of religious organizations; and connections to coping, adjustment, and mental disorder. Innovation and Consolidation in Aviation Peter Pfister, 2017-03-02 This unique book expands the contribution of aviation psychology and human factors to the aviation industry within the Asia Pacific region, with participation from many other parts of the globe, and key local and international experts, developing the safety, efficiency and viability of the industry. It is a forward-looking work, providing new strategies for psychology and human factors to increase the safe and effective functioning of aviation organisations and systems, pertinent to both civil and military operations. This is the formal refereed proceedings of The Fifth Australian Aviation Psychology Symposium, Manly Beach, Sydney 2000. The symposium had a diverse range of contributions and Development Workshops, bringing together practitioners from aviation psychology and human factors, flight operations management, safety managers, pilots, cabin crew, air traffic controllers, engineering and maintenance personnel, air safety investigators, staff from manufacturers and regulatory bodies, and applied aviation industry researchers and academics. This book will be of interest to anyone involved in human factors, safety systems or aviation psychology within both the civil and military aviation industry.

Hill Folks Brooks Blevins, 2003-04-03 The Ozark region, located in northern Arkansas and southern Missouri, has long been the domain of the folklorist and the travel writer--a circumstance that has helped shroud its history in

stereotype and misunderstanding. With *Hill Folks*, Brooks Blevins offers the first in-depth historical treatment of the Arkansas Ozarks. He traces the region's history from the early nineteenth century through the end of the twentieth century and, in the process, examines the creation and perpetuation of conflicting images of the area, mostly by non-Ozarkers. Covering a wide range of Ozark social life, Blevins examines the development of agriculture, the rise and fall of extractive industries, the settlement of the countryside and the decline of rural communities, in- and out-migration, and the emergence of the tourist industry in the region. His richly textured account demonstrates that the Arkansas Ozark region has never been as monolithic or homogenous as its chroniclers have suggested. From the earliest days of white settlement, Blevins says, distinct subregions within the area have followed their own unique patterns of historical and socioeconomic development. *Hill Folks* sketches a portrait of a place far more nuanced than the timeless arcadia pictured on travel brochures or the backward and deliberately unprogressive region depicted in stereotype.

Practitioner's Guide to Empirically Based Measures of Social Skills Douglas W. Nangle,David J. Hansen,Cynthia A. Erdley,Peter J. Norton,2009-12-16 Social

skills are at the core of mental health, so much so that deficits in this area are a criterion of clinical disorders, across both the developmental spectrum and the DSM. The Practitioner's Guide to Empirically-Based Measures of Social Skills gives clinicians and researchers an authoritative resource reflecting the ever growing interest in social skills assessment and its clinical applications. This one-of-a-kind reference approaches social skills from a social learning perspective, combining conceptual background with practical considerations, and organized for easy access to material relevant to assessment of children, adolescents, and adults. The contributors' expert guidance covers developmental and diversity issues, and includes suggestions for the full range of assessment methods, so readers can be confident of reliable, valid testing leading to appropriate interventions. Key features of the Guide: An official publication of the Association for Behavioral and Cognitive Therapies Describes empirically-based assessment across the lifespan. Provides in-depth reviews of nearly 100 measures, their administration and scoring, psychometric properties, and references. Highlights specific clinical problems, including substance abuse, aggression, schizophrenia, intellectual disabilities, autism spectrum disorders, and social anxiety. Includes at-a-glance summaries of all reviewed measures. Offers full reproduction of more than a dozen measures for children, adolescents, and adults, e.g. the Interpersonal Competence Questionnaire and the Teenage Inventory of Social Skills. As social skills assessment and training becomes more crucial to current practice and research, the Practitioner's Guide to Empirically-Based Measures of Social Skills is a steady resource that clinicians, researchers, and graduate students will want close at hand.
