**Denmark Travel Adventures** Elizabet Olesen,2009-07-15 Denmark is primarily made up of one peninsula, Jutland (Jylland in Danish), and two islands, Sealand (Sjælland) and Funen (Fyn). Sealand is the bigger of the two islands and also where Copenhagen, the capital and biggest city, is located. Denmark is the smallest of the three Scandinavian countries, with only 43,000 square km. There are over 400 islands in total but only 100 of them are inhabited. The country has 4.500 miles of coast line and you are never more than 30 miles from the sea, no matter where you are in the country. The biggest island in the world, Greenland, also belongs to Denmark, as do the Faroe Islands. If Greenland were to be included in the total area of the country, Denmark would be the biggest country in Europe by far and one of the biggest in the world. Denmark is perhaps the most popular of the three countries for campers. There are more than 500 campsites all over the country. The Danish word for inn is kro and if you see that word on a sign along the road, you have found the perfect combination of a place to stay and a place to eat. A long time ago, when people traveled by horse, it was decided that a kro should be placed every 20 km along all common roads in Denmark and, still today, you will find inns all over the country. They are as popular as ever for spending the night, grabbing a bite to eat, or both. Denmark is the number-one biking country of the three. Being a small and flat country, it's often the best way of getting around and biking is extremely popular for recreation. Denmark has over 6,200 miles of designated biking trails. These are just a few details covered in this comprehensive guide to all the activities in the country, plus where to stay and where to dine. This is an excerpt from our much larger guide to Scandinavia.

**Green Cities of Europe** Timothy Beatley,2012-05-15 In the absence of federal leadership, states and localities are stepping forward to address critical problems like climate change, urban sprawl, and polluted water and air. Making a city fundamentally sustainable is a daunting task, but fortunately, there are dynamic, innovative models outside U.S. borders. Green Cities of Europe draws on the world's best examples of sustainability to show how other cities can become greener and more livable. Timothy Beatley has brought together leading experts from Paris, Freiburg, Copenhagen, Helsinki, Heidelberg, Venice, Vitoria-Gasteiz, and London to illustrate groundbreaking practices in sustainable urban planning and design. These cities are developing strong urban cores, building pedestrian and bicycle infrastructure, and improving public transit. They are incorporating ecological design and planning concepts, from solar energy to natural drainage and community gardens. And they are changing the way government works, instituting municipal green audits and reforming economic incentives to encourage sustainability. Whatever their specific tactics, these communities prove that a holistic approach is needed to solve environmental problems and make cities sustainable. Beatley and these esteemed contributors offer vital lessons to the domestic planning community about not only what European cities are doing to achieve that vision, but precisely how they are doing it. The result is an indispensable guide to greening American cities. Contributors include: Lucie Laurian (Paris) Dale Medearis and Wulf Daseking (Freiburg) Michaela Brüel (Copenhagen) Maria Jaakkola (Helsinki) Marta Moretti (Venice) Luis Andrés Orive and Rebeca Dios Lema (Vitoria-Gasteiz) Camilla Ween (London)

German Northern Theater of Operations 1940-1945 [Illustrated Edition] Earl Ziemke,2015-11-06 [Includes 23 maps and 31 illustrations] This volume describes two campaigns that the Germans conducted in their Northern Theater of Operations. The first they launched, on 9 April 1940, against Denmark and Norway. The second they conducted out of Finland in partnership with the Finns against the Soviet Union. The latter campaign began on 22 June 1941 and ended in the winter of 1944-45 after the Finnish Government had sued for peace. The scene of these campaigns by the end of 1941 stretched from the North Sea to the Arctic Ocean and from Bergen on the west coast of Norway, to Petrozavodsk, the former capital of the Karelo-Finnish Soviet Socialist Republic. It faced east into the Soviet Union on a 700-mile-long front, and west on a 1,300-mile sea frontier. Hitler regarded this theater as the keystone of his empire, and, after 1941, maintained in it two armies totaling over a half million men. In spite of its vast area and the effort and worry which Hitler lavished on it, the Northern Theater throughout most of the war constituted something of a military backwater. The major operations which took place in the theater were overshadowed by events on other fronts, and public attention focused on the theaters in which the strategically decisive operations were expected to take place. Remoteness, German security measures, and the Russians' well-known penchant for secrecy combined to keep information concerning the Northern Theater down to a mere trickle, much of that inaccurate. Since the war, through official and private publications, a great deal more has become known. The present volume is based in the main on the greatest remaining source of unexploited information, the captured German military and naval records. In addition a number of the participants on the German side have very generously contributed from their personal knowledge and experience.
