Photocatalysis Rakshit Ameta,Suresh C. Ameta,2016-11-25 Photocatalysis, reactions carried out in the presence of a semiconductor and light, is rapidly becoming one of the most active areas of chemical research, with applications in areas such as electrochemistry, medicine, and environmental chemistry, Photocatalysis: Principles and Applications stresses the development of various types of photocatalytic semiconductors, including binary, ternary, quaternary, and composite, and their modifications by metallization, sensitization, and doping to enhance their photocatalytic activities. In addition to describing the principles and mechanisms of photocatalysis, it also discusses other possible applications of photocatalysis such as use as antifouling agents, controlling air pollution by degrading contaminants present in the environment, self-cleaning of glasses and tiles in the presence of light/artificial light, green composites, wastewater treatment, hydrogen generation, and inactivation of microorganisms. The book also describes medical applications and summarizes efforts in the field of photosplitting of water as a newer energy source and photoreduction of carbon dioxide for providing synthetic fuels and also a step towards mimicking photosynthesis. Introduces the basic principle of photocatalysis. Provides an overview of the types of semiconductors, their immobilization, and modifications to make them more active. Gives possible applications of photocatalysis in wastewater treatment and strategy to combat against different kinds of pollutions like water, air, and soil. Summarizes efforts in the field of photosplitting of water as a newer energy source and photoreduction of carbon dioxide for providing synthetic fuels and as a step towards mimicking photosynthesis. Following Wisdom, Leading Wisely Jeff Roper,2024-02-21 If it is true that “everything rises and falls on leadership,” we have a problem. A recent international survey revealed that 86 percent of respondents believe we are facing a global leadership crisis. The study encompassed leadership in business, government, the non-profit sector, and religion. Non-profit and business leaders ranked highest in terms of public confidence. Government leaders ranked very low. The only leaders to rank lower than government leaders were religious leaders. This leadership crisis is not driven by an absence of leaders. Leaders are everywhere, yet we still have a leadership crisis. Nor is this crisis caused by a lack of leadership training. Who can keep up with the books, seminars, and training programs offering the latest trends and best thinking on leadership? And yet, we still have a leadership crisis. While the world is looking for better leadership methods, God is looking for better leaders—leaders shaped by wisdom. What use, after all, is getting things done, or even servant leadership, without wisdom? In Proverbs we discover an ancient training regimen for leaders, guiding them in the cultivation of virtuous character. Following Wisdom, Leading Wisely is an invitation to rediscover this ancient wisdom for today’s leaders.

Microbial Biostimulants for Sustainable Agriculture and Environmental Bioremediation Inamuddin,Charles Oluwaseun Adetunji,Mohd Imran Ahamed,Tariq Altalhi,2022-06-29 Today, the agriculture industry is confronted with simultaneous issues of how to fully embrace mass production of safer food in terms of both quality and quantity. Most industries are concerned with avoiding significant levels of soil pollution and environmental threats as a result of the excessive and harmful use of synthetic products on crops. Therefore, there is a need to adopt sustainable technological innovations that can ensure the sustainability of agricultural production systems. Microbial Biostimulants for Sustainable Agriculture and Environmental Bioremediation discusses the benefits, challenges, and practical applications of eco-friendly biotechnological techniques using biostimulants derived from beneficial microorganisms. The chapters cover the use of these organisms to increase crop production, enhance soil fertility and maintain soil health, create crop and plant tolerance to different abiotic stressors, release required nutrients to the soil, increase resistance to plant pathogens/pests, improve nutrient use efficiency of crops, and rejuvenate polluted environments. FEATURES Explores the physiological, morpho-anatomical, and biochemical molecular plant rejoinders involved in stimulating crop productivity Provides information on the physiological, cellular, and molecular modes of action underlying microbial biostimulant interfaces Summarizes methods and approaches for executing microbial stimulant technology Outlines numerous environmental management and remediation strategies This book is an ideal resource for researchers, engineers, and academics working in soil science, crop science, water remediation, microbiology, and biotechnology.

How Lives Change Himanshu,Peter Lanjouw,Nicholas Stern,2018-08-02 Development economics is about understanding how and why lives change. How Lives Change: Palanpur, India, and Development Economics

studies a single village in a crucially important country to illuminate the drivers of these changes, why some people do better or worse than others, and what influences mobility and inequality. *How Lives Change* draws on seven decades of detailed data collection by a team of dedicated development economists to describe the evolution of Palanpur's economy, its society, and its politics. The emerging story of integration of the village economy with the outside world is placed against the backdrop of a rapidly transforming India and, in turn, helps to understand the transformation. It puts development economics into practice to assess its performance and potential in a unique and powerful way to show how the development of one village since India's independence can be set in the context of the entire country's story. *How Lives Change* sets out the role of, and scope for, public policy in shaping the lives of individuals. It describes how changes in Palanpur's economy since the late 1950s were initially driven by the advance of agriculture through land reforms, the expansion of irrigation and the introduction of green revolution technologies. Since the mid-1980s, newly emerging off-farm opportunities in nearby towns and outside agriculture became the key driver of growth and change, profoundly influencing poverty, income mobility, and inequality in Palanpur. Village institutions are shown to have evolved in subtle but clear ways over time, both shaping and being shaped by economic change. Individual entrepreneurship and initiative is found to play a critical role in driving and responding to the forces of change; and yet, against a backdrop of real economic growth and structural transformation, this book shows that human development outcomes have shown only weak progress and remain stubbornly resistant to change.

Transculturalism and Business in the BRIC States Yvette Sánchez, Claudia Franziska Brühwiler, 2016-03-03 *Transculturalism and Business in the BRIC States*, edited by Yvette Sánchez and Claudia Franziska Brühwiler, is the first handbook on the BRIC States that offers a transcultural perspective, which goes beyond the typical 'how to' manuals or economic projections and provides an understanding of transculturalism as it is studied and practiced in the respective countries themselves. This unique reference book also offers insights into the relations between the corresponding states and the challenges facing those trying to foster more intense business exchanges. The reader learns to interpret cross-cultural issues from the perspectives of the BRIC states themselves and gains insight into the way scholars in the BRIC area reflect on transculturalism. Moreover, it introduces the reader to fresh visualizations that help consider transculturalism beyond the known categories. The book will appeal, on the one hand, to practitioners who are active in the BRIC states and wish to better grasp the challenges to business relations, as well as the intra-area dynamics and, on the other hand, to scholars in transcultural studies and international management, due to its insider approach. Since the book combines theoretical concepts with a clear geographic focus and a critical approach to traditional models, it is suitable for both academic audiences as well as for practitioners who appreciate a sound theoretical base and a fresh take on a subject.

Microbial Biocontrol: Sustainable Agriculture and Phytopathogen Management Ajay Kumar, 2022-05-04 This first volume of a two-volume work presents the manifold applications of beneficial microbes and microbiomes in plant growth promotion, in enhancing crop resilience and in control of phytopathogens through microbial antagonists. In-depth insights into latest technologies such as biopriming of seeds and soil inoculation of rhizosphere microorganisms are provided. The two-volume work "Microbial Biocontrol" introduces mechanisms of plant-microbe interactions and explores latest strategies of how microbes can be applied in biocontrol and management of plant pathogens, replacing chemical fertilizers and pesticides. The book covers different groups of microorganisms such as bacteria, fungi, but also the interplay of entire microbiomes, and reviews their specific benefits in crop growth promotion, in enhancing the plants' tolerance against biotic and abiotic stress as well as in post-harvest management of various plant diseases. Novel tools such as CRISPR/Cas9 and microbe derived nanoparticles are also addressed besides the legal aspects of biocontrol applications. Today, rising global population and changing climatic conditions emerge as a major challenge for agronomist farmers and researchers in fulfilling the requirements of global food production. The conventional agricultural practices utilize undistributed use of chemical fertilizers and pesticides to enhance growth and yield of agricultural products and fresh foods, but their extensive and continuous use have led to a range of negative consequences on the food quality and safety, to environment as well as to human and animal health. Microbial biocontrol applications are presented as a solution, paving the way to a sustainable agriculture in compliance with the UN Sustainable Development Goals (SDG). The book addresses researchers in academia and agriculture.

Narrative Global Politics Naeem Inayatullah, Elizabeth Dauphinee, 2016-07-01 This volume harnesses the virtual explosion of narrative writing in contemporary academic international politics. It comprises a prologue, an epilogue, and sixteen chapters that both build upon and diversify the success of the 2011 volume *Autobiographical International Relations*. Here, as in that volume, academics place their narratives in the context of world politics, culture, and history. Contributors explore moments in their academic lives that are often inexpressible in the standard academic voice and which, in turn, require a different way of writing and knowing. They write in the belief that academic IR has already begun to benefit from a different kind of writing—a stylae that retrieves the I and explicitly demonstrates its presence both within the world and within academic writing. By working within the overlap between theory, history, and autobiography, these chapters aim to increase the clarity, urgency, and meaningfulness of academic work. Highlighting the autoethnographic and autobiographic turn in critical international relations, this work will be of great interest to students and scholars in international relations, IR theory and global politics.
