Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps

Sen, Devjani,Ahmed, Rukhsana,2020-08-07 Health and fitness apps collect various personal

information including name, email address, age, height, weight, and in some cases, detailed health information. When using these apps, many users trustfully log everything from diet to sleep patterns. However, by sharing such personal information, end-users may make themselves targets to misuse of this information by unknown third parties, such as insurance companies. Despite the important role of informed consent in the creation of health and fitness applications, the intersection of ethics and information sharing is understudied and is an often-ignored topic during the creation of mobile applications. Privacy Concerns Surrounding Personal Information Sharing on Health and Fitness Mobile Apps is a key reference source that provides research on the dangers of sharing personal information on health and wellness apps, as well as how such information can be used by employers, insurance companies, advertisers, and other third parties. While highlighting topics such as data ethics, privacy management, and information sharing, this publication explores the intersection of ethics and privacy using various quantitative, qualitative, and critical analytic approaches. It is ideally designed for policymakers, software developers, mobile app designers, legal specialists, privacy analysts, data

scientists, researchers, academicians, and upper-level students.

Mobile Health James M. Rehg, Susan A. Murphy, Santosh Kumar, 2017-07-12 This volume provides a comprehensive introduction to mHealth technology and is accessible to technology-oriented researchers and practitioners with backgrounds in computer science, engineering, statistics, and applied mathematics. The contributing authors include leading researchers and practitioners in the mHealth field. The book offers an in-depth exploration of the three key elements of mHealth technology: the development of on-body sensors that can identify key health-related behaviors (sensors to markers), the use of analytic methods to predict current and future states of health and disease (markers to predictors), and the development of mobile interventions which can improve health outcomes (predictors to interventions). Chapters are organized into sections, with the first section devoted to mHealth applications, followed by three sections devoted to the above three key technology areas. Each chapter can be read independently, but the organization of the entire book provides a

logical flow from the design of on-body sensing technology, through the analysis of time-varying sensor data, to interactions with a user which create opportunities to improve health outcomes. This volume is a valuable resource to spur the development of this growing field, and ideally suited for use as a textbook in an mHealth course.

Religion and Aging Andrea Bieler, Matthias Stracke, Angelika Veddelar, 2017-11-01 This collection of essays explores the intersection of religious, psychosocial, economic and cultural issues in relation to the dramatic demographic shifts we are facing on a global scale. Theologians, gerontologists, anthropologists and practitioners reflect on the meaning of aging in diverse contexts such as Indonesia, South Africa, Tanzania, Botswana, Germany, Mexico, and Switzerland. Assuming that aging is an intricate process that encompasses enrichment and loss, the gain of wisdom and the loss of memory, and the expansion as well as the constraint of agency, the essays analyze how these dynamics play out in different cultural contexts. Special attention is given to the role of religion in processes of aging. [Religion und Altwerden. Interkulturelle und interdisziplinäre Erkundungen] Der

Sammelband untersucht das Zusammenspiel religiöser, psychosozialer, ökonomischer und kultureller Aspekte in Bezug auf die dramatischen demographischen Veränderungen, mit denen wir in globaler Perspektive konfrontiert sind. Wissenschaftler und Praktiker reflektieren aus theologischer, gerontologischer, sozialpsychologischer und anthropologischer Perspektive die Bedeutung von Alterungsprozessen in unterschiedlichen Kontexten, z. B. in Indonesien, Südafrika, Tansania, Botswana, Deutschland, Mexiko und der Schweiz. Ausgehend von Überlegungen, die zeigen, dass Alterungsprozesse komplex sind und sowohl Bereicherung und Verlust, den Zugewinn an Weisheit und den Verlust von Erinnerungsfähigkeit sowie die Ausweitung als auch die Einschränkung von Handlungsfähigkeit beinhalten können, wird danach gefragt, welche Gestalt diese Dynamiken in unterschiedlichen Kontexten annehmen. Dabei kommt insbesondere die Bedeutung von Religion in den Blick.
