Being with Data Nathaniel Tkacz, 2022-06-01 Once the rarified stuff of scientists and statisticians, data are now at the heart of our global digital economy, transforming everything from how we perceive the value of a professional athlete to the intelligence gathering activities of governments. We are told that the right data can turn an election, help predict crime, improve our businesses, our health and our capacity to make decisions. Beginning with a simple question - how do most people encounter and experience data? - Nathaniel Tkacz sets out on a path at odds with much of the contemporary discussion about data. When we encounter data, he contends, it is often in highly routinised ways, through formatted displays and for specific cognitive tasks. What data are and can do is largely a matter of how they are formatted. To understand our 'datafied' societies, we need to turn our attention to data's formats and the powers of formatting. This book offers an account of one such format: the dashboard. From their first appearance with the horse and carriage, Tkacz guides readers on the historical development of this format. Through analyses of car dashboards, early managerial dashboards, and the gradual emergence of dashboards as a computer display technology, Tkacz shows how today's digital dashboards came to be, and how their cultural history conditions the present. Highly original and wide-ranging, this book will change how you think about data.

Consumer Protection, Automated Shopping Platforms and EU Law Christiana N. Markou, 2019-09-10 This book looks at two technological advancements in the area of e-commerce, which dramatically seem to change the way consumers shop online. In particular, they automate certain crucial tasks inherent in the 'shopping' activity, thereby relieving consumers of having to perform them. These are shopping agents (or comparison tools) and automated marketplaces. It scrutinizes their underlying processes and the way they serve the consumer, thereby highlighting

risks and issues associated with their use. The ultimate aim is to ascertain whether the current EU regulatory framework relating to consumer protection, e-commerce, data protection and security adequately addresses the relevant risks and issues, thus affording a 'safe' shopping environment to the e-consumer.

The Struggle for Development Benjamin Selwyn, 2018-03-02 The world economy is expanding rapidly despite chronic economic crises. Yet the majority of the world's population live in poverty. Why are wealth and poverty two sides of the coin of capitalist development? What can be done to overcome this destructive dynamic? In this hard-hitting analysis Benjamin Selwyn shows how capitalism generates widespread poverty, gender discrimination and environmental destruction. He debunks the World Bank's dollar-a-day methodology for calculating poverty, arguing that the proliferation of global supply chains is based on the labour of impoverished women workers and environmental ruin. Development theories – from neoliberal to statist and Marxist – are revealed as justifying and promoting labouring class exploitation despite their pro-poor rhetoric. Selwyn also offers an alternative in the form of labour-led development, which shows how collective actions by labouring classes – whether South African shack-dwellers and miners, East Asian and Indian Industrial workers, or Latin American landless labourers and unemployed workers – can and do generate new forms of human development. This labour-led struggle for development can empower even the poorest nations to overcome many of the obstacles that block their way to more prosperous and equitable lives.
