A Systematic Catalogue of the Genus Zygaena Fabricius

(*Lepidoptera: Zygaenidae*) H. Reiss,W.G. Tremewan,2012-12-06 It is

forty years since Burgeff published, in 1926, the first comprehensive catalogue of the genus *Zygaena* Fabricius, forming part 33 of the *Lepidopterorum Catalogus*. Following the pattern and general layout of Burgeff's work, we have attempted to produce a catalogue in which all names in the genus *Zygaena* are included, with references to the literature where these names were originally published.

Additional references are included when these refer to illustrations of a species, subspecies or form, or to a taxonomic change, e.g., a change in status. References to misidentifications are generally omitted unless a new species has been described at a later date. In compiling this work we have adhered to the International Code of Zoological Nomenclature as adopted by the XV International Congress of Zoology. However, although the International Commission on Zoological Nomenclature recognises the necessity of names of lower rank than subspecies, they do not at present deal with such names.

The provisions of the Code do not apply to them and, therefore, such names have no nomenclatural status. Every subspecies is given equal status in the catalogue although their relative value is not always the same. Certain authors have very often separated sub species on minute differences and a subsequent examination of further material, taken over a number of years, has shown that the differences are not always constant. In many cases, however, we have been unable to verify the

status of each subspecies.

European Drug Index Niels F. Muller,Rudolf P.

Dessing,2022-03-07 Many health care providers are frequently dealing with problems related to the identification and interpretation of medicines and prescriptions of foreign origin. Health authorities, customs and travel agencies also encounter such problems, which are related to the increasing mobility of the European population. Thus the need for a European Drug Index is obvious. The EDI provides extended information for practitioners confronted with the enormous number of drug names available on the European pharmaceutical market. This market is increasing due to the rapidly changing palette of countries and economic restrictions in Europe. The listings have been derived from drug data sources from the increased number of participating countries in this second edition. Each item starts with a trade name, in alphabetical order, followed by (depending on the original source) dosage forms, strength, volume (if applicable), and generic name(s) of the active principle(s) in a random sequence. The item is concluded by the Anatomical Therapeutic Chemical (ATC) classification (when made available by the original source) and a code for the country of origin.
