Britain and the Arctic Duncan Depledge, 2017-12-16 British interest in the Arctic has returned to heights not seen since the end of the Cold War; concerns about climate change, resources, trade, and national security are all impacted by profound environmental and geopolitical changes

happening in the Arctic. Duncan Depledge investigates the increasing geopolitical significance of the Arctic and explores why it took until now for Britain – once an ‘Arctic state’ itself – to notice how close it is to these changes, what its contemporary interests in the region are, and whether the British government’s response in the arenas of science, defence, and commerce is enough. This book will be of interest to both academics and practitioners seeking to understand contemporary British interest and activity in the Arctic.

The Director and The Manager David S. Fushtey, 2019-02-01 Machiavelli Had it Easy is an engaging text for the emerging discipline of governance. Gaps arise when directors and managers come together from diverse vocational and cultural languages and interests. Compressed information streams in the digital age, yet few reconcile silos of business, legal expertise and regulatory public-interests for informed decisions. This text presents research and a market-tested decision-framework for comparative law, market practice, and human nature in the vital strategic-oversight role of governance. Informed by cognitive science, business practice and legal duties, one conclusion is that bias and self-interests are instinctive but reconciling best-interests is not. Too often lessons learned from centuries of law are overlooked. The chapters are a dozen inquiries into recurring problems in the boardroom. Part one is an entry-level technical reference of law and governance principles. Unique appendices of keywords and case notes will aid those new to markets governed by the western rule-of-law and those tripping on gaps in comparative jargon. Part two is a series of practical hot-topics in the context of law and governance; part three looks to next steps in accountability and liability. The text will help accountants, engineers, lawyers, and business operations and market-policy experts from around the world work together, and; professors, professionals and students anticipate change. After drilling through accountability and liability for

hybrid organizations, typical crises are revealed to be from a lack of aligning interests and related information churn. Conclusions of the how and why of governance systems link the human condition and the rule-of-law in the digital age.

Dawn Raids Under Challenge Helene Andersson, 2018-06-28 This book examines the European Commission's dawn raid practices in competition cases from a fundamental rights perspective. In recent years, the Commission has adopted a new and more aggressive enforcement policy, amid a growing awareness that cartels and abuse of market power represent an economic harm and need to be punished. In response, enforcement has been strengthened by the grant of more wide-reaching powers to competition authorities. But how does this impact on the framework of fundamental rights? This study seeks to answer that question by examining the obligations imposed by the Charter and the ECHR and the response of the Luxembourg and Strasbourg Courts. It shows that where the Strasbourg Court has managed to strike a balance between efficiency concerns and the rights of undertakings, the EU courts' judicial control is not equally balanced. This book is an essential and timely examination of this important question.

Fair Shake Naomi Cahn, June Carbone, Nancy Levit, 2024-05-07 A stirring, comprehensive look at the state of women in the workforce—why women’s progress has stalled, how our economy fosters unproductive competition, and how we can fix the system that holds women back. In an era of supposed great equality, women are still falling behind in the workplace. Even with more women in the workforce than in decades past, wage gaps continue to increase. It is the most educated women who have fallen the furthest behind. Blue-collar women hold the most insecure and badly paid jobs in our economy. And even as we celebrate high-profile representation—women on the board of Fortune 500 companies and our first female vice president—women have limited recourse when they experience harassment and discrimination. *Fair Shake: Women and the Fight to Build a Just Economy* explains that the system that governs our economy—a winner-take-all economy—is the root cause of these myriad problems. The WTA economy self-selects for aggressive, cutthroat business tactics, which creates a feedback loop that sidelines women. The authors, three legal scholars, call this feedback loop “the triple bind”: if women don’t compete on the same terms as men, they lose; if women do compete on the same terms as men, they’re punished more harshly for their sharp elbows or actual misdeeds; and when women see that they can’t win on the same terms as men, they take

themselves out of the game (if they haven't been pushed out already). With odds like these stacked against them, it's no wonder women feel like, no matter how hard they work, they can't get ahead. Fair Shake is not a "fix the woman" book; it's a "fix the system" book. It not only diagnoses the problem of what's wrong with the modern economy, but shows how, with awareness and collective action, we can build a truly just economy for all.

Routledge Handbook of Public Aviation Law Paul Stephen Dempsey, Ram S Jakhu, 2016-07-15 The Routledge Handbook of Public Aviation Law is the first book to incorporate a comprehensive analysis of Public Aviation Law – principally international, but also domestic law in a comparative context – in a single volume. International Law is pervasive in Aviation Law, and is incorporated into a number of major multilateral treaties (e.g., the Chicago Convention of 1944, for Public International Air Law). This is supplemented by various Annexes (promulgated by the International Civil Aviation Organization) and Conventions and Protocols (promulgated by States in diplomatic conferences). States then implement these international obligations in domestic laws that create aviation regulatory administrations that, in turn, promulgate regulations. Bringing together leading scholars in the field, this prestigious reference work provides a comprehensive and comparative overview of Public Aviation Law. It surveys the state of the discipline including contemporary and emerging areas of law, regulation, and public policy in air transportation. Each chapter begins with an overview of the international law applicable to the subject matter, followed, where appropriate, by a comparative examination of domestic statutes, regulations, and jurisprudence. The objective of the book is to identify and summarize existing areas within the context of international research, and to identify and highlight emerging areas. Both practical and theoretical in scope, the Routledge Handbook of Public Aviation Law will be of great relevance to scholars, researchers, lawyers, and

policy makers with an interest in aviation law.

Cross-Border Insolvency Law Bob Wessels, Gert-Jan Boon, 2015-09-24 Recent insolvency cases highlight the growing importance of cross-border insolvency matters in international transactions. In order to obtain relevant information essential for conduct in such transactions, an insolvency lawyer needs to have access to the many relevant instruments that have been introduced and implemented in recent years, but that until now have not been available in any single place. This very useful volume collects, for the second time in one source, all important international and regional legal instruments relating to insolvency of companies and consumers, as well as to corporate rescue law. The book includes international and regional conventions, model laws, EU regulations and directives, and guiding principles produced by various international bodies (such as the World Bank, the United Nations Committee on International Trade Law ('UNCITRAL'), the American Law Institute, INSOL International, and INSOL Europe), and international and European restatements of insolvency law by scholars. In addition to reproducing the complete texts of these instruments, the editors provide insightful commentary covering such important matters as the following: • key issues of each text; • expected amendments and revisions; and • comparative analysis of instruments. A unique resource bringing together core material in the field of cross-border insolvency law and legislation, this book will be welcomed by international insolvency practitioners worldwide.
