**The Masnavi, Book One** Jalal al-Din Rumi, [Alī al-Ad-Dīn Rūmī](#), 2004-11-11 Publisher description

**Computer Games and Instruction** J. D. Fletcher, Sigmund Tobias, 2011-05-01 There is intense interest in computer games. A total of 65 percent of all American households play computer games, and sales of such games increased 22.9 percent last year. The average amount of game playing time was found to be 13.2 hours per week. The popularity and market success of games is evident from both the increased earnings from games, over \$7 Billion in 2005, and from the fact that over 200 academic institutions worldwide now offer game related programs of study. In view of the intense interest in computer games educators and trainers, in business, industry, the government, and the military would like to use computer games to improve the delivery of instruction. *Computer Games and Instruction* is intended for these educators and trainers. It reviews the research evidence supporting use of computer games, for instruction, and also reviews the history of games in general, in education, and by the military. In addition chapters examine gender differences in game use, and the implications of games for use by lower socio-economic students, for students' reading, and for contemporary theories of instruction. Finally, well known scholars of games will respond to the evidence reviewed.

Self-Portrait in Words Max Beckmann, 1997-03-15 One of the most important German artists of the twentieth century, Max Beckmann was labeled a degenerate artist by the Nazis and chose exile. His artistic production encompassed the realism and figural themes of his early works to the provocatively blunt portraiture, critical urban views, and richly layered symbolic works for which he is now universally recognized. Although he was a prolific writer, his written work has never before been collected and translated into English. Beckmann is known for the depth, pungency, and tremendous sensuous force of his works; only in the last twenty years have we come to learn more about his personal life. *Self-Portrait in Words* maps out Beckmann's life and draws attention to the occasions on or for which he produced his writings, to the importance writing had for him as a form of expression, and to both the contemporary and personal references of his ideas and images.

Videogames Ralph H. Baer, 2005

*Developing Serious Games* Bryan P. Bergeron, 2006 Describes the various types of serious games, including military, academic, and medical, and provides information on their economic potential, customer base, and design.

**Killer UX Design** Jodie Moule, 2012-09-20 Today, technology is used to shift, sway and change attitudes and behavior. This creates amazing opportunities and challenges for designers. If we want to create products and services that have the power to educate people so they may live better lives, or help to reduce the time people take to do certain tasks, we first need an understanding of how these people think and work - what makes them tick. The premise of this book is the need to understand how people behave; their habits, motivators and drivers, as a critical way to better understand what a great customer experience for your audience looks like, facilitating better design decisions. The book will lead you from understanding behavior, to extracting customer insights that can launch you into the design of something that makes a difference to people's lives - all presented in a fun, practical and non-academic way.

**De Chirico** Giorgio De Chirico, 1996 Giorgio de Chirico (1888-1978) is widely regarded as one of the masters of 20th century art. The originator of Metaphysical Painting, and precursor of the Surrealists, de Chirico was born in Volos, Greece, studied at the Academy of Fine Arts in Munich, and was initially influenced by Bocklin and Klinger. However he soon developed his own distinctive style, producing the first of his 'enigmatic' paintings in Italy around 1910. De Chirico's early works evoked an uneasy atmosphere through their use of strange perspectives, illogical shadows and open spaces, and he developed a theory of 'metaphysical insight' which located familiar objects in essentially mysterious relationships. In de Chirico's oeuvre a naturalistic vision always alternates, like waking and sleeping or dreaming, with another vision presenting abnormal forms and situations. If de Chirico's first period of Metaphysical painting between 1910 and 1918 - remains his most celebrated, and has provided us with some of his most memorable images, it is also true that his later Metaphysical period was also a time of intense creativity and evocative art-making. But this period is his least well known. De Chirico moved on from his baroque and romantic paintings of the Forties and Fifties - works which diminished his standing among a number of art critics - to a 'new' Metaphysical period which related strongly to the rich, early phase of his work. This book is a celebration of that period in de Chirico's career, and evaluates not only his paintings, but also the mythic and symbolic sculptures produced at this time. *De Chirico: The New Metaphysics* is an essential resource for any reader interested in appreciating de Chirico's unique contribution to 20th century art.

**Modernism** Christopher Wilk, 2006 Modernism flourished from 1914 to 1939 and it was a key point of reference for 20th century architecture, design and art. This work explores Modernism and design from an international perspective and reveals the ways in which it has shaped our world and its

visual culture.

**The Art of Wargaming** Peter P. Perla, 1990 The author discusses fundamental principles and techniques governing the design and use of war games.

**Networking and Mobile Computing** Xicheng Lu, Wei Zhao, 2005-09-06 Welcome to Zhangjiajie for the 3rd International Conference on Computer Network and Mobile Computing (ICCNMC 2005). We are currently witnessing a proliferation in mobile/wireless technologies and applications. However, these new technologies have ushered in unprecedented challenges for the research community across the range of networking, mobile computing, network security and wireless web applications, and optical network topics. ICCNMC 2005 was sponsored by the China Computer Federation, in cooperation with the Institute for Electrical and Electronics Engineers (IEEE) Computer Society. The objective of this conference was to address and capture highly innovative and state-of-the-art research and work in the networks and mobile computing industries. ICCNMC 2005 allowed sharing of the underlying theories and applications, and the establishment of new and long-term collaborative channels aimed at developing innovative concepts and solutions geared to future markets. The highly positive response to ICCNMC 2001 and ICCNMC 2003, held in Beijing and Shanghai, respectively, encouraged us to continue this international event. In its third year, ICCNMC 2005 continued to provide a forum for researchers, professionals, and industrial practitioners from around the world to report on new advances in computer network and mobile computing, as well as to identify issues and directions for research and development in the new era of evolving technologies.
