The Complex World of Abigail Mccarthy Gary L. Brenden, 2017-07-31 Tragedy often strikes when least expected, as was the case with Abigail McCarthy. It was during the prosperous fifties when disaster struck, when life should have been filled with optimism and joyous possibilities. It was a time when Abigail was just beginning to enter midlife, a peaceful time, before unwelcome signs of what was to come would make themselves known. But little did she know how tragedy can alter a persons life, forcing them to take journeys they never would have thought possible, searching for answers that are very difficult to find. From having lived a sheltered life on a small prairie farm, Abigail ventured to the great cities of Paris and Rome and on to the desert countries of North Africa, searching for an understanding. What she discovered along the way would change her life forever in ways she never thought possible.

Leif the Leaf Carol Hansen Moffat, 2010-09 Leif the Leaf is to deforestation as Smoky the Bear is to forest fires. It's time to recover our forests. Nature chooses a leaf from an extremely old apple tree to contact humans regarding matters of deep concern. Two children take a journey of discovery as they figure out what a mysterious poem means. What is so important about compost, and why is the Earth losing topsoil? Why are forests changing to deserts? Why is our weather changing? The planet is getting warmer. How are the animals and plants affected? Has this ever happened before? The children are taken back to ancient times and learn about the champions that tamed the weather. Armed with new insights and knowledge, they face the daunting challenge of persuading other humans to see the importance of trees. Finally succeeding at convincing people, they begin the process of turning deforestation into reforestation. CAROL HANSEN MOFFAT lives in New Jersey where she offers instruction and workshops in conflict resolution, reading, and math. Using skills and abilities

gained from a B.S. in Education at Rowan University and an M.A. in Behavioral Science from Kean University of New Jersey, Carol shares her love of the earth by advocating for environmental organizations and causes. She finds joy in spending as much time as possible with her grandchildren, in whose best interest the heritage of nature's bounty must be preserved.
