Two Voyages David Horry,2018-01-24 New Zealand was the last major habitable land on Earth to be populated. Many associate the discovery of New Zealand with James Cook, but he was not the first to venture to this isolated part of the Earth. When James Cook landed in New Zealand in July 1769 he landed at what is now known as Gisborne, on the east coast of the North Island. It is in the latitude 38°40'S, and Cook was not sailing this latitude accidentally. The west coast of New Zealand was first revealed on a published map in 1648. James Cook knew exactly where he was going; Abel Tasman had been there in 1642 and Cook had a copy of his chart and journal. The motivation behind Tasman's voyage was profit. He was not voyaging into the unknown for fame, glory or fortune; he was a salaried employee of the Dutch East India Company, a multinational trading company. His mission was to find new lands with goods to trade. He first saw New Zealand on 13th December 1642. Five days later he had a dramatic encounter with the locals; a tribe of Māori called Ngāti Tūmatakōkiri. This was the first meeting of Māori and Europeans. Tasman had not found an empty land; it had already been discovered and settled. New Zealand was discovered by Polynesians from the Central Pacific around 950 AD, but remained only sparsely populated for three hundred years. In approximately 1300 AD a wave of Polynesian migration began. The immigrants that went to New Zealand did so for self-preservation. They risked the voyage to New Zealand to escape warfare, death or starvation. On 19th December 1642 Abel Tasman's crews met the locals with fatal consequences. Those local Māori were descendants of the crew of the waka Kurahaupō who had arrived in New Zealand about 300 years earlier. Two Voyages follows the journeys of the waka Kurahaupō, its occupants and their descendants; and Abel Tasman and his crew. It follows the journeys from their origins, to their point of coincidence in Golden Bay. This wonderfully illustrated book explores the discovery of New Zealand by the Polynesians, and by the Europeans after them. It looks at the factors giving impetus to the two journeys, the people who undertook them, their routes, the means by which they travelled, and their tragic first meeting. There are many books about the history of New Zealand that begin with the arrival of Europeans; this one ends there.

Science Fiction Television Series Mark Phillips, Frank Garcia,2014-05-12 Whether rocketing to other worlds or galloping through time, science fiction television has often featured the best of the medium. The genre's broad appeal allows youngsters to enjoy fantastic premises and far out stories, while offering adults a sublime way to view the human experience in a dramatic perspective. From Alien Nation to World of Giants, this reference work provides comprehensive episode guides and cast and production credits for 62 science fiction series that were aired from 1959 through 1989. For each episode, a brief synopsis is given, along with the writer and director of the show and the guest cast. Using extensive research and interviews with writers, directors, actors, stuntmen and many of the show's creators, an essay about each of the shows is also provided, covering such issues as its genesis and its network and syndication histories.

May the Armed Forces Be with You Stephen Dedman,2016-08-30 Science fiction and the United States military often inhabit the same imaginative space. Weapons technology has taken inspiration from science fiction, from the bazooka and the atomic bomb to weaponized lasers and drones. Star-spangled superheroes sold war bonds in comic books sent to GIs during World War II, and adorned the noses of bombers. The same superheroes now appear in big-budget movies made with military assistance, fighting evil in today's war zones. A missile shield of laser satellites--dreamed up by writers and embraced by the high command--is partially credited with ending the Cold War. Sci-fi themes and imagery are used to sell weapons programs, military service and wars to the public. Some science fiction creators have willingly cooperated with the military; others have been conscripted. Some have used the genre as a forum for protest. This book examines the relationship between the U.S. military and science fiction through more than 80 years of novels, comics, films and television series, including Captain America, Starship Troopers, The Twilight Zone, Dr. Strangelove, Star Trek, Iron Man, Bill the Galactic Hero, The Forever War, Star Wars, Aliens, Ender's Game, Space: Above and Beyond and Old Man's War.

A Voyage in the 'Sunbeam' Annie Brassey,1907

A Voyage in the Sunbeam Annie Brassey,2017-11-09 Deemed by the Wall Street Journal as one of the five best books about female adventurers, A Voyage in the Sunbeam is a collection of Annie Brassey's journal entries of her voyage around the world with her family (husband and four children), crew (38 members), two dogs, three birds, and a charming Persian kitten (who disappeared early into the voyage) aboard a 157-foot steam-powered yacht. Starting at noon on July 1, 1876, they sailed from England and visited South America, the South Pacific, Asia, and the Middle East, returning back home on May 26, 1877. A best-seller in its day, with its descriptions of exotic locales and ship life, this book was even used as a textbook in the United States.
