**My Car** Byron Barton, 2016-04-12 Beep! Beep! My car has wheels. My car has gas. The horn goes beep. Come take a ride. An American Library Association Notable Book for Children Winner of a Parenting Magazine Reading Magic Award

**I Like My Car** Michael Robertson, 2018-10-23 Cars, colors, and funny animals abound in this simple Level B I Like to Read book for young readers. The rhino loves his red car . . . which just happens to have a rhino-horn hood ornament. And the alligator loves her green car that has sharp teeth and spikes just like hers! The shark's car has a fin and a tail. The funny animals in this book match their equally funny cars as they all make their way to a party! With very simple text and detailed, cartoonish illustrations, this is a great read-aloud for kids who love cars-- and an ideal book for beginning readers just learning to read on their own. The award-winning I Like to Read® series focuses on guided reading levels A through G, based upon Fountas and Pinnell standards. Acclaimed author-illustrators--including winners of Caldecott, Theodor Seuss Geisel, and Coretta Scott King honors--create original, high-quality illustrations that support comprehension of simple text and are fun for kids to read again and again with their parents, teachers or on their own! Level B books, suitable for kindergarten readers, feature short sentences and high-frequency words. The illustrations provide clues to word meanings. When Level B is mastered, follow up with Level C.

*My Car Myself* Michael J. Lincoln, 1991-08-01

**Where Is My Flying Car?** J. Storrs Hall, 2021-11-30 From an engineer and futurist, an impassioned account of technological stagnation since the 1970s and an imaginative blueprint for a richer, more abundant future The science fiction of the 1960s promised us a future remade by technological innovation: we'd vacation in geodesic domes on Mars, have meaningful conversations with computers, and drop our children off at school in flying cars. Fast-forward 60 years, and we're still stuck in traffic in gas-guzzling sedans and boarding the same types of planes we flew in over half a century ago. What happened to the future we were promised? In *Where Is My Flying Car?*, J. Storrs Hall sets out to answer this deceptively simple question. What starts as an examination of the technical limitations of building flying cars evolves into an investigation of the scientific, technological, and social roots

of the economic stagnation that started in the 1970s. From the failure to adopt nuclear energy and the suppression of cold fusion technology to the rise of a counterculture hostile to progress, Hall recounts how our collective ambitions for the future were derailed, with devastating consequences for global wealth creation and distribution. Hall then outlines a framework for a future powered by exponential progress—one in which we build as much in the world of atoms as we do in the world of bits, one rich in abundance and wonder. Drawing on years of original research and personal engineering experience, *Where Is My Flying Car?*, originally published in 2018, is an urgent, timely analysis of technological progress over the last 50 years and a bold vision for a better future.
