Debra Picchi; Thomas Desrosiers

A History of Sailing in 100 Objects Barry Pickthall, 2016-08-25 Did you ever wonder which civilisation first took to water in small craft? Who worked out how to measure distance or plot a course at sea? Or why the humble lemon rose to such prominence in the diets of sailors? Taking one hundred objects that have been pivotal in the development of sailing and sailing boats, the book provides a fascinating insight into the history of sailing. From the earliest small boats, through magnificent Viking warships, to the technology that powers some of the most sophisticated modern yachts, the book also covers key developments such as keeps and navigational aids such as the astrolabe, sextant and compass. Other more apparently esoteric objects from all around the world are also included, including the importance of citrus fruit in the prevention of scurvy, scrimshaw made from whalebone and the meaning of sailor's tattoos. Beautifully illustrated with lively and insightful text, it's a perfect gift for the real or armchair sailor, the book gives an alternative insight into how and why we sail the way we do today.

A Woman's Guide to the Sailing Lifestyle Debra Picchi; Thomas Desrosiers, 2015-09-18 A chance sailing trip with a friend from work led me to wonder if I could learn to sail. After all, I'm a woman, and the sailing world seems to favor men. I am not athletic; I didn't grow up in a family where we learned about boating; I would be starting late, since I was in my thirties; and I suffer from seasickness. What I discovered over the next twenty-five years is that I could indeed learn to be a competent sailor. But I didn't expect to be an expert overnight. Instead, as a novice, I layered on new knowledge slowly, over time, through experiential learning. This book describes the process whereby this happened. Using examples from trips along the coast of Maine, New Hampshire, and Massachusetts, it reviews the essential knowledge needed to be a sailor as well as explanations about the parts of a sailboat, major boat systems, and tasks associated with maintaining a sailboat. It also discusses some Zen-like attitudes that lead to successful and fun sailing, such as focusing, the no-blame rule, and stripping down to the essentials. Unlike some other sailing guides, this book points out that sailing can be a lifestyle that includes many dimensions. It's not just about getting a boat to sail. Traveling by boat is a unique experience, and visiting small coastal New England communities is an adventure. Learning about history, art, ecology, star constellations, technology, and birds are only a few of the kinds of activities that can be built into a rich and rewarding sailing experience. This book will be helpful for people who would like to learn to sail but who are intimidated by the process, particularly women, fledgling sailors just starting out, and families with children.

I've Been Around Tania Aebi, 2005 In 1985, at the age of 18, Tania Aebi set out to sail around the world alone. In this volume she presents a compendium of sailing experience and reflections. It is suitable reading for the armchair sailor dreaming about sailing one day, as well as the sailor in the cockpit actively chasing those horizons.

It is the cheapest bit of go-faster gear you can buy....--Robert Lloyd, Island

Sail Tales Robert Engel,2009-08 Sail Tales is about the adventures a humble sailboat owner had over the years. So where does one start writing about these adventures? You start at the beginning. That beginning was in 1967 when I was helping a friend of mine, Frank, re-build an old wooden boat that he had bought. Frank took the whole boat apart and then rebuilt it from the frames up. It was a sleek little craft and I found myself involved in his project. Frank found a similar craft and with his promise of help, I bought it. I spent the whole winter and most of the spring doing the things that had to be done to the boat to get it ready for the summer of 69. I knew nothing about sailing. But how hard could it be to learn? I soon found out. My sailing adventures started that summer. I learned quickly that unlike a power boat, a sailboat is not a craft that you get aboard, turn a key and then drive it like a car. You have to sail the boat. You have to do what the wind lets you do. You can't go directly where you want to go because the wind won't allow it. You have to finesse, you have to be diplomatic, you have to learn to tweak a sail rather than over trim. Well, I learned to get that sailboat from point to point. I also learned that time on a sailboat is not the same as time on land and I learned this on my very first trip on my first sailboat. That three hour trip ended up taking thirteen hours. Read about it. The time of a sailboat trip can not be predicted. If you need to get to a certain place at a certain time take a bus not a sailboat. An afternoon trip has more than once become a late nighter. Leave your watches ashore. That's what I tell everyone before they step foot aboard. I don't know what time we'll be back but I'm certain that we will be back. My very first sailboat trip was not a late nighter but rather an early morning return. Speaking of time, How long does it take you to hang a calender on your wall? You get a stick pin and put it through a hole in the calender and stick the pin in the cork board. Thirty seconds? It took me the better part of three hours to hang a calender on the boat. First I had to get the tape from the old calender off the wall. For this project I had to find the razor blade scrapper. Then I had to run to the hardware store to get new blades for it. The scrapper got the top layer of the tape off the wall but the sticky part of the tape just rolled up into little balls. I had to go back to the hardware store for some solvent to get the sticky balls off the wall. Then and only then was I able to re-tape the new calender to the wall. I have since put the scrapper in it's place so I can find it next time. I hope I remember that place. Imagine what a project it is to install a new pedestal steering system or an new diesel engine. Imagine the time it takes to make an old boat a safe craft, a boat ready to sail, and the keyword is safe. It took me the better part of four years to make my Morgan 38 the boat I wanted it to be. And notice I'm not saying anything about the cost. That's another story. And these are some of the stories I tell. This is the third boat I have redone. But it is the last boat that I will redo. I'm getting too old for this rebuilding stuff. Parts of Sail Tales tells about projects such as what I have just described. But the majority of the stories are about sailing trips where something happens. If you are a sailor or if you own a sailboat, sit back and try to remember trips that were dull and boring. They don't pop into your mind. But what does pop are the adventures, the thrill of the wind that is blowing just a bit harder than you would like. You remember the trips where the rail is in the water for most of the day and how you were able to keep the boat under control. You remember the trips where there was no wind and the day became a motor day. You remember entering an anchorage and

finding someone there from your marina or someo
