Flea in the Dark Devon Stevens,2018-10-11 Teresa just wants to spend the long weekend having fun with friends. But her parents stick her with taking care of her stupid little half-sister, Felicia-Flea. But Teresa refuses to let Flea ruin her weekend plans, so she drags Flea with her to the banks of the Rio Grande, where Teresa meets up with her friends to drink beer and smoke weed. In the midst of a lunar eclipse, painting the riverside blood red, Flea runs into the thick undergrowth of Albuquerque's Bosque Trail. When Teresa goes to find her, she catches only a glimpse of Flea before she vanishes with La Llorona, the mythical child-stealing ghost. Frantic, Teresa entreats a witch to enable her to find her sister. To do so, she must travel to an alternate Albuquerque, where the past and present are one and madness reigns. *Flea in the Dark* marks the debut of Devon Stevens, who deftly incorporates elements of Southwestern folklore and Lovecraftian horror. This compelling modern fantasy explores the intricacies of a mixed-race family, the absurdity of discrimination based on appearance, and the difficulty in coming to terms with the past to discover a greater capacity to love.

Introduction to Senior Transportation Helen K. Kerschner, Nina M. Silverstein, 2018-01-31 Introduction to Senior Transportation focuses on an issue that is a growing concern—the community mobility needs of older adults. Surpassing the coverage available in existing gerontology textbooks, it enables the reader to understand and appreciate the challenges faced by older adults as they make the transition from driving to using transportation options (many of which were not designed to meet their particular needs). It considers the physical and cognitive limitations of older adult passengers, the family of transportation services, the challenges providers face in meeting the assistance and support needs of senior passengers, and the transportation methods that do and do not currently meet the needs and wants of senior passengers. This textbook addresses the educational and professional development needs of faculty, students, and practitioners working in the fields of aging, aging services, and transportation. The book has been class-tested and features innovative, practical learning tools that appeal to students and practitioners. It complements any introductory course in gerontology, human development and aging, or human factors, and will enhance the curriculum of programs in the social behavioral sciences as well as traffic safety, transit engineering, and community planning.
