Terror on the Screen Luke Howie, 2011 Through dazzling close readings of a wide variety of cultural texts, from the *Battlestar Galactica* reboot to post-9/11 pornography, Howie is able to demonstrate how the politics and poetics of witnessing' have come to structure the experience of American popular culture in the past decade.--Jeff Melnick, University of Massachusetts, Boston.

**Walls are Talking** Gill Saunders, Dominique Heyse-Moore, Trevor Keeble, 2010 Featuring works by more than 30 international artists, including Sonia Boyce, Thomas Demand, Robert Gober, Damien Hirst, Abigail Lane, Francesco Simeti, and Niki de Saint Phalle, this collection puts wallpaper in context by showing how historic wallpaper motifs, styles, and methods are used in contemporary art and how existing patterns have been adapted and subverted to telling effect. Inherently ephemeral and often overlooked, wallpaper has hardly been the most obvious medium for a contemporary avant-garde artist; however, during the past two decades, artists exploring themes of home, memory, and identity have created installations with backdrops of specially designed wallpaper which has played a crucial part in the mise en scene. Some of the wallpapers are pictorial polemics that illustrate warfare or racism, and others show obvious conflicts in contemporary Western culture, in particular those associated with gender and sexuality.

**Resolutions** Michael Renov, Erika Suderburg, 1996 *Resolutions* provides, by far, the best, boldest, and most thorough account to date of video art and activism, practice, and theory. The long-awaited follow-up to a project conducted by Los Angeles Contemporary Exhibitions (LACE), this volume presents original articles by many of the most interesting video artists, filmmakers, and critical theorists writing today. Their subjects, from video pedagogy to emerging technologies, are many and varied and together constitute a clear and complete picture of the state of the medium. Constructed like an inquiry into newly forming video practice, the collection at once interweaves and questions a series of relationships among politics, popular culture, artistic intervention, and social practices. The often provocative essays, on topics ranging from video porn to Geraldo Rivera to lesbian representation to the politics of video memory, contribute significantly to a much needed reconceptualization of the electronic medium.

You Will Never Be Forgotten Mary South, 2020-03-10 In this provocative, bitingly funny debut collection, people attempt to use technology to escape their uncontrollable feelings of grief or rage or despair, only to reveal their most flawed and human selves. An architect draws questionable inspiration from her daughter's birth defect. A content moderator for "the world's biggest search engine," who spends her days culling videos of beheadings and suicides, turns from stalking her rapist online to following him in real life. At a camp for recovering internet trolls, a sensitive misfit goes missing. A wounded mother raises the second incarnation of her child. In *You Will Never Be Forgotten*, Mary South explores how technology can both collapse our relationships from within and provide opportunities for genuine connection. Formally inventive, darkly absurdist, savagely critical of the increasingly fraught cultural climates we inhabit, these ten stories also find hope in fleeting interactions and moments of tenderness. They reveal our grotesque selfishness and our intense need for love and acceptance, and the psychic pain that either shuts us off or allows us to discover our deepest reaches of empathy. This incendiary debut marks the arrival of a perceptive, idiosyncratic, instantly recognizable voice in fiction—one that could only belong to Mary South.

Modelling and Motion Capture Techniques for Virtual Environments Nadia Magnenat-Thalmann, Daniel Thalmann, 2003-05-20 The CAPTECH'98 workshop took place at the University of Geneva on November 26–27, 1998, sponsored by FIP Working Group 5.10 (Computer Graphics and Virtual Worlds) and the Suisse Romande regional doctoral seminar in computer science. The subject of the conference was ongoing research in data capture and interpretation. The goals of capturing real world data in order to perceive, understand, and interpret them and then reacting to them in a suitable way are currently important research problems. These data can be very diverse: sounds, emotions, shapes, motions, forces, muscles, actions, etc. Once captured, they have to be treated either to make the invisible visible, or to understand a particular phenomenon so as to formulate an appropriate reaction, or to integrate various information in a new multimedia format. The conference included six sessions of presented papers and three panel discussions. Invited speakers treating various aspects of the topic were: Professor R. Earnshaw from Bradford University, Professor T. L. Kunii from Hosei University, and Professor P. Robert from EPFL. Professor K. Bauknecht, of the University of Zürich, President of IFIP, offered the welcoming address. Mr. E. Badique, project officer for the EU in Brussels, discussed recent results of the EU ACTS research program. Finally, the Geneva Computer Animation '98 Film Festival highlighted the evening of November 26.

*Wallpapers in Historic Preservation* Catherine Lynn, 1977 The papered and bordered wall was an important feature of American interiors during the 18th, 19th, and early 20th centuries. Paper hangings, both imported and of domestic manufacture, were more widely used than many of our restored buildings might lead us to believe. This book attempts to catalog and describe the variety, as well as accounting for restoration and preservation of pieces as part of the historical record. --Amazon.

*Shaping emotions* Elisabetta Cianfanelli, Gabriele Goretti, 2015-04-17 Il Product Advanced Design è la nuova frontiera nella ricerca della Scuola fiorentina del Design. L'ambito disciplinare si concentra sui concetti dell'interaction design, ovvero l'innovazione del sistema-prodotto attraverso applicazioni tecnologiche e formali che sviluppino nuovi rapporti dialettici tra user e artefatto. Ciò significa porre lo user e le proprie richieste di performance e funzioni, i suoi valori antropometrici, nonché i suoi desideri e le sue emozioni, al centro del processo creativo. Nello studio di un sistema prodotto UX (user experience) il rapporto forma/funzione si trasforma in forma/performance, in cui ritroviamo il dialogo tra valori tangibili - formali, sensoriali e funzionali - e valori intangibili, quali i valori emozionali. Il tema qui affrontato assume un ruolo significativo nel posizionamento della cultura del progetto della scuola fiorentina in confronto con altre esperienze internazionali nel settore.

**A Tale Dark & Grimm** Adam Gidwitz, 2010-10-28 In this mischievous and utterly original debut, Hansel and Gretel walk out of their own story and into eight other classic Grimm-inspired tales. As readers follow the siblings through a forest brimming with menacing foes, they learn the true story behind (and beyond) the bread crumbs, edible houses, and outwitted witches. Fairy tales have never been more irreverent or subversive as Hansel and Gretel learn to take charge of their destinies and become the clever architects of their own happily ever after.

**aka Marcel Duchamp** Anne Collins Goodyear, James W. Mcmanus, 2014-12-30 aka Marcel Duchamp is an anthology of recent essays by leading scholars on Marcel Duchamp, arguably the most influential artist of the twentieth century. With scholarship addressing the full range of Duchamp's career, these papers examine how Duchamp's influence grew and impressed itself upon his contemporaries and subsequent generations of artists. Duchamp provides an illuminating model of the dynamics of play in construction of artistic identity and legacy, which includes both personal volition and contributions made by fellow artists, critics, and historians. This volume is not only important for its contributions to Duchamp studies and the light it sheds on the larger impact of Duchamp's art and career on modern and contemporary art, but also for what it reveals about how the history of art itself is shaped over time by shifting agendas, evolving methodologies, and new discoveries.

**Pilgrim at Tinker Creek** Annie Dillard, 2009-10-13 Winner of the Pulitzer Prize "The book is a form of meditation, written with headlong urgency, about seeing. . . . There is an ambition about her book that I like. . . . It is the ambition to feel." — Eudora Welty, New York Times Book Review Pilgrim at Tinker Creek is the story of a dramatic year in Virginia's Roanoke Valley, where Annie Dillard set out to chronicle incidents of beauty tangled in a rapture with violence. Dillard's personal narrative highlights one year's exploration on foot in the Virginia region through which Tinker Creek runs. In the summer, she stalks muskrats in the creek and contemplates wave mechanics; in the fall, she watches a monarch butterfly migration and dreams of Arctic caribou. She tries to con a coot; she collects pond water and examines it under a microscope. She unties a snake skin, witnesses a flood, and plays King of the Meadow with a field of grasshoppers. The result is an exhilarating tale of nature and its seasons.
