### **Community Analysis and Planning Techniques Richard E.**

Klosterman,1990-04-17 This book introduces and describes four techniques, which are at the core of professional practice and education: The first technique , curve-fitting/extrapolation, projects an area' s population, employment, or other characteristics by identifying and extending historical trends. The second technique, the cohort-component technique, projects an area' s population by dividing it into a uniform set of population subgroups or cohorts and applying the three components of population change-mortality, fertility, and migration-to each cohort. The third technique, the economic base technique, projects local economic change by dividing a local economy into basic and nonbasic sectors and by focusing analytic attention on the basic sector. The fourth technique, the shift-share technique, projects an area's economic activity by relating it to the activity of the state or nation in which it is located.

The Institutions of the Market Alexander Ebner,Nikolaus Beck,2008-07-31 Where do markets come from and what drives their evolution? How do organizations cope with the competitive dynamism of markets? What is the role of governance mechanisms in the institutional coordination of markets? In this book, leading social scientists consider these questions and examine the institutional foundations of economic change.

**The Advances of Endoscopic Skull Base Tumor Surgery: from Basic to Clinical Research** Peng Zhao,Yazhuo Zhang,Luigi Maria

Cavallo, Songbai Gui, 2023-11-09 For neurosurgeons, skull base neurosurgery is as complex, dangerous, challenging, and charming as Mount Everest. The vigorous development of neuroendoscopy has opened a new perspective for skull base neurosurgery. Due to the special structure of skull base, there are often blind spots left out by microscope, while neuroendoscopy is the promising technology to overcome the defects. With its minimally invasive advantages, neuroendoscopy is gradually becoming popular in neurosurgical operation. In recent years, neuroendoscopic surgery for pituitary adenoma, the anterior skull base and sellar turcica meningioma, clivus chordoma and tumors in the foramen magnum area have been reported, as well as for atlantoaxial lesions. Neuroendoscopy for skull base midline surgical area has attracted accumulating attention, and its application is widely used in basic and clinical research.
