With the academic job market in crisis, 'Leaving Academia' helps grad students and academics in any scholarly field find satisfying careers beyond higher education. The book offers invaluable advice to visiting and adjunct instructors ready to seek new opportunities, to scholars caught in tenure-trap jobs, to grad students interested in nonacademic work, and to committed academics who want to support their students and contingent colleagues more effectively. Academia's Golden Age Richard M. Freeland, 1992-04-23 This book examines the evolution of American universities during the years following World War II. Emphasizing the importance of change at the campus level, the book combines a general consideration of national trends with a close study of eight diverse universities in Massachusetts. The eight are Harvard, M.I.T., Tufts, Brandeis, Boston University, Boston College, Northeastern and the University of Massachusetts. Broad analytic chapters examine major developments like expansion, the rise of graduate education and research, the professionalization of the faculty, and the decline of general education. These chapters also review criticisms of academia that arose in the late 1960s and the fate of various reform proposals during the 1970s. Additional chapters focus on the eight campuses to illustrate the forces that drove different kinds of institutions--research universities, college-centered universities, urban private universities and public universities--in responding to the circumstances of the postwar years.

Good Work If You Can Get It Jason Brennan, 2020-05-05 What does it really take to get a job in academia? Do you want to go to graduate school? Then you're in good company: nearly 80,000 students will begin pursuing a PhD this year alone. But while almost all new PhD students say they want to work in academia, most are destined for something else. The hard truth is that half will quit or fail to get their degree, and most graduates will never find a full-time academic job. In *Good Work If You Can Get It*, Jason Brennan combines personal experience with the latest higher education research to help you understand what graduate school and the academy are really like. This candid, pull-no-punches book answers questions big and small, including • Should I go to graduate school—and what will I do once I get there? • How much does a PhD cost—and should I pay for one? • What does it take to succeed in graduate school? • What kinds of jobs are there after grad school—and who gets them? • What happens to the people who never get full-time professorships? • What does it take to be productive, to publish continually at a high level? • What does it take to teach many classes at once? • How does publish or perish work? • How much do professors get paid? • What do search committees look for, and what turns them off? • How do I know which journals and book publishers matter? • How do I balance work and life? This realistic, data-driven look at university teaching and research will help make your graduate and postgraduate experience a success. *Good Work If You Can Get It* is the guidebook that anyone considering graduate school, already in grad school, starting as a new professor, or advising graduate students needs. Read it, and you will come away ready to hit the ground running.

Mothers in Academia Maria Castaneda, Kirsten Isgro, 2013-06-18 Featuring forthright testimonials by women who are or have been mothers as undergraduates, graduate students, academic staff, administrators, and professors, *Mothers in Academia* intimately portrays the experiences of women at various stages of motherhood while theoretically and empirically considering the conditions of working motherhood as academic life has become

more laborious. As higher learning institutions have moved toward more corporate-based models of teaching, immense structural and cultural changes have transformed women's academic lives and, by extension, their families. Hoping to push reform as well as build recognition and a sense of community, this collection offers several potential solutions for integrating female scholars more wholly into academic life. Essays also reveal the often stark differences between women's encounters with the academy and the disparities among various ranks of women working in academia. Contributors--including many women of color--call attention to tokenism, scarce valuable networks, and the persistent burden to prove academic credentials. They also explore gendered parenting within the contexts of colonialism, racism, sexism, ethnocentrism, ageism, and heterosexism.

Governing Academia Ronald G. Ehrenberg, 2016-10-01 Public concern over sharp increases in undergraduate tuition has led many to question why colleges and universities cannot behave more like businesses and cut their costs to hold tuition down. Ronald G. Ehrenberg and his coauthors assert that understanding how academic institutions are governed provides part of the answer. Factors that influence the governance of academic institutions include how states regulate higher education and govern their public institutions; the size and method of selection of boards of trustees; the roles of trustees, administrators, and faculty in shared governance at campuses; how universities are organized for fiscal and academic purposes; the presence or absence of collective bargaining for faculty, staff, and graduate student assistants; pressures from government regulations, donors, insurance carriers, athletic conferences, and accreditation agencies; and competition from for-profit providers. *Governing Academia*, which covers all these aspects of governance, is enlightening and accessible for anyone interested in higher education. The authors are leading academic administrators and scholars from a wide range of fields including economics, education, law, political science, and public policy.

Academia Next Bryan Alexander, 2020-01-14 An unusually multifaceted approach to American higher education that views institutions as complex organisms, *Academia Next* offers a fresh perspective on the emerging colleges and universities of today and tomorrow.

Questing Excellence in Academia Knut H. Sørensen, Sharon Traweek, 2022-01-29 Unlike almost most other studies of neoliberal universities and academic capitalism this book ethnographically explores and interprets those transformations and their contradictions empirically in the everyday practices of students, faculty members, and administrators at two public universities: NTNU in Norway and UCLA in California. Differently situated in global political economies, both are ambitious, prosperous campuses. The book reflexively examines their disturbing disputes about quality, competition, and innovation. It argues that some academic, bureaucratic, and corporate university governance practices are both unsustainable and undermining what some university students and faculty already do well: circulate interdisciplinary knowledge and its making globally across the diasporic domains of academia, society, industry, and government while addressing the world's immediate challenges: power, inequities, and sustainability. It shows the important, strategic work of domesticating, co-morphing, and meshworking at the faultlines of emerging knowledge. This book is for students, faculty, society members, and policy makers who want to engage more effectively with contemporary universities that increasingly serve as busy crossroads for sharing ideas and how to make them. It will be of interest to workers and scholars in the interdisciplinary fields of higher education studies, critical university studies, and critical public infrastructure studies, plus science, technology, and society studies. A New Paradigm in Marketing – The Service Dominant Logic: Academia's Reactions to the Theory of Vargo and Lusch Christina Weißenfels, 2014-04 For virtually all of the 20th century, the paradigm in marketing was founded on early economic thoughts, making goods and exchanges the focal point of economic research and practice. In the 1980s and 1990s, scholars called for a paradigm shift, but did not deliver clear directives on how to move forward. It was not before 2004 when Stephen L. Vargo and Robert F. Lusch published their award-winning article *Evolving to a New Dominant Logic for Marketing* in the *Journal of Marketing*, dealing with a potentially new paradigm for marketing. The publication has caused a lot of discussions, crowned by a collection of essays from more than 50 scholars in

2006. This book aims at looking into the reactions and discussions regarding the proposed service-dominant logic in more detail. So far, no comprehensive overview of the existing literature has yet been made. This book will introduce the basic ideas of the service-dominant logic, followed by a detailed state-of-literature. The last part of the book will examine whether the concepts of a service-dominant logic display similarities with concepts of B2B marketing and whether they could successfully be adopted in B2B markets.

Universities as Complex Enterprises William B. Rouse, 2016-05-31 Explores the nature of academic enterprises, including why they work the way they do and where such enterprises are headed, with the goal of gaining insights into where change can and will happen. This book looks at universities from a whole-enterprise perspective. It explores the steady escalation of the costs of higher education and uses a computational economic model of complex academic enterprises. This model includes component models of research, teaching, administration, and brand value. Understanding the relationships among practices, processes, structure, and ecosystem provides the basis for transforming

academia, leveraging its strengths and overcoming its limitations. More specifically, this architecture helps the reader understand how various elements of the enterprise system either enable or hinder other elements of the system, all of which are embedded in a complex behavioral and social ecosystem. Each topic is explored in terms of the levels of the architecture at which it primarily functions. Levers of change within each area are discussed, using many experiences of pursuing such issues in a range of academic enterprises.

- Provides a new methodology by taking a more systems-oriented approach to education systems as a whole
- Shows how various elements of the enterprise system either enable or hinder other elements of the system
- Offers alternative strategies for transformation of academic enterprises

The Temple House Vanishing Rachel Donohue, 2021-07-06 The New York Times Best Thrillers of 2021 Steamily atmospheric . . . A twisted Gothic tale, emotional in its language and febrile in its atmosphere, and it will appeal to readers who love to hear about obsession, repression . . . and poetic justice.” —The New York Times Book Review Louisa is the new scholarship student at Temple House, a drafty, imposing cliffside boarding school full of girls as chilly as the mansion itself. There is one other outsider, an intense and compelling student provocateur named Victoria, and the two girls form a fierce bond. But their friendship is soon unsettled by a young art teacher, Mr. Lavelle, whose charismatic presence ignites tension and obsession in the cloistered world of the school. Then one day, Louisa and Mr. Lavelle vanish without a trace, never to be found. Now, on the twenty-fifth anniversary of the disappearance, one journalist—a woman who grew up on the same street as Louisa—delves into the past, determined to uncover the truth. She finds stories of jealousy and revenge, power and class. But might she find Louisa and Mr. Lavelle, too? Told in alternating points of view, *The Temple House Vanishing* is tense, atmospheric, and page-turning . . . with a shocking, ingenious conclusion. An Irish Bestseller and finalist for the Irish Book Awards Newcomer of the Year

Clueless in Academe Gerald Graff, 2004-07-11 In a refreshing departure from standard diatribes against academia, Graff shows how academic unintelligibility is unwittingly reinforced not only by jargon and obscure writing, but by the disconnection of the curriculum and the failure to exploit the many connections between academia and popular culture. Finally, Graff offers a wealth of practical suggestions for making the culture of ideas and arguments more accessible, showing how students and the wider public can enter the debates that permeate their lives.--BOOK JACKET.

Thinking Confederates Dan R. Frost, 2000 Dan Frost shows how, inspired by the idea of progress, these men set about transforming Southern higher education. Recognizing the north's superiority in industry and technology, they turned their own schools from a classical orientation to a new emphasis on science and engineering. These educators came to define the Southern idea of progress and passed it on to their students, thus helping to create and perpetuate an expectation for the arrival of the New South.--BOOK JACKET.
