Secret Hidden Pictures® Animal Puzzles Highlights,2020-04-08 A travel-size collection of Hidden Pictures® puzzles offers a magical puzzling experience when kids use the included wand to reveal hundreds of hidden objects within the scenes. This innovative book has cleverly disguised animal puzzles kids can reveal with a handy seek-and-find wand that's included on the cover. In the orange on teal puzzles, kids will hunt for hidden objects with animals in the jungle, on the farm, and even in outer space! Perfect to take along on airplane or car trips, or as a rainy-day activity for the whole family, this is also a spectacular gift for any occasion.

We Animals Jo-Anne McArthur,2013-12-01 Drawn from a thousand photos taken over fifteen years, We Animals illustrates and investigates animals in the human environment: whether they're being used for food, fashion and entertainment, or research, or are being rescued to spend their remaining years in sanctuaries. Award-winning photojournalist and animal advocate Jo-Anne McArthur provides a valuable lesson about our treatment of animals, makes animal industries visible and accountable, and widens our circle of compassion to include all sentient beings.

Backpacker ,2001-03 Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Marx for Cats Leigh Claire La Berge,2023-10-02 At the outset of Marx for Cats, Leigh Claire La Berge declares that “all history is the history of cat struggle.” Revising the medieval bestiary form to meet Marxist critique, La Berge follows feline footprints through Western economic history to reveal an animality at the heart of Marxism. She draws on a twelve-hundred-year arc spanning capitalism's feudal prehistory, its colonialist and imperialist ages, the bourgeois revolutions that supported capitalism, and the communist revolutions that opposed it to outline how cats have long been understood as creatures of economic critique and liberatory possibility. By attending to the repeated archival appearance of lions, tigers, wildcats, and “sabo-tabbies,” La Berge argues that felines are central to how Marxists have imagined the economy, and by asking what humans and animals owe each other in a moment of ecological crisis, La Berge joins current debates about the need for and possibility of eco-socialism. In this playful and generously illustrated radical bestiary, La Berge demonstrates that class struggle is ultimately an interspecies collaboration.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are

needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Modern Methods in Protein Nutrition and Metabolism Steven Nissen,2012-12-02 Modern Methods in Protein Nutrition and Metabolism grew out of a series of seminars (Modern Views in Nutrition) held in 1989 at Iowa State University. These seminars and this book were financed primarily through the Wise and Helen Burroughs Lectureship endowment generously established by the late Dr. Wise Burroughs and his wife Helen. This book comprises 12 chapters, and begins with a focus on amino acid analysis in food and physiological samples. Succeeding chapters go on to discuss concepts and techniques on nitrogen balance; determination of the amino acid requirements of animals; and novel methods for determining protein and amino acid digestibilities in feedstuffs. Other chapters cover measurement of protein digestion in ruminants; evaluation of protein status in humans; surgical models to measure organ amino acid metabolism in vivo; and measurement of whole-body protein content in vivo. The remaining chapters discuss estimation of protein synthesis and proteolysis in vitro; isotopic estimation of protein synthesis and proteolysis in vivo; n-glycine as a tracer to study protein metabolism in vivo; and mathematical models of protein metabolism. This book will be of interest to practitioners in the fields of human nutrition and medicine.
