*HC 231 - Counter-Terrorism* Great Britain: Parliament: House of Commons: Home Affairs Committee, Keith Vaz, 2014-05-09 Recent events involving Boko Haram, Al-Shabab and Al Qaeda show that the terrorist threat to the UK is as grave as at any point in the past thirteen years. Interpol have the resources and experience to build a platform and the UK must take the lead in bringing others to the table. However, ensuring public safety cannot be the sole purview of the counterterrorism command and the security service, it is a responsibility in which all UK citizens and companies take a share. Stopping British men and women going to become foreign fighters, in Syria and other theatres of conflict, and

engaging with them when they return is vital to avoid endangering the security of the UK. Whether in classrooms, local community centres, or through the global reach of the internet and social media, a clear message needs to be sent to those at risk. The agencies are at the cutting edge of sophistication and are owed an equally refined system of democratic scrutiny. It is an embarrassing indictment of our system that some in the media felt compelled to publish leaked information to ensure that matters were heard in Parliament. The Intelligence and Security Committee should be given a democratic mandate in the same way as other Select Committees

**Historian's Guide to Early British Maps** Helen Wallis, Anita McConnell, 1995-04-06 Great Britain and Ireland enjoy a rich cartographic heritage, yet historians have not made full use of early maps in their writings and research. This is partly due to a lack of information about exactly which maps are available. With the publication of this volume from the Royal Historical Society, we now have a comprehensive guide to the early maps of Great Britain. The book is divided into two parts: part one describes the history and purpose of maps in a series of short essays on the early mapping of the British Isles; part two comprises a guide to the collections, national and regional. Now available from Cambridge University Press, this volume provides an essential reference tool for anyone requiring to access maps of the British Isles dating back to the medieval period and beyond.

**Access to Justice in Environmental Matters in the EU (Acces a la Justice en Matiere D'Environnement Dans L'Ue)** Jonas Ebbesson, 2002-05-15 Access to justice in environmental matters has been a topic for increasing legal discourse and law-making in

international, European Community (EC) and national arenas. The 1998 Aarhus Convention provides new norms of international law, inspired by the 1992 Rio Declaration. EC law on access to justice is being drafted and changes can be observed in the laws of the European Union (EU) members states. This timely book presents the state-of-the-art of access to justice in environmental matters in the European Union. It provides a thematic and comparative introduction of the topic, followed by thorough descriptions of EC law and the law of each EU member state. The chapters are written in English or French with a summary in the other language. L'accès à la justice en matière d'environnement a fait l'objet de plus en plus de développements législatifs en droit international, communautaire et national. La Convention d'Aarhus de 1998 définit de nouvelles normes de droit international, faisant suite à la Déclaration de Rio de 1992. Le droit communautaire en matière d'accès à la justice est en voie d'élaboration et d'adaptation; des changements peuvent être observés dans les lois nationales des États membres de l'Union européenne. Cet ouvrage, qui arrive en temps opportun, présente l'état actuel de l'accès à la justice en matière d'environnement dans l'Union européenne. Une introduction thématique et comparative du sujet est suivie par une description approfondie du droit communautaire et du droit national de chaque État membre de l'Union européenne. Les chapitres sont rédigés soit en français soit en anglais, accompagnés respectivement d'un

Each chapter covers a different country and describes the modern history, development of libraries and library technology. The careful selection of countries achieves good representation of professional library work on all continents. This two-volume work represents an excellent contribution to international librarianship and allows comparative studies both at graduate and professional level.

**Bad Girls** Amanda H. Littauer,2015-07-17 In this innovative and revealing study of midcentury American sex and culture, Amanda Littauer traces the origins of the sexual revolution of the 1960s. She argues that sexual liberation was much more than a reaction to 1950s repression because it largely involved the mainstreaming of a counterculture already on the rise among girls and young women decades earlier. From World War II-era victory girls to teen lesbians in the 1940s and 1950s, these nonconforming women and girls navigated and resisted intense social and interpersonal pressures to fit existing mores, using the upheavals of the era to pursue new sexual freedoms. Building on a new generation of research on postwar society, Littauer tells the history of diverse young women who stood at the center of major cultural change and helped transform a society bound by conservative sexual morality into one more open to individualism, plurality, and pleasure in modern sexual life.

Not Without Us: Perspectives on Disability and Inclusion in Singapore Kuansong Victor Zhuang, Meng Ee Wong, Dan Goodley, 2023-01-01 Disability is all around us—among people we meet, the media, sports, our own family and friends. Undeniably, all of us have or will one day come to experience or encounter disability. But how can we reckon with the realities of those who live with disability, or its reality in our own lives? In a city-state slowly moving towards inclusion, how do those meant to be 'included' feel about such efforts? *Not Without Us: perspectives on disability and inclusion in Singapore* is a groundbreaking collection of essays that takes a creative and critical disability studies approach to centre disability, and rethink the ways in which we research, analyse, think and know about disability in our lives. Across multiple domains and perspectives, the writings in this volume consider what it means to live with disability in a purportedly inclusive and accessible Singapore. “This is a pathbreaking book. *Not Without Us* weaves together a rich fabric of voices exploring the politics and poetics of disability in Singapore. Moving between lived reality, representation and struggles for social transformation, the collection excavates hidden or forgotten pasts, documents struggles and community formation in the present, and hints at possible futures. The essay collection challenges contemporary discourses of and scholarship on disability in Singapore by centring disabled subjectivities. In the process, it opens up new spaces of empathy, praxis and critique.” —Philip Holden, Independent Scholar and Counsellor It warms my heart to see another book on disability through the Asian lens. Not just any book or author, but a plethora of contributors who are leaders in the Singaporean disability scene. The tapestry of all the essays inspires the imagination to how we can truly create a place that all of us

can call home. Inclusion isn't just keeping the token seat available, or inviting someone disabled to the party, but truly paving the way forward for all of us to celebrate each other as individuals in all our different shapes, sizes and colours. Thank you Not Without Us for so eloquently celebrating 'Nothing about us, without us'! —Cassandra Chiu, Psychotherapist; Social Advocate and Author of *A Place For Us Not Without Us* is a richly edited and profoundly written collection of essays about disability in Singapore. It is part of a new and fresh movement to provide local knowledges and global perspectives to a field that has been for too long grounded in the West, particularly the US and the UK. The book will be extremely valuable not only to readers in Singapore but also to those throughout the world who seek a broader perspective on significant issues in disability studies, arts, policy and activism. —Lennard J. Davis, Distinguished Professor, College of Liberal Arts and Sciences, University of Illinois in Chicago

The Parliamentary Debates Great Britain. Parliament,1891

The Future of Violence Benjamin Wittes,Gabriella Blum,2015-03-10 The ability to inflict pain and suffering on large groups of people is no longer limited to the nation-state. New technologies are putting enormous power into the hands of individuals across the world—a shift that, for all its sunny possibilities, entails enormous risk for all of us, and

may even challenge the principles on which the modern nation state is founded. In short, if our national governments can no longer protect us from harm, they will lose their legitimacy. Detailing the challenges that states face in this new world, legal scholars Benjamin Wittes and Gabriella Blum controversially argue in [Title TK] that national governments must expand their security efforts to protect the lives and liberty of their citizens. Wittes and Blum show how advances in cybertechnology, biotechnology, and robotics mean that more people than ever before have access to technologies—from drones to computer networks and biological data—that could possibly be used to extort or attack states and private citizens. Security, too, is no longer only under governmental purview, as private companies or organizations control many of these technologies: internet service providers in the case of cyber terrorism and digital crime, or academic institutions and individual researchers and publishers in the case of potentially harmful biotechnologies. As Wittes and Blum show, these changes could undermine the social contract that binds citizens to their governments. In this brave new world of dispersed threats, Wittes and Blum persuasively argue that the best means for safeguarding our liberty and privacy are strong governmental surveillance and security networks. Indeed, they show—through engaging looks at political thinkers from Thomas Hobbes to the Founders and beyond—that security and liberty are mutually supportive, rather than existing in a precarious balance in which the increase in one leads to a proportional decrease in the other. And not only must we bolster our domestic security efforts, but we must think internationally. Our best defense is increasingly a transnational one: more multinational forces and greater action to protect (and protect against) the territory of

weaker states who do not yet have the capability to police themselves. [Title TK] is at once an exposé of our emerging world—one in which students can print guns with 3-D printers and scientists’ manipulations of viruses can be recreated and unleashed by ordinary people—and an authoritative blueprint for how government and individuals must adapt to it.
