**Access Denied** Ronald Deibert, John Palfrey, Rafal Rohozinski, Jonathan Zittrain, 2008-01-25 A study of Internet blocking and filtering around the world: analyses by leading researchers and survey results that document filtering practices in dozens of countries. Many countries around the world block or filter Internet content, denying access to information that they deem too sensitive for ordinary citizens—most often about politics, but sometimes relating to sexuality, culture, or religion. Access Denied documents and analyzes Internet filtering practices in more than three dozen countries, offering the first rigorously conducted study of an accelerating trend. Internet filtering takes place in more than three dozen states worldwide, including many countries in Asia, the Middle East, and North Africa. Related Internet content-control mechanisms are also in place in Canada, the United States and a cluster of countries in Europe. Drawing on a just-completed survey of global Internet filtering undertaken by the OpenNet Initiative (a collaboration of the Berkman Center for Internet and Society at Harvard Law School, the Citizen Lab at the University of Toronto, the Oxford Internet Institute at Oxford University, and the

University of Cambridge) and relying on work by regional experts and an extensive network of researchers, Access Denied examines the political, legal, social, and cultural contexts of Internet filtering in these states from a variety of perspectives. Chapters discuss the mechanisms and politics of Internet filtering, the strengths and limitations of the technology that powers it, the relevance of international law, ethical considerations for corporations that supply states with the tools for blocking and filtering, and the implications of Internet filtering for activist communities that increasingly rely on Internet technologies for communicating their missions. Reports on Internet content regulation in forty different countries follow, with each two-page country profile outlining the types of content blocked by category and documenting key findings. Contributors Ross Anderson, Malcolm Birdling, Ronald Deibert, Robert Faris, Vesselina Haralampieva [as per Rob Faris], Steven Murdoch, Helmi Noman, John Palfrey, Rafal Rohozinski, Mary Rundle, Nart Villeneuve, Stephanie Wang, Jonathan Zittrain

**Access Denied (and other eighth grade error messages)** Denise Vega, 2009-07-01 Computer whiz Erin Swift is ready to start eighth grade. The Year of Humiliating Events (aka, seventh grade) is behind

her and she's ready to rule the school. But eight grade comes with its own set of problems for Erin to navigate, including her first boyfriend, her first break-up, and the fact that her mom has been treating her more like an eight year old than an eighth grader. Even worse, there's a new girl at Molly Brown Middle School who is determined to remake Erin in her bad-girl image, and former crush Mark Cute Boy Sacks has been acting strange lately. But as Erin's school year once against hurdles toward disaster, a personal tragedy forces her to realize that things, and people, aren't always as bad as they seem. Can she save what's left of eighth grade before it's too late?

*Access Denied* □usayn Ab□ □usayn,Hussein Abu Hussein,Fiona McKay,2003-09 This book examines how Israeli land policy today inhibits access to land for its own Arab citizens even within the 1948 boundaries of the state of Israel. Its authors explore the system of land ownership, the acquisition and administration of public land, and the control of land use through planning and housing regulations. They argue that the law is used to discriminate against non-Jewish citizens and restrict Israeli Palestinians' access to land, and that Israeli land policies breach international human rights standards which could be used as a basis to challenge discriminatory policies.

**Access Denied** George Campbell Jr., Ronni Denes, Catherine Morrison, 2000-05-04 Since the Civil Rights Era of the 1960s, minority groups have seen a tremendous amount of progress, but African Americans, Latinos, and American Indians still remain severely underrepresented in science, engineering, and mathematics. And although government, industry, and private philanthropies have supported more than 200 pre-college and college-level initiatives to increase the access and retention of minority students, the outcomes of these programs have not been well documented. This book from the National Action Council for Minorities in Engineering (NACME) presents definitive essays by leading research scholars, academics, and industry representatives on the participation of minorities in

science, mathematics, and engineering. Its extensive coverage includes essays on current demographics, entering the education system, influences on minority participation, barriers to success, and preparation for academic careers. It is ideal for scholars, researchers, educators, and policymakers who study and strive to break the barriers of discrimination.

**Access Denied** PhD Katherine Reddick, 2016-06-13 *Access Denied* follows a woman's lifelong transformation from a small girl escaping a life destined for crime, ignorance, and generational poverty and abuse to a successful adult. Her story grants the reader an insider's look at America's foster care system and its impact on a child's entire life. She shares her real-life experiences through the innocence of childhood to the confused and insecure adolescence to the instability of adulthood. Eventually, her negative experiences are overcome by her persistence to become a well-educated, compassionate adult fighting for the rights of America's abused and neglected children. The major themes within *Access Denied* have specific solutions included at the end of the book, giving every reader the opportunity to join Dr. Reddick's campaign to save, rather than store America's foster

children. Dr. Reddick's campaign can be followed at [www.saveus2.com](http://www.saveus2.com) or on Facebook.

*Access Denied in the Information Age* S. Lax, 2001-01-19 We live in an information society. Or so we are told. Access to unlimited information will promote equality for all. But is the information society really going to be like this? Who is going to reap the rewards of new information and communication technologies? Focusing on a theme of exclusion, *Access Denied in the Information Age* dispels the myths of the information society. The authors here take a few steps back from the hype and consider the real place of these new technologies in society.

*If Dominican Were a Color* Sili Recio, 2020-09-22 The colors of Hispaniola burst into life in this striking, evocative debut picture book that celebrates the joy of being Dominican. If Dominican were a color, it would be the sunset in the sky, blazing red and burning bright. If Dominican were a color, it'd be the roar of the ocean in the deep of the night, With the moon beaming down rays of sheer delight. The palette of the Dominican Republic is exuberant and unlimited. Maiz comes up amarillo, the blue-black of dreams washes over sandy shores, and people's skin can be the shade of cinnamon in cocoa

or of mahogany. This exuberantly colorful, softly rhyming picture book is a gentle reminder that a nation's hues are as wide as nature itself.

**Accessibility Denied. Understanding Inaccessibility and Everyday Resistance to Inclusion for Persons with Disabilities** Hanna Egard,Kristofer Hansson,David Wästerfors,2021-11-09 This book explores the societal resistance to accessibility for persons with disabilities, and tries to set an example of how to study exclusion in a time when numerous policies promise inclusion. With 12 chapters organised in three parts, the book takes a comprehensive approach to accessibility, covering transport and communication, knowledge and education, law and organisation. Topics within a wide cross-disciplinary field are covered, including disability studies, social work, sociology, ethnology, social anthropology, and history. The main example is Sweden, with its implementation of the United Nations Convention on the Rights of Persons with Disabilities within the context of the Nordic welfare state. By

identifying and discussing persistent social and cultural conditions as well as recurring situations and interactions that nurture resistance to advancing accessibility, despite various strong laws promoting it, the book's conclusions are widely transferable. It argues for the value of alternating between methods, theoretical perspectives, and datasets to explore how new arenas, resources and technologies cause new accessibility concerns — and possibilities — for persons living with impairments. We need to be able to follow actors closely to uncover how they feel, act, and argue, but also to connect to wider discursive and institutional patterns and systems. This book will be of interest to scholars and students of disability studies, social work, sociology, ethnology, social anthropology, political science, and organisation studies.
