Hilary of Poitiers' Preface to his Opus Historicum P. Smulders S.J.,2015-12-22 What precisely does Hilary's so-called Opus Historicum aim at? His Preface provides the clue. An introduction to the present edition sketches the mutilated work's discovery, tabulates its contents, and discusses problems of dating and authenticity. The English translation, which faces the Latin text, adopts some alternative readings. The Preface is elucidated in itself, and by reference to the earlier In Matthaëum. Central issues are hope and love, confessors and martyrs, imperial favours and threats, the bishop and his inner freedom. The circumspect treatment of both the reader and the subject reveals 'conscientization' of the bishops as the aim of the Opus Historicum. One of the book's excurses deals with the edict of

Arles and Milan, and concludes that the nameless creed quoted by Hilary might preserve the lost edict's doctrinal preliminaries.

Microeconomic Risk Management and Macroeconomic Stability Andreas Röthig, 2009-08-02 "The essence of a hedging contract is a coincident purchase and sale in two markets which are expected to behave in such a way that any loss realized in one will be offset by an equivalent gain in the other. If such behavior follows a perfect hedge has been effected. " Hardy and Lyon (1923, p. 276). 1. 1 Literature Review and Motivation In the traditional hedging literature, the two markets in which hedgers trade are spot and futures markets. The trader's position in the spot market is generally considered as given. According to Johnson (1960), hedging can be meaningfully defined only if the spot market is regarded as the trader's primary market. The futures market is used solely to counterbalance an existing position in the spot market. Speculators, in contrast, do not have a commitment in the spot market. They take on risk in futures markets in order to profit from expected price changes. The hedger synchronizes his trading activities in spot and futures markets in order to reduce spot risk. In the literature this approach to hedging is labeled risk reduction concept. Risk reduction will be achieved if spot and futures prices move more or less in parallel. If prices are perfectly correlated, risk is abolished, since losses in one market are perfectly offset by profits in the other market. However, as Hardy and Lyon (1923) point out, any divergence from perfect correlation results in an imperfect hedge.

Anglo-Swedish Commercial Connections and Diplomatic
Relations in the Seventeenth Century Adam Grimshaw,2023-10-09

This is the first study to analyse the relationship between England and Sweden across the entire seventeenth century. It emphasises the importance of commerce and diplomacy working in tandem. The book contains five chapters arranged chronologically, all based on original and innovative archival research, and traces the economic aspects of the relationship in both a qualitative and quantitative context. It draws upon a number of unique incidents to detail the variety and extent of commercial and diplomatic connections that became of primary importance for the welfare and success of both nations over the century.
