The book also investigates how students could deal with cognitive overload when learning introductory accounting using three instructional design formats: the split-attention format, the integrated format, and the self-managed format.

A Non-Technical Guide to International Accounting Roger Hussey, Audra Ong, 2019-11-08 Business has become more international and more complex. Whether you are a manager, a student, or someone generally interested in corporate financial information, you want information and you want to understand that information. Companies in all countries are required to generate financial information, if for no other reason than to settle their tax obligations. If you are interested in the larger companies, such as those listed on a stock exchange, they must make financial information public, and the nature and type of that information is strictly regulated. Companies must comply with accounting standards. Many countries use the International Accounting Standards issued by the IFRS Foundation. This is a not-for-profit international organization that has developed a single set of high-quality global accounting standards. These standards can be complex, but this book explains clearly the main requirements.
