Media Programming Susan Tyler Eastman,Douglas A. Ferguson,2009 This book is primarily about television and radio and it focuses on entertainment and informational programs coming to viewers as pre-produced units of content. -Pref. [This book] provides students with ... information on the techniques and strategies used in the programming industry. [This] text covers all aspects of media programming for broadcast and cable television, radio, and the Internet ... The authors explore how programs (units of content) are selected (or not selected), how programs are arranged in schedules of various kinds, how programs are evaluated by the industry, and how they are promoted to audiences and advertisers. The book also delves into the limits of media programming arising from technology, regulations, policies, and marketing needs, as well as how things like human attention spans, lifestyle patterns and economics determine the availability and arrangement of media entertainment content. -<http://www.wadsworth.com>.

Scandals and Follies Lee Allyn Davis,2000 Davis (author, lecturer and theater critic) revisits the legendary talents and the often outrageous impresarios who brought them to Broadway. Beginning with Florenz Ziegfeld's Follies of 1907, he tells how other producers were soon drawn to the revue and how its zaniness and spectacle became funhouse mirrors to the Jazz Age itself. The revues' madness and extravagance were replaced with social satire and political comment in the following decades and, finally, were dimmed by the advent of television. The book contains many bandw photographs. Annotation copyrighted by Book News Inc., Portland, OR

Hook, Line and Supper Hank Shaw,2021-04 Quite possibly the only fish and seafood cookbook you'll ever need, from the author of the award-winning website Hunter Angler Gardener Cook. So many people get all tense when faced with a piece of fish or a bag of shrimp. It's understandable: you went through all that effort to catch it, or, if you bought it from the store, we all know that fish isn't cheap. You don't want to mess things up. Hook, Line and Supper aims to cure that stage fright once and for all by breaking down the essence of fish and seafood cookery, allowing you to master the methods that bring out the best in whatever you catch or bring home from the market. Rather than focusing on specific species, Hook, Line and Supper zeroes in on broad, widely applicable varieties of fish - both freshwater and salt - that can substitute for each other, and clearly and carefully provides master recipes and techniques that will help you become a more competent and complete fish and seafood cook. Hank Shaw, an award-winning food writer, angler, commercial fisherman and cook at the forefront of the wild-to-table revolution, provides all you need to know about buying, cleaning, and cooking fish and seafood from all over North America. You'll find detailed information on how best to treat these various species from the moment they emerge from the water, as well as how to select them in the market, how to prep, cut and store your fish and seafood. Shaw's global yet approachable recipes include basics such as classic fish and chips and smoked salmon; international classics like Chinese steamed fish with chiles, English fish pie, Mexican grilled clams, and Indian crab curry; as well as deeply personal dishes such as a Maine style clam chowder that has been in his family for more than a century. It also features an array of fish and seafood charcuterie, from fresh sausages and crispy skin chips, to terrines and even how to make your own fish sauce. The most comprehensive guide to preparing and cooking fish and seafood, Hook, Line and Supper will become an indispensable resource for anglers as well as home cooks looking for new ways to cook whatever fish or seafood that strikes their fancy at the market.

Python for Probability, Statistics, and Machine Learning José Unpingco,2019-06-29 This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes provided. The author develops key intuitions in machine learning by working meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and

Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are new and updated *Programming Tips* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 run-able code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

Research in Media Promotion Susan Tyler Eastman, 2000-08 Eastman has assembled this exemplary volume to spotlight media promotion and to examine current research on the promotion of television and radio programs. The studies included here explore various types of promotion and use widely differing methods and approaches, providing a comprehensive overview of promotion research activities. Chapters include extensive literature reviews, original research, and discussion of research questions for subsequent study. Research in Media Promotion serves as a benchmark for the current state of promotion research and theory, and establishes the role of promotion as a primary factor affecting audience size. Appropriate for coursework and study in programming, marketing, research methods, management, and industry processes and practices, this volume offers agenda items for future study and is certain to stimulate new research ideas.

Broadcast Programming Susan Tyler Eastman, 1981

Self-images André Rival, Klaus Honnef, 1995 Andre Rival, at home in both Paris and Berlin, has created a fascinating project out of a relatively simple idea: 100 women taking photographs of themselves. The outcome is both startling and impressive. It is an expression of contemporary female identity - self-aware, distinctive and thoroughly positive, in a series of nude photographs that inexorably capture and hold our attention, revealing at the same time the artist's highly creative approach to the medium of photography and to the individual selves of the women portrayed. The author describes his project in this way: We are inundated with pictures of women in the media. Ordinarily, the pictures we see seek to achieve a kind of 'sameness' based on unwritten ideals of beauty; physical perfection, total fitness become the determining factors. These images of women, provoked as they are by the media industry, awakened in me the urge to confront both that industry and myself with something else. I chose to set aside my own ways of thinking and do a series of 100 women in which it was not I who would put together the photographs, but the women themselves. For this purpose, I gave them each a shutter-switch and left the room. That represented the beginning of the attempt to enable the women to become photographic subjects rather than objects; they were left to decide on their own which personal image of themselves they wanted to convey. The conditions were the same for all of the women: the same lighting, the same white background and the same unchanged camera position. It was essential to fix the location of the camera, so that the women did not perceive themselves as being pursued by an 'observer'; instead, they were able to establish distance and camera angle themselves with the aid of a video screen that showed them each camera exposure as a still photo.
