Ace Angela Chen,2020-09-15 An engaging exploration of what it means to be asexual in a world that's obsessed with sexual attraction, and what the ace perspective can teach all of us about desire and identity. What exactly is sexual attraction and what is it like to go through life not experiencing it? What does asexuality reveal about gender roles, about romance and consent, and the pressures of society? This accessible examination of asexuality shows that the issues that aces face—confusion around sexual activity, the intersection of sexuality and identity, navigating different needs in relationships—are the same conflicts that nearly all of us will experience. Through a blend of reporting, cultural criticism, and memoir, Ace addresses the misconceptions around the “A” of LGBTQIA and invites everyone to rethink pleasure and intimacy. Journalist Angela Chen creates her path to understanding her own asexuality with the perspectives of a diverse group of asexual people. Vulnerable and honest, these stories include a woman who had blood tests done because she was convinced that “not wanting sex” was a sign of serious illness, and a man who grew up in a religious household and did everything “right,” only to realize after marriage that his experience of sexuality had never been the same as that of others. Disabled aces, aces of color, gender-nonconforming aces, and aces who both do and don't want romantic relationships all share their experiences navigating a society in which a lack of sexual attraction is considered abnormal. Chen's careful cultural analysis explores how societal norms limit understanding of sex and relationships and celebrates the breadth of sexuality and queerness.

Luftwaffe Fighter Ace Norbert Hannig, 2004-11-19 A World War II memoir by the renowned German fighter pilot—from his Hitler Youth glider training to combat missions against the Soviet Air Force. Herr Norbert Hannig's wartime career makes for fascinating and highly informative reading on an aspect of the 1939-45 air war not often covered in the English language; primarily that of the campaign against the Soviet Union. He was one of the midwar-generation Luftwaffe fighter pilots and began operations with JG 54 on the eastern (Leningrad) front in early 1943; initially flying Messerschmitt Bf 109s before transitioning to the Focke-Wulf Fw 190. He became a Staffel CO and was credited with 42 victories, also serving with JV 44 (whose CO was Adolf Galland); he then returned to Germany towards the closing stages of the war to convert to Me 262 jet fighters. Many and varied were his experiences in action against the rejuvenated Soviet Air Force in the east, and the powerful western Allies over the homeland during the final chaotic months of hostilities, which culminated in his captivity. John Weal's skillful translation ensures that the fluid and descriptive style of the author is preserved. Thankfully, also, Norbert was a keen photographer who shot a profusion of images, all previously unpublished, many of which appear in this important book.

Role of the Mediterranean Diet in the Brain and Neurodegenerative Diseases Tahira Farooqui, Akhlaq A. Farooqui, 2017-10-24 Role of the Mediterranean Diet in the Brain and Neurodegenerative Disease provides a comprehensive overview of the effects of all components of the Mediterranean diet on the brain, along with its beneficial effects in neurodegenerative diseases. It covers topics on neurodegenerative diseases (Alzheimer disease (AD), Parkinson disease, (PD) Huntington disease (HD) and Amyotrophic Lateral Sclerosis (ALS), also providing information on how cardiovascular disease, Type 2 Diabetes, and Metabolic Syndrome become risk factors for neurodegenerative diseases. This book focuses on how the Mediterranean diet suppresses oxidative stress and neuroinflammation in neurodegenerative diseases as well as signal transduction. The Mediterranean diet is characterized by the abundant consumption of olive oil, high consumption of plant foods (fruits, vegetables, pulses, cereals, nuts and seeds); frequent and moderate intake of wine (mainly with meals); moderate consumption of fish, seafood, yogurt, cheese, poultry and eggs; and low consumption of red meat and processed meat products. High consumption of dietary fiber, low glycemic index and glycemic load, anti-inflammatory effects, and antioxidant compounds may act together to produce favorable effects on health status. Collective evidence suggests that Mediterranean diet not only increases longevity by lowering cardiovascular disease, inhibiting cancer growth, but also by protecting the body from age-dependent cognitive decline. Comprehensively provides an overview of the effects of the Mediterranean diet on the brain and its beneficial effects in neurodegenerative diseases Discusses the relationship among Type 2 Diabetes, Metabolic Syndrome and Alzheimer's Disease, and the effect of the Mediterranean diet on normal aging, longevity, and other neurodegenerative diseases Focuses on how the Mediterranean diet suppresses oxidative stress
