Ace Is Wild Penny McCall,2008-08-05 The frigid Rocky Mountain air is nothing compared to the chill between a gorgeous scientist and a hardened FBI agent. But out in the middle of nowhere, all it

takes is body heat to melt the snow. Alex Scott has been doing just fine on her own, studying mountain lions and living alone in a log cabin seventy-five miles from anywhere. The last thing she needs is some cocky guy, even one with looks to die for, falling from the sky. All FBI agent Tag Donovan wants is to find the mobster who killed his partner. But when he finds himself pushed off a low-flying plane, only to land face-down in the snow in a hail of bullets, survival is the only thing on his mind. Until he gets a good look at the beauty who drags him to safety. Ignoring each other isn't going to work when there's no one else around—especially when Alex could be the key to solving Tag's mystery. And though Tag's aching body wants nothing but bed rest, Alex's smoky voice makes him think of more exciting uses for the bed. And the table. And—well, after all, he's no snow-angel.

Stronghold Tucker Malarkey, 2019-07-23 PNBA BESTSELLER • “A powerful and inspiring story. Guido Rahr’s mission to save the wild Pacific salmon leads him into adventures that make for a breathtakingly exciting read.”—Ian Frazier, author of *Travels in Siberia* Editors’ Choice: The New York Times Book Review • Outside Magazine • National Book Review • Forbes In the tradition of *Mountains Beyond Mountains* and *The Orchid Thief*, *Stronghold* is Tucker Malarkey’s eye-opening account of one of the world’s greatest fly fishermen and his crusade to protect the world’s last bastion of wild salmon. From a young age, Guido Rahr was a misfit among his family and classmates, preferring to spend his time in the natural world. When the salmon runs of the Pacific Northwest began to decline, Guido was one of the few who understood why. As dams, industry, and climate change degraded the homes of these magnificent fish, Rahr saw that the salmon of the Pacific Rim were destined to go the way of their Atlantic brethren: near extinction. An improbable and inspiring story, *Stronghold* takes us on a wild adventure, from Oregon to Alaska to one of the world’s last remaining salmon strongholds in the Russian Far East, a landscape of ecological richness and

diversity that is rapidly being developed for oil, gas, minerals, and timber. Along the way, Rahr contends with scientists, conservationists, Russian oligarchs, corrupt officials, and unexpected allies in an attempt to secure a stronghold for the endangered salmon, an extraordinary keystone species whose demise would reverberate across the planet. Tucker Malarkey, who joins Rahr in the Russian wilderness, has written a clarion call for a sustainable future, a remarkable work of natural history, and a riveting account of a species whose future is closely linked to our own. Praise for Stronghold “This book isn’t just about fish, it’s about life itself and the fragile unseen threads that connect all creatures across this beleaguered orb we call home. Guido Rahr’s quest to save the world’s wild salmon should serve as an inspiration—and a provocation—for us all, and Tucker Malarkey’s exquisite book captures Rahr’s weird and wonderful story with poignancy, humor, and grace.”—Hampton Sides, author of *In the Kingdom of Ice and Blood and Thunder* “A crazy-good, intensely lived book that reads like an international thriller—only it’s our beloved salmon playing the part of diamonds or oil or gold.”—David James Duncan, author of *The River Why* and *The Brothers K Fishing for Summer Flounder* John Skinner, 2016-11

Four Fish Paul Greenberg, 2011-05-31 “A necessary book for anyone truly interested in what we take from the sea to eat, and how, and why.” —Sam Sifton, *The New York Times Book Review* Acclaimed author of *American Catch* and *The Omega Principle* and life-long fisherman, Paul Greenberg takes us on a journey, examining the four fish that dominate our menus: salmon, sea bass, cod, and tuna. Investigating the forces that get fish to our dinner tables, Greenberg reveals our damaged relationship with the ocean and its inhabitants. Just three decades ago, nearly everything

we ate from the sea was wild. Today, rampant overfishing and an unprecedented biotech revolution have brought us to a point where wild and farmed fish occupy equal parts of a complex marketplace. Four Fish offers a way for us to move toward a future in which healthy and sustainable seafood is the rule rather than the exception.

Fly Fishing Memories of Angling Days J. R. Hartley, 2015-06-24 J. R. Hartley's best-known catch to date is the public imagination. Here are his elusive fishing recollections told in a series of sometimes vividly comic chronological cameos, ranging period and location from York school days in the early 1930s through memorable outings on stream, spate river and loch to startling conclusion half a lifetime later on a Scottish summer night. Complimented by his protege Patrick Benson's evocative illustrations and with his anglers expertise lightly threaded throughout, J. R.'s story will touch every fly fisherman's experience. But it is book too that will appeal to everyone even those who have never held a rod, for the engaging point that emerges of the ultimate reluctant hero.

I Fished My Way Through Life John Lesterson, 2019-06-15 John's life story shows the reader that his life's experiences always revolved around fishing and the great outdoors. In his youth his family moved to many states with the military. With a fishing rod in his hand he would make friends with total strangers who sometimes became his mentors. As a young man in Alaska he made some wild reckless social decisions and still made time to fish. His priority's in life were always fishing, friendships, fishing, laughter, fishing, chase your dreams, fishing, and live a simple life—fishing. I Fished My Way Through Life shows the reader all of that. If you were fortunate enough to fish with John Lesterson you learned how to enjoy fishing and loved the stories he would tell.

Becoming Wild Carl Safina,2020-04-14 A NEW YORK TIMES NOTABLE BOOK OF 2020 In this superbly articulate cri de coeur, Safina gives us a new way of looking at the natural world that is radically different.—The Washington Post New York Times bestselling author Carl Safina brings readers close to three non-human cultures—what they do, why they do it, and how life is for them. A New York Times Notable Books of 2020 Some believe that culture is strictly a human phenomenon.

But this book reveals cultures of other-than-human beings in some of Earth's remaining wild places. It shows how if you're a sperm whale, a scarlet macaw, or a chimpanzee, you too come to understand yourself as an individual within a particular community that does things in specific ways, that has traditions. Alongside genes, culture is a second form of inheritance, passed through generations as pools of learned knowledge. As situations change, social learning—culture—allows behaviors to adjust much faster than genes can adapt. *Becoming Wild* brings readers into intimate proximity with various nonhuman individuals in their free-living communities. It presents a revelatory account of how animals function beyond our usual view. Safina shows that for non-humans and humans alike, culture comprises the answers to the question, "How do we live here?" It unites individuals within a group identity. But cultural groups often seek to avoid, or even be hostile toward, other factions. By showing that this is true across species, Safina illuminates why human cultural tensions remain maddeningly intractable despite the arbitrariness of many of our differences. *Becoming Wild* takes readers behind the curtain of life on Earth, to witness from a new vantage point the most world-saving of perceptions: how we are all connected.
