**THE WIMP CHIMP** T K Noell,2024-03-22 A chance discovery was the impetus for this book. I had a cerebral aneurysm, was incapacitated for awhile, and had time to amuse myself on the internet. I discovered serendipitously that chimps, our closest genetic relatives, couldn't float. Chimps only live in Africa, and we have a common ancestor. So by extension, we must have been living with them in the beginning and probably separated from them by crossing some watery barrier there. The rest of the book all came as a result of this realization, and over the course of several years I believe I've discovered the answer to those age old questions, where did we come from, and how did we come to be? The ebook is best viewed in colour.

*Chimpanzee: Brainy Beast* Paige V. Polinsky,2016-08-15 Being a brainy beast is just one of the things that make chimpanzees superstars! Did you know chimps make their own tool kits or that a chimp is as tall as an average woman? This fun and fact-packed title with high-impact visuals, including maps and infographics, will keep kids engaged as they learn all about chimpanzees. Aligned to Common Core Standards and correlated to state standards. Super Sandcastle is an imprint of Abdo Publishing, a division of ABDO.

*The Artificial Ape* Timothy Taylor,2010-07-20 A breakthrough theory that tools and technology are the real drivers of human evolution Although humans are one of the great apes, along with chimpanzees, gorillas, and orangutans, we are remarkably different from them. Unlike our cousins who subsist on raw food, spend their days and nights outdoors, and wear a thick coat of hair, humans are entirely dependent on artificial things, such as clothing, shelter, and the use of tools, and would die in nature without them. Yet, despite our status as the weakest ape, we are the masters of this planet. Given these inherent deficits, how did humans come out on top? In this fascinating new account of our origins, leading archaeologist Timothy Taylor proposes a new way of thinking about human evolution through our relationship with objects. Drawing on the latest fossil evidence, Taylor argues that at each step of our species' development, humans made choices that caused us to assume greater control of our evolution. Our appropriation of objects allowed us to walk upright, lose our body hair, and grow significantly larger brains. As we push the frontiers of scientific technology, creating prosthetics, intelligent implants, and artificially modified genes, we continue a process that started in the prehistoric past, when we first began to extend our powers through objects. Weaving together lively discussions of major discoveries of human skeletons and artifacts with a reexamination of Darwin's theory of evolution, Taylor takes us on an exciting and challenging journey that begins to answer the fundamental question about our existence: what makes humans unique, and what does that mean for our future?

**Reasoning Web** Cristina Baroglio,Piero A. Bonatti,Jan Maluszynski,Massimo Marchiori,Axel Polleres,Sebastian Schaffert,2008-08-25 This book contains a collection of thoroughly revised tutorial papers based on lectures given by leading researchers at the 4th International Summer School on the Reasoning Web, held in Venice, Italy, in September 2008. The objective of the book is to provide a coherent introduction to semantic web methods and research issues with a particular focus on reasoning. The seven tutorial papers presented provide competent coverage of methods and major application areas such as social networks, semantic multimedia indexing and retrieval, bioinformatics, and semantic web services. They highlight which techniques are already being successfully applied for purposes such as improving the performance of information retrieval algorithms, enabling the interoperation of heterogeneous agents, modelling users profiles and social relations, and standardizing and improving the accuracy of very large and dynamic scientific databases.

*Victor Mollo's Bridge Club* Victor Mollo,2010-05-11 Renowned bridge expert Victor Mollo has another card up his sleeve! Advance technique and simple bridge psychology, closely linked, are the salient features of the many brilliant plays described in Victor Mollo's Bridge Club.

**Ace Tucker Space Trucker** James R Tramontana, 2018-02-11 Ace Tucker is a man who was raised in outer space and taught how to be human by a Russian cyborg chimpanzee. Ace earns a living as a rock-and-roll roadie and cargo hauler for the greatest band in the galaxy, Mustache Supernova. His world is turned upside down the night he meets Elvis Presley, the very not-dead King of Rock `n` Roll. When Ace saves Elvis from an alien assassin he must travel to Memphis, Tennessee to restore Presley's health. But things are not what they seem at Elvis's pastoral home, Graceland. There, Ace makes a discovery that has the power to shape the future (and potentially undo the past).

**Semantic Techniques for the Web** Francois Bry, Jan Maluszynski, 2009-09-29 The objective of this state-of-the-art survey is to give a coherent overview of the main topics and results achieved by the Network of Excellence REWERSE on 'Reasoning on the Web', funded by the European Commission and Switzerland within the '6th Framework Programme' (FP6), from 2004 to 2008. The material has been organized into eight chapters, each of which addresses one of the main topics of REWERSE: hybrid reasoning with rules and ontologies, lessons in versatility or how query languages adapt to the Web, evolution and reactivity in the Semantic Web, rule-based policy representations and reasoning, component models for Semantic Web languages, controlled English for reasoning on the Semantic Web, semantic search with GoPubMed, and information integration in bioinformatics with ontologies and standards. Each chapter gives an in-depth coverage of the subject and provides an extensive bibliography with pointers to further literature.

**Murder in the Menagerie** Victor Mollo, 2014-11-24 The Hog, insufferable and all but insuperable, brings off one coup after another and seldom fails to triumph over his hated rival, Papa the Greek. Neither is a match for the Rabbit, for though R.R. rarely knows what he is doing or why, he is always saved from himself by a guardian angel.

**A Chimpanzee in the Wine Cellar** Patricia Cavendish O'Neil, 2012-10-01 From the international best-selling author of *A Lion in the Bedroom*, Pat Cavendish O'Neill, comes another glimpse into her extravagant and adventurous life ... In 1968, Pat Cavendish O'Neill reluctantly left her magical years in Kenya behind to join her mother in Somerset West, South Africa. She left behind her wonderful friends, a life she loved and, even more heart-breaking, her beloved lioness Tana. However, arriving at her new home on Broadlands Farm, Pat soon found a different channel for her extraordinary gift with animals when she revealed a sharp eye for identifying winning race horses, turning Broadlands into a renowned stud farm. As always, the women attracted a colourful international audience into their extremely lavish lifestyle - champagne and caviar were the order of the day - and Pat and her mother would regularly fly to Australia to bid on some of the world's finest fillies and colts. Pat's fierce love of animals has resulted in her opening heart and home to a variety of creatures, from monkeys to baboons, birds, sheep, pigs and horses, to a pack of seventeen dogs and a goat all living underfoot. But a rescued chimp named Kalu found his way deepest into her heart. For over 40 years Pat and Kalu have lived at Broadlands together and the one without the other is a picture incomplete. Today, at the age of 87, Pat leads a very different life from the enormous privilege and wealth into which she was born, yet she still remains true to her first love of animals.

**Conceptual Structures for Discovering Knowledge** Simon Andrews, Simon Polovina, Richard Hill, Babak Akhgar, 2011-07-18 This book constitutes the proceedings of the 19th International Conference on Conceptual Structures, ICCS 2011, held in Derby, UK, in July 2011. The 18 full papers and 4 short papers presented together with 12 workshop papers were carefully reviewed and selected for inclusion in the book. The volume also contains 3 invited talks. ICCS focuses on the useful representation and analysis of conceptual knowledge with research and business applications. It advances the theory and practice in connecting the user's conceptual approach to problem solving with the formal structures that computer applications need to bring their productivity to bear. Conceptual structures (CS) represent a family of approaches that builds on the successes of artificial intelligence, business intelligence, computational linguistics, conceptual modelling, information and Web technologies, user modelling, and knowledge management. Two of the workshops contained in this volume cover CS and knowledge discovery in under-traversed domains and in task specific

information retrieval. The third addresses CD in learning, teaching and assessment.

**Modelling and Forecasting in Dry Bulk Shipping** Shun Chen,Hilde Meersman,Eddy Van de Voorde,Koos Frouws,2014-04-24 This book models price behaviour and forecasts prices in the dry bulk shipping market, a major component of the world shipping industry. Recent uncertainties in the world economy, shipbuilding developments and fleet changes mean the dry bulk shipping market has become extremely volatile, highly speculative and more sensitive to external shocks. In response to these challenging circumstances, this book models price behaviour and forecasts prices in various markets including the freight market, the new build ship market and the second-hand ship market. The authors have carried out an extensive investigation of dry bulk shipping over a 60-year period in diverse sub-markets, trading routes, market conditions and dry bulk vessels. The authors also propose a framework for analysing and modelling the economic processes of numerous variables in the dry bulk shipping market, making use of modern econometric techniques and other economic approaches. This will be especially useful for the control and assessment of risk for ship owners and charterers in ship operation, ship chartering and ship trading activities. This book will be extremely useful for shipbuilders, owners and charterers, as well as shipping analysts and policymakers. It will also be of great interest to academics and researchers concerned with the economics of the shipping industry.

**Endangered Animals of the Jungle** William B. Rice,2018-03-29 Read Along or Enhanced eBook: Take a trip to the tropics to learn about what makes jungle animals so unique and why they need to be protected. This nonfiction title allows readers to discover the causes of endangered animals--including poaching and habitat loss--through astonishing facts and colorful images of these beautiful animals in conjunction with informational text and helpful charts and diagrams. With a glossary of terms, an index, and a list of resources and websites, children will be inspired to take part in the conservation of jungle animals.

*Controlled Natural Language* Michael Rosner,Norbert E Fuchs,2012-06-12 This book constitutes the refereed proceedings of the Second International Workshop on Controlled Natural Language, CNL 2010, held in Marettimo Island, Italy, in September 2010. The 9 revised papers presented in this volume, together with 1 tutorial, were carefully reviewed and selected from 17 initial submissions. They broadly cover the field of controlled natural language, stressing theoretical and practical aspects of CNLs, relations to other knowledge representation languages, tool support, and applications.
