The book also tells the story of other lively bikers haunts of the past, like the 59 Club, the Busy Bee and other cafes around the country. V1 Flying Bomb Aces Andrew Thomas, 2013-09-20 Shortly after the Allied landings in France the

Germans unleashed the first of their so-called 'revenge weapons', the V1 flying bomb. Launched from specially constructed sites in northern France, the fast, small, pulse-jet powered pilotless aircraft were aimed at London with the sole intent of destroying civilian morale to the point where the British government would be forced to sue for peace. This dangerous new threat drew an immediate response, and the Air Defence of Great Britain (as Fighter Command had been temporarily renamed) established layers of defence that included a gun line and balloon barrage. The main element, however, were standing patrols by the fastest piston-engined fighters available to the RAF – the new Tempest V and Griffon-powered Spitfire XIV. Other types were allocated too, most notably the Polish Mustang wing, while night defence was left in the capable hands of several dedicated Mosquito squadrons. Although pilotless, the V1 was no easy foe thanks to its speed, powerful warhead and sheer unpredictability. Nevertheless, 154 pilots became V1 aces, 25 of whom were also aces against manned aircraft.

Aces of the Reich Mike Spick, 2013-10-23 “Fascinating . . . you’ll gain tremendous insight into some of the best fighter pilots the world has ever known, as well as the Luftwaffe’s rise and fall.” —The Military Book Club In 1939, the Luftwaffe was arguably the world’s best-equipped and best-trained air force. Its fighters were second to none, and their pilots had a tactical system superior to any other in the world. In campaigns over Poland, Norway, the Low Countries and France, they carried all before them. Only in the summer of 1940 did they fail by a narrow margin in achieving air superiority over England. In the West, with a mere holding force, they maintained an enviable kill-loss ratio against the RAF, while elsewhere they swept through the Balkans, then decimated the numerically formidable Soviet Air Force. Their top

scorers set marks in air combat that have never been surpassed. Yet within three years—despite the introduction of the jet Me 262, the world's most advanced fighter—the Luftwaffe fighter arm had been totally defeated. How did this happen? Air-warfare historian Mike Spick explores this question in depth in this incisive and compelling study of World War II's most fearsome air force. "Spick's work explores one of the interesting questions of World War II: why did the Jagdwaffe, the most efficient, best-trained and most technically advanced air force in the world in 1939 endure a bewildering defeat within three short years. Spick comes up with some interesting theories to do with the influence of the cult of Manfred Von Richtofen (the Red Baron)." —In Flight USA

**Balloon-Busting Aces of World War 1** Jon Guttman,2013-05-20 Tethered balloons reached their zenith as a means of providing a stationary observation platform above the battlefield during World War I. It took a special breed of daredevil to take on such odds deep in enemy lines in order to destroy a balloon, with Balloon specialists such as Willy Coppens, Pierre Bourjade and Michel Coiffard rising to the challenge. This book covers the story of these 'balloon busters' from both sides in World War 1 through a mix of first-hand accounts and expert analysis, which compares tactics, theatres of operation, aircraft types and the overall odds for success.

**The Ace Cafe** Winston Ramsey,2022-07-28 The book opens with the first beginnings of bike racing in the London area — at High Beech — in 1928 and continues with the pre-war history of the North Circular as one of Britain's new 'arterial' roads, and?the establishment of the Ace 'road-house' at Stonebridge Park in 1939. Then, Barry 'Noddy' Cheese, one of the Ace's original 'ton-up' boys, paints a graphic picture for us of the excitement of life at the cafe in the 1950-1960s. The controversial Dixon of Dock Green TV episode is

covered as is the making of the classic film *The Leather Boys* and the book goes on to describe events leading up to the closure and subsequent isolation of the Ace with the construction of the new bypass in the 1990s. The story is brought up to date with the resurrection of the cafe's fortunes under Mark Wilshire and the fantastic reopening celebrations in September 2001.

*Dolphin and Snipe Aces of World War 1* Norman Franks,2012-11-20 This book focuses on the combat careers of the last of the famous Sopwith fighters to enter service during World War 1, the Dolphin and the Snipe, both of which were built on the strong scouting heritage of the Pup and Camel. The Dolphin featured the unique negative-staggered biplane wing arrangement, which provided the pilot with the best possible tactical view forward for seeking out his enemy. Used extensively on the Western Front, the Dolphin proved very effective in combat, with a substantial number of British aces scoring kills with the fighter. The Snipe was built as the successor of the highly successful Camel, and entered service with the fledgling Royal Air Force in the summer of 1918. Although seeing just a few months of action before the Armistice, the Snipe nevertheless proved its superiority over virtually all other fighters.
